QUESTIONS AND ANSWERS

- Q1. Proposal note says there are no spoil areas on site and if allowed material is allowed to stay, on site payment will be made at 50% of bid unit. Notes #2 and #3 on plan sheets 16, 21, 25, and 28 talk about leaving material on site and reusing stone fill. How would this work be paid? Will we receive 100% of the bid prices for quantity moved? In addition, do these same notes apply to plan sheet 11?
- A1. A special note referenced within the proposal is specific to spoil areas. Excess excavated material not paid for under other pay items is intended to remain within Thruway ROW, in areas approved by the Engineer, and would not be considered spoil areas in this application. Payment at 50% of the unit bid price for quantity moved would not be applicable for this. The notes are also applicable to sheet 11. It is the intent that these notes are applicable to all sites within this project.
