PROPOSAL

FOR

TANY 20-3B    D214773

STEEL REPAIRS TO BROOKSIDE ROAD
BRIDGE OVER I-87

BIN 5515380    MP 74.17

BOOK 1 OF 1

THIS BOOK CONTAINS SPECIFICATIONS AND
BID PROPOSAL WORKSHEETS.

SUBMITTED IN ACCORDANCE WITH THE NEW YORK STATE
DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS
OFFICIALLY ADOPTED JANUARY 1, 2020 EXCEPT AS MODIFIED
IN THE PLANS AND/OR PROPOSAL AND ANY CHANGES WITH
ARTICLE 2, TITLE 9 OF THE PUBLIC AUTHORITIES LAW.

LETTING OF

MARCH 25, 2020

11:00 A.M.

200 Southern Blvd., Albany, NY 12209
NOTICE
TO
BIDDERS

In addition to the bid deposit requirement, this Proposal shall be accompanied by a Statement of Surety’s Consent on the form furnished by the Authority. (See last page).

BIDDERS ARE SUBJECT TO LOSS OF BID DEPOSIT FOR FAILURE TO OBTAIN PROPER BONDING.
Thruway Authority
Designated Contacts

Pursuant to NYS Finance Law Sections 139-j and 139-k, the following people are the designated contacts for this procurement process:

For all procurement contract process related questions:

- Michael W. Doyle
  Office of Capital Program and Contracts Management
  (518) 471-5999
  Michael.Doyle@thruway.ny.gov

Or

- Andrew Trombley
  Office of Capital Program and Contracts Management
  (518) 436-3164
  Andrew.Trombley@thruway.ny.gov

For all technical or engineering related questions:

- Christine Wagner, P.E.
  Project Designer
  (518) 436-3184
  Christine.Wagner@thruway.ny.gov

- David Vosburgh, P.E.
  Structures Design Bureau Director
  (518) 436-2709
  David.Vosburgh@thruway.ny.gov

For more information about NYS Finance Law Sections 139-j and 139-k, please see the New York State Thruway Authority Guidelines for Lobbying included in this Proposal.
NEW YORK STATE
THRUWAY AUTHORITY

NOTICE TO BIDDERS

Sealed bids must be hand delivered, or delivered by first class mail, USPS Express or Priority Mail, or overnight delivery service (e.g., FedEx, UPS) to the New York State Thruway Authority Headquarters Building, at the following address only: New York State Thruway Authority, 200 Southern Boulevard Albany, NY 12209.

Sealed bids should not be sent or delivered to any other address or location, and the Authority is not responsible for any late deliveries or misdirected bids.

Regardless of the delivery method selected, all sealed bids must be delivered by 11:00 AM, on Wednesday, March 25, 2020, where they will be opened publicly and read aloud. Any bids sent or delivered to an address or location other than the one specified above, or received after this time, will not be accepted.

Contract TANY 20-3B / D214773 – Steel Repairs to Brookside Road Bridge at Milepost 74.17 in Ulster County in accordance with the Plans and Specifications.

Your bid must be secured with either a Bid Bond or a Bid Deposit. A Bid Bond must be in the amount of 5% of the total bid and must be on the Authority’s Bid Bond Form (TA-44117) which is included in the Proposal. A Bid Deposit must be a certified check or cashier’s check made payable to the New York State Thruway Authority in the amount of $40,000.00.

Plans, proposals, and information on how to download Contract Bid Data are available on the Authority’s Website at www.thruway.ny.gov.

SPECIAL NOTE

The New York State Thruway Authority has discontinued the practice of reproducing and furnishing full-size and half-size plans to Contractors after contract award. Contractors shall be responsible for their own hard copies of plans and proposals at no additional cost to the Authority.
New York State Can Help You Secure Surety Bonding

The NYS Surety Bond Assistance Program (NYSBAP) provides technical and financial assistance to help contractors secure surety bonding. Contractors may be eligible to receive a guarantee of up to 30% to secure a surety bond line, bid bond or a performance and payment bond on State projects. Training is also available to contractors requiring technical support on how to become bond-ready. For more information and to fill out a NYSBAP application, visit http://esd.ny.gov/BusinessPrograms/BondingAssistance.html or contact Ms. Huey-Min Chuang at Empire State Development at 212-803-3238 or BAP@esd.ny.gov.
SPECIAL NOTE
REQUEST FOR INFORMATION (RFI)

A request for information (RFI) is a written process used to clarify a detail, specification, or note in the contract documents, provide notification of a possible error or omission, or request a minor modification due to possible unforeseen issues that may occur during construction.

However, during the period between project advertisement and award of contract, the prospective Bidder/Contractor shall submit all RFIs to the appropriate “Designated Contact” via e-mail, as listed elsewhere in the Proposal. The prospective Bidder’s/Contractor’s RFI shall be forwarded to the designated contact. The Bidder Request for Information, Thruway Authority form TA-W44137, can now be found on the Authority’s website at: http://www.thruway.ny.gov/business/contractors/documents/ta-w44137.pdf

This form should be filled out as completely and accurately as possible, numbered sequentially, as may be necessary, and saved in pdf format. Any supporting information that may help describe the issue more clearly, as well as any suggestions or recommendations for possible resolution, should also be provided. The form once complete shall be forwarded to the designated contact as instructed in the form.

Responses by the Authority to RFI’s will be documented as Questions and Answers and posted for all bidders’ reference, under each respective project, on the Thruway Authority’s website at: http://www.thruway.ny.gov/business/contractors/documents/index.shtml

Questions and Answers posted to the Authorities internet page may not be memorialized as amendments. Thus, prospective bidders are advised to check the Thruway Authority’s website regularly before letting (or proposals are due), for Questions and Answers updates. Please be advised that RFI’s submitted the week of the letting may not be answered.

Any changes to the Contract documents that result from an RFI will be addressed via an amendment.

DEPOSIT REQUIRED $40,000.00  
COMPLETION DATE July 31, 2020
PRE-AWARD NOTICE

A Pre-Award Meeting has not been scheduled for this project. If a Pre-Award Meeting is deemed necessary, notice of the date and time will be provided.

To assist the Authority in its award process, the successful low bidder must furnish the following items upon request:

1. A current New York State Uniform Contracting Questionnaire (NYSUCQ) CCA-2 form must be on file;
2. A list of current contracts giving the firm or agency for which they are being performed, the name and phone number of someone therein familiar with the contractor's work, the contract amount, and percent of completion;
3. Pre-Award Project Schedule;
4. Documentation of the actions taken to comply with the Minority/Women’s Business Enterprise Utilization goals (Non-Federal), or Disadvantaged Business Enterprise goals (Federal) as defined in the Proposal;
5. A “Schedule of Participation of Minority/Women’s Business Enterprise” (Form TA-1022), or Disadvantaged Business Enterprise” (Form TA-1022F);
6. AAPHC-89 Approval to Subcontract.

Contract Documents will be supplied with the Authority’s notice to the successful low bidder and must be executed and returned to the Authority within ten (10) days of receipt.

If a Pre-Award Meeting is held, it is requested that the Project Superintendent be present. The Contractor should be prepared to provide, upon request by the Authority, information regarding, among other things, the following:

1. Use of subcontractors, including who they will be and what items of work they will perform;
2. Suppliers and manufacturers;
3. Traffic control and safety;
4. Any anticipated problems that could affect the progression of the project.

CONTRACT AWARD

The award process cannot begin until the executed Contract Documents have been returned to the Authority and the successful Low Bidder has provided acceptable documentation with regard to his actions taken to comply with the M/WBE goals of this Contract or DBE Goals for Federally Aided Contracts.
ALL BIDDERS

PRE-BID INSPECTION

The prospective bidder must have in its possession the Contract Plans/Proposal and a Work Permit for identification purposes when conducting a pre-bid inspection of the Thruway facility.

The prospective bidder shall inform the appropriate Division Point of Contact (listed below) prior to visiting the site and shall strictly comply with all instructions and requirements.

- **The New York State Thruway Authority Permit Application (TA-W5124)** and information on required insurance documentation is available at [http://www.thruway.ny.gov/business/realproperty/permits.html](http://www.thruway.ny.gov/business/realproperty/permits.html). The application along with insurance documentation shall be submitted to the appropriate Thruway Authority Division Permit Coordinator as indicated on page 2 of the application. The fee is waived for this Pre-Bid Inspection.

Provisions of Section 107-05, Equipment Safety Procedures, contained in the Contract Proposal shall apply to all Pre-Bid Inspectors and shall be strictly adhered to while performing the pre-bid inspection.

**PRECONSTRUCTION MEETING**

A Pre-Construction Meeting will be held prior to the start of construction. The time, date and location will be coordinated by the Division Construction Engineer who will provide this information to the successful low bidder as soon as it is available.

**WITHDRAWAL OF BID**

A Contractor may at any time, upon at least fifteen (15) days written notice, withdraw its bid on a date sixty (60) days after bid opening or thirty (30) days after the properly executed contract documents have all been received by the Authority, whichever is later. The bid bond, bid deposit, and/or performance bond shall remain in effect until such period of written notice has expired provided the contract has not been approved by the Office of the State Comptroller in the interim.

The Contractor and the Authority may agree in writing to extend the date upon which the bid may be withdrawn if the contract has not been approved by the Office of the State Comptroller.

WORK TO BE DONE

The following is a general description of the work to be done under this Contract. This list is intended to give the Contractor a general description of the work involved in this Contract and is not a complete listing of all work to be done. All work shall be done in accordance with the Contract Documents even though not specifically mentioned in this list.

Third Party Coordination:

- Coordinate with Utility owners to temporarily deenergize and lower overhead utility lines over south fascia of Brookside Road to perform the work.

WZTC Work on Brookside Road:

- Replace traffic control devices and temporary concrete barrier on Brookside Road.
- Setup work zone configuration on Brookside Road.
- Setup Brookside Road detour for critical operations (girder removal and girder replacement).
- Remove work zone traffic control at Brookside Road at conclusion of work.

WZTC Work on I-87 Northbound:

- Setup permanent left and right shoulder closures on I-87 Northbound.
- Setup temporary single lane closure, as needed to complete the work.
- Provide 20-minute slowdown for critical operations (girder removal and girder replacement).
- Remove work zone traffic control at I-87 Northbound at conclusion of work.

Brookside Road Bridge Repair Work:

- Remove and store pedestrian fence and bridge rail along south fascia, as necessary to complete the work.
- Remove existing deck over damaged girder.
- Remove damaged portion of girder and diaphragms.
- Perform heat straightening of remaining portion of damaged girder near pier 1.
- Erect new girder and diaphragms.
- Clean and paint structural steel in repair area.
- Place deck forms, lay rebar and cast concrete for deck in repair area.
- Provide conduits in south safety walk.
- Lay rebar and cast concrete for safety walk in repair area.
- Place rebar and cast concrete for concrete overlay.
- Place tack coat, joint adhesive and asphalt overlay.
- Apply protective sealant to safety walk concrete.
- Reset bridge rail and pedestrian fence.
SCHEDULE AND SUSPENSION OF WORK

The New York State Thruway is a limited access, high-speed, high-volume highway. Traffic shall be maintained in accordance with the *Manual on Uniform Traffic Control Devices (MUTCD)*, the *Work Zone Traffic Control Plans*, the *Standard Specifications* Section 619 and the following provisions:

A. **WORK ZONE TRAFFIC CONTROL**

1. Lane closures on the Thruway shall only be allowed in accordance with the traffic management table(s), available on the Thruway Authority website at [http://www.thruway.ny.gov/business/contractors/standard-sheets/index.shtml](http://www.thruway.ny.gov/business/contractors/standard-sheets/index.shtml), unless indicated otherwise in the contract documents. If more than one table is applicable to a work zone location, the most restrictive requirements shall be used. Traffic management tables do not guarantee lane closure availability; the requirements of Section B. *Work Restrictions* shall supersede these tables, when applicable.

2. Lane closures on the Thruway will be permitted for work site access, delivery of materials and equipment, and work operations. Personal vehicles will **NOT** be allowed to park along the Thruway or within lane closures on the Thruway at any time. During non-working hours, all equipment and materials shall be stored at least 30 feet from the edge of pavement (both mainline and ramps) or be protected by a physical barrier approved by the Engineer.

3. Lane closures will **NOT** be permitted during holiday periods or when unforeseen circumstances arise, as described in Section B. *Work Restrictions*, unless indicated otherwise in the contract documents.

4. Lane closures will **NOT** be permitted for the sole convenience of the Contractor. Lane closures will be permitted in order to protect traffic from an actual hazard, as determined by the Engineer.

5. Permanent lane closures will **NOT** be permitted for the duration of the contract.

6. Simultaneous closure of right and left shoulders will **NOT** be permitted unless indicated otherwise in the contract documents. Either right or left shoulder must remain clear and available through all work zones. The open shoulder shall not be used for the storage of vehicles, equipment, supplies or any other obstructions, or for any work activity.

7. Ramp closures will **NOT** be permitted, unless indicated otherwise in the contract documents. Access to interchanges, service areas and parking areas shall be maintained at all times.

8. Traffic will **NOT** be permitted to drive on milled pavement, unless indicated otherwise in the contract documents.

B. **WORK RESTRICTIONS**

1. **HOLIDAY PERIODS.** Lane closures will **NOT** be permitted during holiday periods, unless indicated otherwise in the contract documents. The Authority may permit work on Thruway facilities only if operations do not inhibit or distract traffic. Access to work sites from state and local roads will be permitted provided the municipality having jurisdiction for the road gives written permission. Holiday periods for this project shall be as follows:
2. Proposed lane closure schedules shall be submitted to the Engineer for review and approval at least one week in advance of the earliest closure.

3. The Contractor shall **NOT** be allowed to establish any lane closures during periods of inclement weather, wet or icy pavement, reduced visibility, traffic accident, emergency, or if the lane closure is causing excessive delay to the public. The Authority reserves the right to alter any lane closure and/or direct the Contractor to immediately remove a lane closure during such circumstances. The Authority shall be the sole judge of when conditions warrant these lane closure restrictions, and such restrictions will not entitle the Contractor to file a claim for additional compensation.

4. **WINTER SHUTDOWN.** A winter shutdown shall be in effect from 3:00 p.m. **November 15** to 6:00 a.m. **April 1**. During this period, the Contractor shall **NOT** be permitted to have lane closures. All temporary tape lines shall be removed, temporary concrete barrier shall be set in its winter shutdown location, and all traffic shall be re-established to its pre-construction configuration on permanent alignment. Mobilization for the following construction season may begin prior to **April 1** with permission from the Authority.

6. Work restrictions **may** be modified if:

   a. The Contractor has received permission through the Engineer, from the Division Director or designee, to progress construction operations contained entirely behind temporary concrete barrier. There shall be no hauling of materials in or out of the work site during restricted periods, and open lane availability requirements shall not be violated or compromised.

   b. The Contractor has received permission through the Engineer, from the Division Director or designee, for temporary modification of the lane availability restrictions for performance of specific construction operations for a specific time period.
NOTE: Such requests must be based on current traffic volumes which would permit the requested temporary modification with little probability of causing disruption or delay to the public.

The Contractor shall include full explanation of the benefits to the Public and to the Authority, which would accrue in granting a temporary waiver for performance of the specific operations including calculations for any credit that may be offered. A contingency plan for action to be taken, should an unexpected traffic backup occur, shall accompany this presentation and will be one prime consideration in evaluating the request.

c. The Contractor has received written authorization from the Division Director or designee to perform specific construction operations, violating the lane availability restrictions or other work restrictions during a specifically prohibited time period.

NOTE: The Contractor shall submit a written request to the Authority’s Division Director, with copy to the Engineer, for permission to perform specific construction operations at specific locations and times, including a detailed explanation of why the work cannot be performed in conformance with the contract. Such requests must be received at the Division Office at least one full week before the date of the requested variance, and at least two full weeks should granting the waiver require making notice to the public regarding potential disruptions and delays.

If written authorization to work is granted by the Authority, the Contractor shall be strictly limited to those operations approved in the authorization. In making application for a waiver, the Contractor agrees that any waiver of restrictions granted by the Authority is exclusively for the Authority’s benefit and purposes, and as such is subject to revocation without requirement for advance notice. Also, the disapproval of requests for waiver of contract requirements is not subject to administrative review or appeal under the contract.

C. GENERAL CONDITIONS

The Contract is to be completed on or before the specified completion date. If, for any reason, the Contractor fails to fulfill this obligation and requests an extension of time and the request is granted, the Authority, as a condition for extending the time of completion, shall retain the right to limit the Contractor’s hours and/or days of work and/or impose conditions under which the work shall be performed in order that the traffic may not be unduly inconvenienced.

All the required liability and property damage insurance with the limits stated in this Proposal shall be effective and shall be continued in force throughout the life of this Contract including the stated periods of the suspension of the work.

The Contractor shall consider the foregoing requirement when preparing its “Schedule of Operations”.

3 of 3
SPECIAL NOTE

The Contractor shall construct the required work zone traffic control as indicated on the plans within 14 days of award of the project. All existing work zone traffic control devices shall be returned to the division as indicated on the plans and in the proposal. The Contractor is prohibited from performing any other work on the project until May 18, 2020.
ADDITIONAL INSURED PARTIES

The following is a list of additional insured parties:

Ulster County
Town of New Paltz

NON-REVENUE PASS PLATES

Non-revenue pass plates will be furnished to the Contractor ONLY for projects that have work within a Thruway Ticketed System corridor area.

Non-revenue pass plates will be furnished to the Contractor for use between:

- Interchange 17 – Newburgh – Scranton – I-84 – NY Routes 17K & 300 – MP 60.10
- Interchange 18 – New Paltz – Poughkeepsie – NY Route 299 – MP 76.01

For all other work within Thruway project limits, the Contractor shall be responsible for any and all tolls charged to contractor owned vehicles with (or without) E-ZPass Transponders that pass through All Electronic Toll Collection or Cashless Tolling systems.

OTHER CONTRACTS

The Contractor will be required to coordinate work with other contractors and NYSTA maintenance forces. The following contracts have been let and may have work in progress during the duration of this contract:

<table>

The following contracts are anticipated to be let and may have work in progress during the duration of this contract:

DESCRIPTION

NONE

U-TURNS/CROS OVERS

The Contractor may be permitted to use official median openings for U-turns and crossovers with written authorization from Division Traffic Supervision. Official median openings are available at the following locations:

MP 76.85  MP 75.61  MP 72.78  MP 69.04

U-turns and crossovers shall not be permitted at toll plazas or on interchange ramps. In addition, tractor trailer combinations are prohibited from U-turns at any location on the Thruway system. These vehicles must exit the Thruway system and re-enter for all direction changes. U-turns may be permitted within a maintenance facility, however, with prior approval from both Division Traffic Supervision and the Thruway Maintenance Supervisor 2 for that facility. All applicable traffic laws must be followed.
The original paint coating applied to the Brookside Road Bridge at MP 74.17 contains lead, however, this bridge was cleaned and repainted under the following contracts:

- TANY 87-45BP, D211026, with a letting date of December 9, 1987 and
- TANY 98-11BP, D212491, with a letting date of June 24, 1998

TANY 87-45BP cleaned and painted the bridge as per the following items:

- 25570.038807 Maint Painting of Struc Steel (Alum Epoxy-Mastic, Self Prime) LS
- 25570.843207 Paint Structural Steel (Finish Coat) LS
- 25570.880607 Comm Blast Clean & Paint Steel (Alum Epoxy-Mastic, Self Prime) LS

TANY 98-11BP cleaned and painted the bridge as per the following items:

- 18570.150309 Class A Containment for Paint LS
- 25570.789109 Treat & Disp, Paint Rem. Waste LS
- 25570.798109 Comp. Paint Rem by Vac Cont Methods LS
- 25570.965209 Surf Prep & Coat. Application 3 Coat Organic Zinc Sys on Stl LS

After blast cleaning as per Item 25570.880607 under TANY 87-45BP and complete paint removal as per Item 25570.798109 under TANY 98-11BP, it is believed that only trace amounts of lead paint remain on the existing steel superstructure. As such, this Contract calls for disposal of paint waste under Item 571.04, Disposal of Non-Hazardous Industrial Solid Paint Waste.

The Contractor shall immediately notify the Engineer if the Contractor’s testing of paint waste as per Standard Specification Section 571 results in elevated levels of lead.
MANDATORY RESPONSIBILITY REVIEW

THIS IS A HIGHLY SPECIALIZED REPAIR CONTRACT REQUIRING SPECIAL SKILLS FOR REPAIR WORK THAT COULD AFFECT THE INTEGRITY OF THRUWAY INFRASTRUCTURE. THE CONTRACTOR MUST BE ABLE TO DEMONSTRATE EXTENSIVE QUALIFICATIONS AND EXPERIENCE WITH SIMILAR PROJECTS.

THERE WILL BE A MANDATORY RESPONSIBILITY REVIEW MEETING WITH THE APPARENT LOW BIDDER PRIOR TO AWARD, TO DETERMINE WHETHER THE CONTRACTOR HAS ADEQUATE EXPERTISE AND PRIOR EXPERIENCE WITH A VARIETY OF REPAIR METHODS INCLUDING GIRDER, DIAPHRAGM AND BEARING REPLACEMENT, HEAT STRAIGHTENING, WELDED REPAIRS, TEMPORARY SHORING, APPLICATION OF SPECIAL COATINGS, ETC. THE PURPOSE OF THE RESPONSIBILITY REVIEW MEETING IS TO ENSURE THAT THE BIDDER IS FULLY QUALIFIED TO PERFORM THIS SPECIALIZED WORK IN A RESPONSIBLE MANNER THAT WILL PROTECT THE PUBLIC INTEREST.
WORK ZONE TRAFFIC CONTROL ON LOCAL STREETS AND HIGHWAYS

The Contractor’s attention is directed to the fact that the price bid for the Work Zone Traffic Control items in this contract shall include the cost to maintain and protect local traffic crossing above/below the structures being rehabilitated.

During the bridge rehabilitation work, the Contractor shall use single lane closures on the local streets and highways to protect traffic.

The single lane closures on the local streets and highways shall be subject to the following restrictions:

1. Lane closures shall not be permitted unless there is active work on the structure above/below.

2. Lane closures shall be established and maintained in accordance with the Manual on Uniform Traffic Control Devices (current edition) and the appropriate NYSDOT work zone traffic control standard sheets.

3. The Contractor shall notify the following two weeks prior to commencing any work:

   Robert Lucchesi  
   New Paltz Police Department  
   (845) 255-1323

   Ulster County 911 Dispatch Center  
   (845) 338-1440

   Andrew Emrich  
   Ulster County Department of Public Works  
   (845) 340-3125

REVISIONS TO NYSDOT STANDARD SPECIFICATIONS
NEW YORK STATE THRUWAY AUTHORITY ADDENDUM
TO THE STANDARD SPECIFICATIONS

The Standard Specifications published by the New York State Department of Transportation shall form a part of the agreement. The dated edition that applies to this contract is provided on the front cover of the Proposal. All work contemplated under this contract is to be covered by, and be in conformance with, the Standard Specifications as modified by The New York State Thruway Authority Addendum (TA) to the Standard Specification Books.

The officially adopted Thruway Authority Addendum (TA) to the NYSDOT Standard Specification Books is available on the Thruway Authority website at:
http://www.thruway.ny.gov/business/addendum/index.html
The most recent version of the TA, prior to the project Letting Date, shall apply to this agreement.

All special notes bound in this proposal shall be incorporated. If a conflict exists between the special specifications and/or provisions set forth in this proposal and the specifications and/or provisions set forth in the New York State Department of Transportation’s Standard Specifications, those in the Proposal shall govern.
SPECIAL SPECIFICATIONS
The Contractor’s attention is directed to the special specification pay item formats used in this contract. Special specification pay items may be presented in two (2) different formats:

**Format 1:** Pay items for a special specification will have three (3) digits to the left of the decimal point and up to eight (8) digits to the right of the decimal. Spaces may appear in the third to sixth places after the decimal. The 7th and 8th digits to the right of the decimal will represent the origin of the specification.

**Format 2:** Pay items for a special specification will have three (3) digits to the left of the decimal point and up to eight (8) digits to the right of the decimal. Dashes may appear in the third to sixth places after the decimal. The 7th and 8th digits to the right of the decimal will represent the origin of the specification.

Where items in this contract appear in multiple formats, the formats shall be equated to each other as illustrated below:

<table>

</tbody>
</table>
ITEM 559.1696--25 - PROTECTIVE SEALING OF STRUCTURAL CONCRETE

1. DESCRIPTION:

1.01 Under this work the Contractor shall furnish and apply, in accordance with this specification, a protective sealer to concrete surfaces, at locations indicated on the plans or where directed by the Engineer.

2. MATERIALS:

2.01 The protective sealer used on concrete surfaces shall be one appearing on the Department’s Approved List and shall meet the requirements of the following subsection:

717-03 - Penetrating Type Protective Sealers

3. CONSTRUCTION DETAILS:

3.01 General. The Contractor shall provide the Engineer with the sealer Manufacturer’s written instructions for application and use, at least five (5) working days before the start of work. Only one (1) brand and specific type of sealer will be allowed for use on each individual element of a project (i.e. each pier, deck, abutment, etc.).

3.02 Surface Preparation.

1. New Concrete. All required surface texturing, and saw cut grooving, shall be completed before the surface is prepared. All concrete that is to be sealed shall air dry for fourteen (14) days after curing has been removed, or for the length of time specified in the manufacturer written instructions, whichever is longer. Also, concrete shall air dry for twenty-four (24) hours after curing and/or completion of saw cut grooving. If the concrete is subjected to rain or moisture from other project operations, the surface shall be allowed to dry for a minimum of forty-eight (48) hours, or for a length of time specified in the manufacturer’s specifications, whichever is longer, before the sealer is applied. After the drying period has ended, the concrete surface shall be lightly sand or shot blasted, followed by vacuum cleaning, to remove loose particles.

2. Existing Concrete. Concrete surfaces to be sealed shall be thoroughly cleaned by light sand or shot blasting, followed by vacuum cleaning, to remove loose particles. If the concrete is subjected to rain or moisture from other project operations, the surface will be allowed to air dry for a minimum of forty-eight (48) hours before the sealer is applied.

Care shall be taken while blast cleaning that all dirt is removed with minimal exposure of coarse aggregate. After cleaning, no blasting residue, laitance, curing compounds, standing water, oil, dirt or other foreign particles shall be present, which may prevent penetration or adhesion of the sealer. All surface preparation work shall be completed and approved by the Engineer, before sealer application can commence.

3.03 Weather Limitations. Sealer materials shall not be applied during wet weather conditions or, if in the opinion of the Engineer, adverse weather conditions are anticipated within twelve (12) hours of the completion of sealer application. Ambient and surface temperatures shall be a minimum of 40°F during application and until the sealed concrete is dry to the touch. Application by spray methods will not be permitted during windy conditions, if in the opinion of the Engineer unsatisfactory results will be obtained.
3. **CONSTRUCTION DETAILS:** (cont’d)

3.04 **Sealer Application.** The sealer shall be used as supplied by the Manufacturer without thinning or alteration, unless specifically required in the Manufacturer’s instructions. Thorough mixing of the sealer before and during its use shall be accomplished as recommended by the Manufacturer. Equipment for sealer application shall be clean of foreign materials and approved by the Engineer before use.

A minimum of two (2) coats of the sealer shall be applied to achieve uniform coverage. The total quantity of sealer applied by all coats shall be equal to the quantity required at the application rate specified in the Approved List. The second and each additional coat shall be applied perpendicular to the previous coat. Care shall be taken when applying each coat, such that running or puddling does not occur. Each coat shall be allowed to dry for a minimum of two (2) hours before the next coat is applied. The final coat shall be allowed to dry according to the manufacturer’s instructions, before the removal of maintenance and protection of traffic.

On sloping and vertical concrete surfaces, sealer application shall progress from bottom to top. Care shall be taken to ensure that the entire surface of the concrete is covered and all pores filled.

4. **METHOD OF MEASUREMENT:**

4.01 The quantity to be paid for will be the actual number of square feet of surface area that is provided with protective sealing.

5. **BASIS OF PAYMENT:**

5.01 The unit price bid per square feet shall include the cost of furnishing all labor, materials, and equipment necessary to satisfactorily complete the work.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

1. DESCRIPTION:

1.01 The work shall include repair of damage to structural steel components of primary and secondary structural members resulting from impact, corrosion loss, fatigue cracks, etc., including repairs to stringers, girders, floor beams, columns, bents, steel pier caps, diaphragms, cross frames, etc. as identified and as located on the plans or other contract documents.

1.02 General Requirements

A. All work must be performed in accordance with the New York State Steel Construction Manual (NYSSCM), with current addenda, except as modified herein.

B. All repairs to impact damaged structures must be done using the guidelines provided in the Federal Highway Administration Report No. FHWA-IF-99-004 Heat-Straightening Repairs of Damaged Steel Bridges, A Technical Guide and Manual of Practice, except as modified herein. This publication is available from:

   U. S. Department of Transportation
   Federal Highway Administration

   Bridge Office
   Office of Infrastructure
   Federal Highway Administration
   400-7th St. N.W.
   Washington, DC 20590

   OR

   In general, only flame straightening procedures may be used, as described in the above document unless otherwise modified by the Contract Documents. Exceptions may be made to allow hot mechanical straightening subject to approval of the Engineer. Cold mechanical straightening will not be allowed.

C. In general, the manual shielded metal arc welding (SMAW) process should be used for all repair welding. The flux cored arc welding process with external gas shielding or the submerged arc welding process may be used as appropriate, subject to approval of the Engineer, and subject to qualification as required by the NYS Steel Construction Manual.

D. Heating, including preheating, maintenance of interpass temperature, post-heating, flame straightening, etc. shall be controlled by the use of temperature indicating crayons. Crayons manufactured for 250°F, 400°F, 600°F, 1150°F and 1250°F shall be available at the work site. Any heating procedure that causes a portion of the steel to be heated in excess of 1250°F shall be considered destructive heating and shall be cause for repair or replacement of the steel at the Contractor’s expense.

E. All welding shall be performed by New York State certified welders, qualified for the position to be performed in the work.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

F. All new welds in tension areas of main members must be tested for soundness using the appropriate test method, as shown in the contract documents. Existing welds in tension areas; welds in compression areas of main members; base metal; and secondary members may be tested, as shown in the contract documents. Tests must be performed in accordance with the following specifications:

1. Radiographic inspection, when required, shall be performed in accordance with the provisions of Section 16 of the NYSSCM.

2. Ultrasonic testing, when required, shall be performed in accordance with the provisions of Section 17 of the NYSSCM.

3. Magnetic particle inspection, when required, must be performed in accordance with the provisions of Section 18 of the NYSSCM using the yoke technique, except that separate tests must be performed using both AC output current to inspect for surface discontinuities and half wave rectified DC output current to inspect for near surface discontinuities. The yoke must be capable of producing a field strength of 10 pounds minimum for alternating current and 40 pounds minimum for direct current at the maximum pole spacing to be used in the work.

4. Dye penetrant inspection, when required, must be performed in accordance with Section 19 of the NYSSCM.

1.03 Standards: Unless noted otherwise in this specification, the latest edition of the following standards and regulations form a part of this specification:

A. Current New York State Department of Transportation Standard Specifications, (US Customary Units), Construction and Materials, and as amended by NYSTA Addendum and all Special Notes contained in this contract’s Proposal Documents.

   • “Shop, Field and Maintenance Painting of Steel,” (SSPC-PA1)
   • “Measurement of Dry Paint Thickness with Magnetic Gauges,” (SSPC-PA2)
   • SSPC- Society for Protective Coatings, SSPC-SP 10, “Near White Metal Blast”
   • SSPC – Society for Protective Coatings, SSPC-SP 11, “Power Tool Cleaning to Bare Metal”
   • SSPC – Society for Protective Coatings, SSPC-SP 6, “Commercial Blast”

2. MATERIALS:

2.01 Materials for this work must conform to the designated subsections of the latest edition of the NYSDOT Standard Specifications, except as otherwise shown in the contract documents or otherwise described herein, as follows:

A. Structural Steel

   Two copies of certified mill test reports must be provided to the Engineer. The direction of rolling must be parallel to the direction of primary stress. Main member material subject to tensile stress must have a minimum Charpy V-notch impact strength of 15 ft. lbs. at 40°F, except as otherwise required by the contract documents.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

B. **High Strength Bolts, Nuts and Washers**

When installing galvanized fasteners, the galvanized nuts should be tapped out and should be lubricated prior to use. If the nut has not been waxed by the manufacturer or supplier, stick wax must be used under elements turned to prevent galling of the components. Unless specifically approved by the Authority, only the nut, and not the head, must be turned to tighten the fastener.

C. **Stainless Steel Connecting Products**

D. **Paint.**

Unless otherwise specified in the Contract Documents, all paint must be exterior grade, abrasion resistant, lead and chromate free, and compatible with the existing paint system. Further the paint and paint system must be selected from the latest NYSDOT Materials Bureau Approved List, and approved by the Engineer in the field. The Contractor shall provide the Engineer with two (2) copies of the manufacturer’s certification stating that the paint meets the above requirements, and that it is appropriate for the intended application. In addition, the Contractor must provide a written procedure prepared by the manufacturer describing the proper surface preparation, application and curing of the new paint system, plus any necessary inspection equipment as recommended by the paint manufacturer.

E. **Galvanizing**

F. **Anchor Bolts (Non-Stainless Steel)**

2.02 When the manual shielded metal arc welding (SMAW) process is used, it shall be done by careful low hydrogen practice, using properly dried E7016, E7018 or E7028 electrodes. All welding electrodes must conform to the requirements of the latest edition of AWS A5.1, *Specification for Mild Steel Covered Arc Welding Electrodes*. All welding shall be done with 5/32" diameter electrodes, except when the specification allows 3/16" diameter electrodes for welds made in the flat and horizontal positions. Electrodes smaller than 5/32" diameter will not be permitted in this work.

Properly dried electrodes shall be defined as follows: All SMAW electrodes shall be furnished in hermetically sealed containers and shall be dried at least two (2) hours, but not to exceed four (4) hours, between 450°F and 500°F before they are used. After drying, electrodes shall immediately be placed in a storage oven held continuously at 250°F until they are used in the work. One (1) oven may be used providing proper temperature controls are maintained. The time that the electrodes may be kept from the oven before use will be as described in Article 711 of the NYSSCM.

2.04 Preheat and interpass temperatures must be 400°F, except as otherwise noted or except as approved by the Engineer for specific applications. Heat measurements shall be made at least 3 inches both laterally and in advance of the welding.

3. **CONSTRUCTION DETAILS:**

3.01 The Contractor must conform to all Federal, State and Local laws, rules and regulations during performance of the work.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

3.02 All equipment to be used in the work must be in good operating condition and must be approved by the Engineer prior to placing it in service.

3.03 Certain specialty work may require specific personnel qualification, as identified in the contract documents.

3.04 Localized Cleaning of Existing Steel

A. Definitions for localized cleaning of existing steel:

1. Existing Paint and Paint Chips: Be advised that all existing paint and paint chips may contain lead, unless specifically stated otherwise in the Contract Documents. The following regulations shall apply as appropriate.

   b. New York State regulations for transport, treatment and disposal of hazardous waste include 6NYCRR, 364, 370 through 374 and 376.

2. Hazardous waste materials shall include existing paint, old paint chips, corrosion residue, and spent abrasives that result from blasting, power tool cleaning, and other cleaning and coating operations performed in the field, unless stated otherwise in the Contract Documents.

3. Commercial blast cleaning shall mean that all surfaces must be cleaned in accordance with standards and specifications for Commercial Blast Cleaning, SSPC-SP 6, as published by the Steel Structures Painting Council.

B. The Contractor must conform to all Federal, State and local laws, rules and regulations during performance of the work.

3.04 Localized Cleaning of Existing Steel

C. All equipment to be used in the work must be in good operating condition and must be approved by the Engineer prior to placing it in service.

D. All paint, dirt, corrosion, oil, grease and other foreign material must be removed within 6 inches of steel designated to be repaired or replaced, as identified in the Contract Documents, by commercial blast cleaning or other approved means prior to beginning the repair work.

   1. The cleaning method must be dry abrasive blasting using a closed cycle, recirculating, abrasive system with compressed air blast nozzle and abrasive, with a vacuum for dust, paint waste and abrasive recovery. Commercial blast cleaned surfaces must conform to SSPC-SP 6/SSPC Vis. 1-89 specifications. Alternately, vacuum power tool may be used in lieu of the dry abrasive blast system, providing the cleaned surfaces conform to SSPC-SP 11/SSPC Vis. 3 Specifications for Power Tool Cleaning to Bare Metal.

   2. All abrasives shall be free of corrosion producing contaminants, oil, grease, soluble salts, or other deleterious contaminants. Silica sand will not be allowed for blast cleaning purposes. The abrasive must be of such size as to produce a uniform surface profile that is suitable for the application of the specified paint. The abrasive may be recycled a maximum of five (5) times.
3. The Contractor may select the type of abrasive material providing all of the above requirements are met.

4. The vacuum blast cleaning must remove all existing coatings; capture a minimum of 95% of the abrasive; recycle the abrasive; produce a clean surface in accordance with this specification; and meet current EPA regulations.

5. Potential hazardous waste generated during cleaning operations shall be collected and stored in re-sealable, 55 gallon barrels. The barrels shall be properly labeled indicating “Possible Lead Content” in accordance with Federal DOT regulations. Once filled, the Contractor shall transport the filled barrels to the designated storage facility established by the Thruway Authority. The Contractor shall notify the Engineer once a barrel is full or if no more waste will be added to a barrel. The Contractor shall officially record the amount of waste generated. The Thruway Authority will arrange for transportation and disposal of the waste from that location under the provisions of a separate contract.

3.05 The Contractor must submit a complete description of their proposed plans and procedures for accomplishing the work shown on the Contract Documents to the Authority for prior review and approval for each repair to be made. The submittal must be prepared on full size drawings as defined by the NYS Steel Construction Manual in accordance with the above specifications. Once approved, the Contractor shall not deviate from same without specific approval of the Engineer. All drawing submittals must be made in accordance with the shop drawing submittal procedure defined in this contract. These drawings must show specific information, including:

A. The existing condition of the damaged members;
B. The location of paint or coating removal;
C. Initial nondestructive tests to be performed, if required;
D. Lifting and temporary support details, if applicable;
E. Details of components to be straightened, if applicable;
F. Details of components to be replaced, if applicable;
G. Welding processes and welding procedure specifications to be used, if applicable;
H. Details for complete penetration groove welding, or partial penetration groove welding, if applicable, including the Contractor’s preferred joint designation;
I. Final nondestructive tests;
J. Final protective coatings;
K. For repair of impact damaged structures, details of heating procedures, including areas to be heated and method of heating must be shown;
L. For impact damaged structures, or when required by the contract documents, the proposed repair drawings must be signed by a Professional Engineer licensed in New York State, unless this requirement is excluded in the plans or by special note.

3.06 Perform general repairs to the structural steel as located and/or as shown in the contract documents and on the approved repair drawings.

3.07 Repair Tolerances

A. The final straightness, tilt of flange, web flatness, etc., of the damaged member must conform to the provisions of Section 12, Dimensional Tolerances, of the New York State Steel Construction Manual, except at specific locations such as points of impact, web punctures, etc., these tolerances may be exceeded subject to approval of the Engineer.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

B. Scrapes and gouges in components of steel members may be repaired by grinding to a slope of 1 on 10, and blending in smoothly to adjacent base metal, providing:

1. The thickness of the material is not reduced by more than 20% of the original nominal thickness.

2. The width of the flange or cover plate is not reduced by more than 5% of the original nominal width.

3. The gouge does not reduce the nominal cross sectional area of the component by more than 5% of the original nominal cross section. A component is defined as a web or flange of a plate girder, a web or flange of a rolled beam girder, a cover plate exclusive of welds, a leg of an angle, etc.

C. Scrapes and gouges that exceed the above limits must be repaired using an approved procedure similar to the following:

1. Prepare the surface by grinding.

2. Weld with approved procedures to completely fill the gouge.

3. Grind flush and smooth with the adjacent base metal.

4. Ultrasonic test the repair weld.

D. All final grinding must be parallel to the direction of applied stress in the member unless the surface roughness meets or exceeds an ANSI 125 finish.

3.08 The Contractor shall employ the services of qualified personnel to perform inspection and testing of the work. The type of inspection and the location where it is required shall be as shown in the Contract Documents. The following are considered acceptable qualifications:

A. Visual Inspection

1. Current certification as an AWS Certified Welding Inspector (CWI) in accordance with the provisions of AWS QC1, Standard and Guide for Qualification and Certification of Welding Inspectors, or

2. Current qualification by the Canadian Welding Bureau (CWB) to the requirements of the Canadian Standard Association (CSA) Standard W178.2, Certification of Welding Inspectors, or

3. An Engineer or technician who, by training or experience, or both, in metals fabrication, inspection and testing, is competent to perform inspection of the work, as determined by the Engineer.

B. Nondestructive Testing

1. Personnel performing dye penetrant, magnetic particle or radiographic inspection shall be qualified in accordance with the current edition of the American Society for Nondestructive Testing Recommended Practice No. SNT-TC-1A. Only individuals qualified for NDT Level I and working under the supervision of an individual qualified to NDT Level II, or an individual qualified for NDT Level II may perform nondestructive testing.
ITEM 564.8501XX25 – REPAIR OF STRUCTURAL STEEL (LS FOR EACH STRUCTURE)

2. Personnel performing ultrasonic testing must be certified by tests administered by NYSDOT.

3. Personnel performing nondestructive tests need not be qualified and certified under the provisions of AWS QC1.

C. Reports. Discontinuities found as a result of visual inspection or nondestructive testing should be located, evaluated and reported in accordance with the appropriate sections of the NYSSCM upon completion of the inspection. Indications of cracks must also be reported to a representative of the Authority immediately. Two (2) copies of the report should be submitted to the Engineer.

3.09 Recoat the entire area that was previously cleaned or damaged during repair operations as follows:

A. Surface preparation and recoating must be done as described in the manufacturer’s written procedure unless otherwise required by the contract documents.

B. All recoating must be done in a neat, workmanlike manner with no runs, sags or drips.

C. Recoating systems requiring multiple coats must have a different color for each coat, with the final coat matching the color of the existing coating system.

4. METHOD OF MEASUREMENT:

4.01 LUMP SUM: Measurement will be taken as the aggregate cost of each steel repair made based on the agreed price or force account summary submitted by the contractor and approved by the Engineer.

5. BASIS OF PAYMENT:

5.01 The unit price bid for each repair location, or each structure repaired, shall include the cost of all labor, materials, equipment and access necessary to perform all initial cleaning, repair and testing.

5.02 No payment will be made for repair of, or replacement of damaged material which was made necessary due to the Contractor’s operations.

5.03 All costs associated with cleaning, painting, coating repair, and/or containment shall be included in this item unless otherwise indicated on the plans.

5.04 The lump sum price bid for each structure repaired shall include the cost of all labor, materials, equipment and access necessary to perform all initial cleaning, repairs and testing. Payment will be made at the lump sum bid price for each structure as follows:

Twenty-five (25%) percent upon completion of paint removal and initial non-destructive testing;
Fifty (50%) percent upon completion of necessary steel repairs;
Twenty-five (25%) percent upon final non-destructive testing and application of protective coatings.
ITEM 570.3335--25 - LOCALIZED CLEANING AND PAINTING AT STEEL REPAIRS

1. DESCRIPTION:

1.01 The work shall include all cleaning, surface preparation and painting or repainting of localized areas of steel at locations designated on the plans to be repaired or replaced, or as directed by the Engineer.

1.02 All work must be performed in accordance with the applicable NYSDOT Standard Specifications, except as modified herein.

2. MATERIALS:

2.01 The paint system shall be either a zinc rich moisture cured urethane primer, micaceous iron oxide filled moisture cured urethane intermediate coat and moisture cured urethane finish coat or an organic zinc rich primer, epoxy intermediate coat and urethane finish coat. The primer shall meet the requirements of AASHTO Class B, slip coefficient of not less than 0.50. The Contractor shall provide the Engineer with two copies of the manufacturer’s certification stating that the paint meets the above requirements.

The color of each coat shall contrast with the other new coats. The finish coat shall be as identified in the Painting Schedule. The Contractor shall submit color samples for approval prior to ordering material.

2.02 Acceptable moisture cure paint systems are manufactured by Wasser and Sherwin Williams. Acceptable zinc-epoxy-urethane systems are manufactured by Carboline, Sherwin Williams and PPG.

2.03 Abrasives, if used, shall be free of corrosion producing contaminants, oil, grease, soluble salts or other deleterious contaminants. Silica sand shall not be used. The abrasive must be of such size as to produce a uniform surface profile that is suitable for the application of the specified paint. The type of abrasive material may be selected by the Contractor providing all of the above requirements are met.

3. CONSTRUCTION DETAILS:

3.01 The Contractor shall conform to all Federal, State and local laws, rules and regulations during performance of the work.

3.02 All equipment to be used in the work must be in good operating condition and must be approved by the Engineer prior to placing it in service.

3.03 Paint Removal – Non Faying Surfaces

A. All paint must be removed from within 4 inches of each steel repair location. Paint removal method shall be by 1) vacuum blast cleaning (dry abrasive blast cleaning using a closed cycle, recirculating abrasive system with compressed air blast nozzle and abrasive, with a vacuum for dust, paint and abrasive recovery) or 2) power tool cleaning using vacuum shrouded power tools. Vacuum blast cleaned surfaces shall conform to SSPC-SP6 Commercial Blast Cleaning and vacuum power tool cleaned surfaces shall conform to SSPC-SP11 Power Tool Cleaning to Bare Metal.
3. CONSTRUCTION DETAILS: (cont’d)

3.03 Paint Removal – Non Faying Surfaces

B. One of the Environmental Protection items shall be used to collect any paint chips or abrasives that are not captured by the vacuum recovery system.

3.04 Surface Preparation And Priming – Faying Surfaces

A. All paint must be removed on the existing steel surface for each steel repair location plus 4 inches beyond the limits of the new steel. New steel surfaces shall be blast cleaned to near white metal (SSPC-SP10) and primed with a zinc rich primer. The surfaces of existing steel that will be in contact with new steel shall be: 1) blast cleaned to near white metal (SSPC-SP10) by vacuum blast cleaning or 2) power tool cleaned to bare metal (SSPC-SP11) using vacuum shrouded power tools. Environmental Protection items shall be used appropriately during surface preparation. The surfaces shall then be primed with a zinc rich primer. No additional coats shall be applied to faying surfaces.

3.05 Recleaning And Painting Non-Faying Surfaces Of Existing Steel

A. After installation of new steel, non-faying surfaces of the new steel and adjacent non-faying surfaces of the existing steel from which paint had been removed shall be cleaned as necessary to conform to SSPC-SP6 (Commercial Blast) or SSPC-SP11 (Power Tool Cleaning to Bare Metal). A three coat paint system shall be applied to the surfaces.

3.06 All coatings shall be applied at dry film thicknesses recommended by the manufacturer. All coating shall be done in a neat, workmanlike manner with no runs, sags or drips.

4. METHOD OF MEASUREMENT:

4.01 Payment will be made at the lump sum price bid.

5. BASIS OF PAYMENT:

5.01 The lump sum price bid shall include the cost of all labor, materials, equipment, and access necessary to complete the cleaning, preparation and painting work required, unless otherwise specified in the Contract documents.

5.02 No payment will be made for repair of, or replacement of coating systems or other damaged material which was made necessary due to the Contractor's operations.

5.03 Environmental Protection and Treatment/Disposal of Paint Removal Waste shall be paid for under separate items.
1. DESCRIPTION:

1.01 This work shall consist of near white blast cleaning and applying a three coat paint system to structural steel parts and a finish coat to the exposed face and bottom flange of the fascia. All painting work, except field touch up and bolt painting, shall be done in the shop.

1.02 Definitions

A. Painting shall include the surface preparation and application of coatings to metal surfaces.

B. Blast Cleaning shall mean the preparation of all surfaces to be painted in accordance with standards and specifications for "Near White Blast Cleaning" as published by the Society for Protective Coatings (SSPC-SP10).

C. Paint shall be as specified in the contract documents.

D. Surface Preparation shall mean the cleaning and/or pretreating of surfaces to be painted as specified in the contract documents and shall include the removal of all debris.

E. Repainting shall mean the removal of the entire existing coating, preparing the surface, and recoating all steel.

F. SSPC - Surface Preparation (SP). Specifications referred to herein, may be obtained through SSPC, 40 24th Street, Pittsburgh, PA 15222.

G. Environmental Protection shall mean the containment, collection and removal of old paint chips, corrosion residues, spent abrasives and newly applied paint (herein after referred to as waste materials) that result from blasting and other cleaning and coating operations performed in the field.

H. Inaccessibility shall mean the inability to use a standard application method because of restrictions such as reduced clearance, insufficient hand space or too narrow an opening. It shall not mean that the element is too high or that the rigging or scaffolding will be difficult. The Engineer will make a final determination as to what will be deemed inaccessible.

2. MATERIALS:

2.01 All equipment used for cleaning and painting shall meet the requirements as specified in the contract documents.

2.02 All coatings shall be as specified in the contract documents and shall be applied according to same, or the manufacturer's recommendations, whichever is more restrictive. Particular attention shall be paid to recoat requirements.

2.03 The abrasive selected shall be identified by the Contractor and approved by the Engineer prior to use. The abrasive shall be certified to be of fine to extra fine gradation to produce a minimum blast profile of at least 1.0 mils. The abrasive shall have a sharp, hard cutting surface and shall be dry and free of oil or soluble salt containments. Silica sand and/or steel shot shall not be used. If blast cleaning is done by steel abrasive, the abrasive mix shall contain steel grit. The periodic replenishing mix shall consist of at least 50% steel grit.

2.04 Material for prime coat shall be self-curing, inorganic zinc. The material shall be selected from the "Prequalified Coating Material List".
2.05 Material for the second and third coat shall be a polyamide epoxy selected from the "Pre Qualified Coating Material List". The color of the third coat shall be sage green unless otherwise indicated in the contract documents. Munsell # 7.5GY5/4

2.06 Material for the finish coat shall be a aliphatic polyurethane selected from the "Prequalified Coating Material List". The color shall be sage green unless otherwise indicated in the contract documents. Munsell # 7.5GY5/4

2.07 The inorganic zinc primer and second coat of epoxy shall be a different color from each other. The color of the primer and second coat, will be the Contractor's option. However, they shall contrast with the underlying substrate. **The third coat shall be pigmented sage green.** The color change between subsequent coats shall be as approved by the Engineer prior to ordering the material. The coating colors shall be such that they can be completely hidden by a single application, applied at the minimum specified dry film thickness. Field tinting shall not be allowed.

2.08 All material and equipment used for environmental protection shall be approved by the Engineer. Any material or equipment that is determined to be deficient or that becomes damaged to the extent that it no longer fulfills the requirements of this specification shall be replaced or repaired to the satisfaction of the Engineer, at the Contractor's expense.

2.09 All material shall be delivered to the site in sealed, original, labeled containers and stored in accordance with the manufacturer’s recommendations. At no time shall the shelf life of the coating material be exceeded.

2.10 The Contractor shall provide SDS Safety Data Sheets to the Engineer for all materials used at the job site. The Contractor shall also supply the Engineer with the manufacturer's current technical data for the paint furnished.

3. **CONSTRUCTION DETAILS:**

3.01 At least 5 working days prior to the start of work, the Contractor shall provide the Engineer with a painting schedule fully delineating a schedule of operations and one copy of the paint manufacturer's current technical data for the paint furnished. In addition, the contractor will provide the Engineer with a written statement from the paint supplier identifying recoat requirements. Instructions, suggestions and precautions contained in the data sheets shall be followed. If the manufacturer's technical data contradicts the provisions of these specifications, the Engineer will be notified by the Contractor and the Engineer will issue a determination on the procedures to follow. The schedule shall be in accordance with these specifications and the manufacturer’s application and recoat recommendations.

3.02 No changes to the coating schedule or system will be permitted without the express written approval of the Chief Engineer, Engineering Services.

3.03 **Surface Preparation.** Abrasive materials for blast cleaning operations may be selected by the Contractor, except that they shall be approved by the Engineer before the start of work. All abrasives shall be free of corrosion producing contaminants and also free of oil, grease, soluble salts or other deleterious contaminants. Silica sand and/or steel shot will not be allowed for blast cleaning purposes.

All blast profiles shall be 1 to 3 mils or as recommended by the coating manufacturer. The profile depth shall be determined by gauging the profile as transferred onto the appropriate replica tape. Visually, the blast cleaned surface shall conform reasonably to the Keane Tator surface profile comparator for the abrasive utilized.
ITEM 572.9201nn25 – COATING SYSTEM FOR NEW STRUCTURAL STEEL (SHOP APPLICATION)

All metal surfaces to be coated shall receive Near White Blast Cleaning as defined in SSPC SP 10. The blast cleaned surfaces shall conform of SSPC Vis 1.

Where oil and grease are present, these shall be removed in accordance with SSPC SP 1 Solvent Cleaning. This cleaning shall be performed prior to blasting. If contamination remains after blasting, the surface shall be re-cleaned with solvent.

All cleaned steel surfaces shall be inspected by and approved by the Engineer or Inspector prior to the application of coatings. Surfaces which do not meet these specification requirements as determined by the Engineer or Inspector, shall be re-cleaned at the Contractor's expense until the surfaces meet the specification requirements and are approved by the Engineer or Inspector.

3.04 Mixing Coatings. All coatings shall be thoroughly mixed prior to application. Mechanical mixers shall be used to thoroughly disperse any settled pigment or solids. Hand mixing or boxing shall not be allowed. The zinc-rich primer mixture shall be strained through a 30-60 mesh screen to remove large particles.

3.05 Solvent Restrictions. No reducing or thinning of coatings, by the use of solvents or other material shall be allowed unless all of the following are met:

- recommended by the manufacturer
- done in strict compliance with the manufacturer's instructions
- approved by the Engineer
- mixed in the presence of the Engineer or Inspector

Only the type and quantity of thinner/reducer recommended by the manufacturer shall be used. Painters shall not carry, or in any other way possess or have access to, containers of solvent when painting.

The quantity of solvent permitted on the job site shall be only the reasonable amount necessary for cleaning equipment, wiping dirt and grease from surfaces to be coated and for cleaning spatters.

All solvents used for cleaning operations shall conform to all applicable Federal, State and local laws, regulations or codes. Special attention shall be paid to volatile organic compound requirements.

Unauthorized thinning/reducing shall result in rejection and the coating shall be removed and the surface repainted in conformance with the specifications and to the satisfaction of the Engineer, at the Contractor's expense.

3.06 Coating Application Methods. All coatings shall be applied in a neat and workmanlike manner. Coatings shall be applied uniformly and shall be free of runs, sags, drips, ridges or other defects. Paint may be applied by brushes, or spray, or a combination of these methods as specified in the contract documents or as approved by the Engineer. Spraying shall be required for the application of the inorganic zinc primer. Rolling shall not be allowed.

Hand Brushing. The coating, when applied with brushes shall be so manipulated by the brush as to produce a uniform, even coating. When applying a coating to a previously coated surface, strokes should be made perpendicular to those of the receiving surface to insure adequate anchorage. Brushes shall be of good quality and the length of the exposed bristle shall be equal to or greater than the width of the brush.

On those areas which are inaccessible to brushes, the coating shall be applied by the use of spray equipment, or daubers, or sheepskins, as approved by the Engineer.
Spraying. Spray equipment shall be capable of applying paint in a fine, even spray so as to produce a uniform film. Spray equipment shall be as recommended by the coating manufacturer. Paint containers for spray applications shall be equipped with a mechanical agitator so the mixture is in motion throughout the application period.

Spray coating shall be done by experienced and qualified painters. Painters shall apply material in a manner that promotes uniform coverage and prevents discontinuity of the applied coating film. The spray gun shall be moved uniformly across and perpendicular to the receiving surface. To insure a uniform coating, each spray pass should lap the other by 50%. Any sags, drips, air holes or other film defects shall be immediately corrected by hand brushing.

3.07 Termination of Coating Operations. The Engineer is empowered to terminate coating operations, temporarily or permanently, if the Engineer determines that any of the following conditions exist:

A. Satisfactory results are not being obtained.

B. The measured dry film thickness is not within the required range.

C. Areas not specifically designated to be coated are likely to be or are being affected by the application method.

D. The application method is causing damage to public or private property.

If the Engineer permanently terminates coating operations, he may do so by verbal order but he shall notify the Contractor, in writing of his reasons for termination. The Engineer may temporarily terminate coating operations by verbal orders. Coating operations which are terminated due to damage to public or private property shall not be resumed until the Contractor takes appropriate measures to protect such property and demonstrates to the Engineer's satisfaction that such property damage will not reoccur.

If a particular method of coating operation is permanently terminated, the Contractor may apply the coating in accordance with another approved method. No extra compensation will be paid for the substitution of another method of application.

3.08 Stripe Painting. Stripe painting over the cured inorganic zinc primer with epoxy will be required on the entire surface of the following items: all welds, rivets, bolts, nuts, and edges of plates, angles, lattice pieces or other shapes and corners and crevices. These surfaces shall be "striped" before the full coat is applied. Surfaces to be "striped" should be coated after the steel has been cleaned and accepted. All stripe painting will be performed using a brush only. No other method of paint application will be allowed for stripe painting. The paint shall be worked into all joints and open spaces. Care shall be taken to ensure that the coating remains properly mixed/agitated during striping operations.

Where it is felt that a long drying period of the stripe coating is necessary, the full coat of epoxy shall be applied, allowed to dry, and the stripe coat then applied. Tinting of the stripe coat is required to promote contrast.

3.09 No coating shall begin until cleaned steel surfaces have been inspected and approved by the Engineer or Inspector.

3.10 The coating of metal surfaces shall include, but not be limited to, the following:

- The proper preparation of all surfaces;
- The application, protection and curing of the coatings;
ITEM 572.9201nn25 – COATING SYSTEM FOR NEW STRUCTURAL STEEL (SHOP APPLICATION)

- The protection from spatter or spillage of pedestrian, vehicular, marine or other traffic upon, beneath or adjacent to the coated surfaces. Any tarps or shrouds deemed necessary by the Engineer for environmental ground or water protection shall be supplied and paid for under this item;

- The protection against disfigurement of all portions of bridges and other structures as well as highway appurtenances. Disfigurement which may be caused by abrading, scoring, spattering, over-spraying, splashing and smirching of coatings or cleaning materials;

- The prevention of spillage of any pollutants into any waterway or body of water;

- The supplying of all equipment, tools, tackle, scaffolding, labor and materials necessary to complete the entire work.

3.11 The application of subsequent coatings shall not begin until the receiving surfaces have been cleaned and primed. All receiving surfaces shall be clean and dry. If, after the original cleaning and priming, and before application of a subsequent coat of paint should the receiving surfaces become dirty in any manner, they shall be cleaned again by a method allowed by the contract documents. The actual method to be used shall be approved by the Engineer.

3.12 Metal surfaces to which unauthorized coatings have been applied and those surfaces not coated in accordance with the contract documents shall be re-cleaned of those unauthorized coatings and recoated in accordance with these specifications and to the satisfaction of the Engineer.

3.13 On surfaces coated with primer, the subsequent coats shall be applied according to these specifications. Steel surfaces not so coated shall be re-cleaned and recoated at the contractor's expense.

3.14 Coating requirements for structural steel members embedded in, partially embedded in, or in contact with: cast-in-place, or pneumatically projected concrete are as follows:

A. Fully embedded steel, defined as a steel member completely surrounded by concrete, shall not have a second, third or finish coat applied.

B. Partially embedded steel, defined as a steel member with a portion fully surrounded by concrete, shall have its exposed surfaces coated as required by the contract documents.

C. A steel member, or portion of a steel member, neither fully, nor partially embedded, but still in contact with concrete shall have all its surfaces coated unless otherwise required by the contract documents.

3.15 The following items shall not receive a prime coat. Bolts, nuts and washers to be used for field erection.

3.16 Metal to metal contact surfaces shall be prime coated only. The primer used shall provide a minimum slip coefficient of 0.50 (AASHTO Class B Surface).

3.17 Machine finished surfaces shall be protectively treated in accordance with subsection 1304, Protective Coating for Machined Surfaces, of the New York State Steel Construction Manual.

3.18 Structural steel which is to be welded, shall not be coated until all welding is complete. If welding is to be done in the shop the welds shall be cleaned then coated as required by the contract documents. Steel which is to be field welded shall be left uncoated for a minimum of three inches from the weld area, except for the top flanges of all stringers to be embedded in concrete which shall have a mist coat of 0.75 to 1.0 mils of primer applied.
3.19 After the Engineer has approved the preparation in each area, all coatings shall be applied without runs, sags or other objectionable properties to that prepared steel surface.

Prior to application of the polyamide epoxy coating to the inorganic zinc primer, a mist coat (2-3 mils WFT) of the second epoxy coat which has been thinned 10-30% shall be applied. The solvent from this mist coat shall be allowed to flash off prior to application of the full build epoxy second coat.

The total dry film thickness of all coating applications shall be as indicated below.

<table>
<thead>
<tr>
<th>Coating</th>
<th>Thickness</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inorganic Zinc Primer</td>
<td>2 to 3 mils</td>
</tr>
<tr>
<td>Epoxy Second Coat</td>
<td>4 to 6 mils</td>
</tr>
<tr>
<td>Epoxy Third Coat (Sage Green)</td>
<td>4 to 6 mils</td>
</tr>
<tr>
<td>Polyurethane Finish Coat (Sage Green)</td>
<td>3 to 6 mils</td>
</tr>
</tbody>
</table>

On surfaces receiving a polyurethane finish coat, the total dry film thickness shall not be less than 13 mils or exceed 21 mils. On surfaces not receiving a finish coat, the total dry film thickness shall not be less than 10 mils or exceed 15 mils.

The dry film thickness specified above will be achieved prior to acceptance of the work, regardless of the number of applications required.

The shop application of coatings except the stripe coats shall be applied by spraying. Field touch up work and bolt painting shall be by brush only, except in areas where spraying may be used with prior approval of the Engineer.

The Engineer will take into consideration the location of painting operations, traffic volume, direction and velocity of wind, and adequacy of the Contractor's shrouding scheme in determining whether spray equipment may be used. **Under no circumstances will spraying be allowed over roadways.** When spray equipment is used shrouding will be required. When in the judgment of the Engineer, the Contractor does not adequately provide for the protection of traffic, environment and property, spray application will not be allowed.

Any primer applied to an area where the preparation has not been approved shall be removed by Blast Cleaning in accordance with SSPC-SP-10 and when the cleaning is accepted it shall be reapplied in accordance with the specification at no additional cost to the Authority.

The inorganic zinc shall be applied and over coated in accordance with all manufacturers’ recommendations, including temperature and humidity.

The polyamide epoxy shall not be applied when the air or steel temperature is below 50 °F or expected to drop below 50 °F. The coatings shall not be applied when the relative humidity is above 85%, or when the steel temperature is less than 5 °F above the dew point.

3.20 After the final coat of polyamide epoxy has cured and the specified minimum dry film thickness has been achieved, a finish coat of aliphatic polyurethane shall be applied to specific areas as designated in the Contract Documents. This finish coat shall be applied yielding a dry film of not less than 3 mils.

3.21 The finish coat of polyurethane shall not be applied when the air or steel temperature is below 50 °F or expected to drop below 50 °F before recoat. The polyurethane shall not be applied when the relative humidity is above 85%, or when the steel temperature is less than 5 °F above the dew point. The finish coat shall be applied within 7 days of the last polyamide epoxy coat.
3.22 All coat(s) of paint shall be applied to the receiving surface in conformance with the manufacturers recommended schedule for recoating. If the manufacturer's recoating recommendations are not complied with, solvent wipe, brush off blasting in accordance with SSPC-SP1 or SSPC-SP7 will be required.

3.23 **Field Painting.** The only field work allowed to be done under this item is touch-up work after all steel erection and all concrete placement has been completed.

The party responsible for shop painting shall supply the Contractor with an adequate amount of sage green epoxy and polyurethane to be used for field touch-up. This shall be from the same batch as that applied to the steel members.

**Abrasive Metering Valves.** Prior to the start of abrasive blasting, the Contractor shall demonstrate to the satisfaction of the Engineer that on each operating nozzle, a working metering valve is in place and is functioning properly. During blasting operations, each valve shall be adjusted to produce the minimum amount of abrasive and dust.

All the requirements of this specification shall apply to field painted material with the following modifications:

A. Bolt heads, washers, nuts, bolt thread extensions, and other miscellaneous steel surfaces not painted in the shop (such as splice plates, gusset plates, etc.), shall be cleaned and painted after the bolts have been installed and accepted.

B. Cleaning shall be done in accordance with the requirements of SSPC-SP1, Solvent Cleaning, and SSPC-SP2 Hand Tool Cleaning.

C. Hand tool cleaning shall be limited to hand wire brushing, hand abrading or other similar non-impact methods.

D. No field touch up with inorganic zinc primer shall be required, however, the second and third coat of polyamide epoxy and finish coat of polyurethane (where required) shall be applied.

E. All waste materials shall be disposed of in accordance with all applicable local, state or federal law, regulation or codes.

Application shall be made by brush only, except in areas where spraying may be used with prior approval of the Engineer. Dry film thickness requirements of this item shall apply.

All damage to the paint system shall be corrected by the Contractor in accordance with the requirements of this specification and to the satisfaction of the Engineer at no additional cost to the Authority.

Upon completion of all coating operations, the Contractor is required to stencil on the inside fascia girder, at the beginning approach span, near the abutment, in six inch high block letters, the month and year that the structure was painted. (This may be done in the shop or in the field.)

3.24 Whenever a structure spans over a railroad, covers shall be placed and maintained in accordance with NYSDOT Standard Specification 105-09, Work Affecting Railroads.
4. **METHOD OF MEASUREMENT:**

4.01 Payment will be made at the lump sum price bid.

5. **BASIS OF PAYMENT:**

5.01 The lump sum price bid shall include the cost of all labor, materials and equipment necessary to complete the work. All work shall be done in a manner satisfactory to the Engineer.

5.02 For the purpose of progress payments, the lump sum price bid for the item shall be apportioned as noted below:

A. Eighty percent (80%) of the lump sum price will be authorized for payment upon delivery and storage of properly painted structural steel to the project site. Shop painted steel will be considered properly painted only if accompanied by the Thruway inspector's written certification that the steel delivered as part of any single delivery was painted in accordance with the requirements of this item.

B. Ten percent (10%) of the lump sum price will be authorized for payment upon the completion of cleaning and painting all bolt heads, washers, nuts, and bolt thread extensions.

C. The remainder will be authorized for payment after all touch-up work is completed.

Progress payments may be made within each stage and shall be computed as the ratio of the length of structure satisfactorily completed to the entire structure. Under no circumstances will the percentage payment for any stage exceed the payment percentages noted above.

The Contractor shall delineate each area to be cleaned and coated during each day's work. The Engineer shall approve the cleaning operations in this area prior to application of each coat. Any residue beyond that allowed by the pictorial standards shall be cause for rejection of the cleaning. Any areas cleaned outside the designated area shall be re-cleaned when the area is delineated for cleaning, regardless of elapsed time or surface condition. Once the appropriate protective coating is applied, the Engineer shall determine the dry film thickness, prior to acceptance of each area.

Access to the structure for inspection purposes must be maintained by the Contractor until acceptance. Dry film thickness determinations will be made by the Engineer or Inspector in accordance with SSPC-PA2, paint application Specification No. 2 measurement of dry paint thickness with magnetic gages. Where determined necessary by the Engineer or Inspector a Tooke, destructive test instrument may be used. If a Tooke Gage is used, the test area shall be recoated to the satisfaction of the Engineer. Any evidence of less than the specified thickness shall be cause for rejection in which case the Contractor shall recoat, including re-cleaning if necessary, at his own expense.
MATERIAL SPECIFICATION
PREQUALIFIED COATING MATERIAL LIST

Self-curing inorganic zinc, polyamide epoxy, aliphatic polyurethane coating system:

1) Carbo Zinc 11HS (Primer)  
   Carboguard 890 (Epoxy)  
   Carbothane 133 LH (Urethane)  
   Manufactured by:  
   Carboline Co.  
   St. Louis, Mo

2) Zinc Clad DOT (Primer)  
   Steel Spec Intermediate (Epoxy)  
   High Solids Polyurethane (Urethane)  
   Manufactured by:  
   Sherwin Williams  
   Cleveland, OH

3) Dimetcote 9HS (Primer)  
   Amercoat 385 (Epoxy)  
   Amercoat 450H (Urethane)  
   Manufactured by:  
   PPG  
   Pittsburgh, PA

4) Interzinc 22HS (Primer)  
   Intergard 475HS (Epoxy)  
   Interthane 990HS (Urethane)  
   Manufactured by:  
   International  
   Houston, TX

Note: Only products from the same manufacturer including thinners and solvents which are certified to be compatible shall be used on the structure. The third coat of polyamide epoxy and the finish coat of polyurethane shall be pigmented to match Munsell Notation Number 7.5GY5/4, Sage Green. Field tinting will not be permitted.
ITEM 607.98870001 - REMOVE, STORE AND RESET FENCING ON STRUCTURE

DESCRIPTION:

This work shall consist of the removal, storage and resetting of fencing on structures in locations shown on the Plans, described in the proposal and directed by the Engineer.

MATERIALS:

Existing materials shall be salvaged and reused in resetting the fencing. Materials damaged or lost by the Contractor and those few components of the fencing which by nature of their construction are not suitable for reuse, shall be replaced in kind by the Contractor at his expense.

CONSTRUCTION DETAILS:

The locations and limits of the existing fencing to be removed shall be as authorized by the Engineer. The Contractor shall carefully dismantle and remove the existing fencing and provide safe storage of the salvaged materials until reuse. The salvaged fencing and related components shall be erected in the same location as before with all posts plumb and fencing to true line and grade and properly tensioned.

METHOD OF MEASUREMENT:

The quantity to be paid for under this item will be the number of linear feet of fencing removed, stored and reset.

BASIS OF PAYMENT:

The unit price bid per linear foot shall include the cost of furnishing all labor, materials and equipment necessary to remove, provide safe storage and reset the fencing. Progress payments for the work under this item will be made as follows: 25% for the removal of the fencing and the remainder (75%) upon satisfactory resetting of the fence.

Payment will be made under:

Note “nn” denotes serialized item, see Subsection 101-53
1. DESCRIPTION:
   1.01 Work shall consist of furnishing and installing a linear delineation system on temporary concrete barrier in accordance with the contract documents.

2. MATERIALS:
   2.01 General Requirements. The system shall consist of segmented panels attached to temporary concrete barrier segments.
      A. Each panel shall be 34 inches long by 6 inches wide.
      B. Each panel shall be constructed of retroreflective material permanently bonded to an aluminum substrate. The panels shall have a repeating raised lateral ridge approximately every 2½ inches, 1/3 inch in height, with a 45-degree profile.
   2.02 Color.
      A. Conformance to the daytime color requirements shall be determined from measurement of the retroreflective sheeting applied to aluminum test panels. Daytime color shall be measured instrumentally using a spectrophotometer employing annular 45/0 (or equivalent 0/45) illuminating and viewing geometry.
      B. Color measurements shall be made in accordance with ASTM E1164 for white and ASTM E2153 for fluorescent yellow. Chromaticity coordinates shall be calculated for CIE Illuminant D65 and the CIE 1931 (2o) Standard Colorimetric Observer in accordance with ASTM E308 for white and ASTM E2152 for fluorescent yellow.
      C. Chromaticity limits for white:

      | Limit Y (%) |
      | Min. | Max. |
      |------|------|
      | 40   | --   |

      | x   | y   | x   | y   | x   | y   | x   | y   |
      |-----|-----|-----|-----|-----|-----|-----|-----|
      | 0.303| 0.287| 0.368| 0.353| 0.340| 0.380| 0.274| 0.316|

      D. Chromaticity limits for fluorescent yellow:

      | Fluorescence Luminance Factor Y_F (%) Min. | Total Luminance Factor Y_T (%) Min. |
      |------------------------------------------|-------------------------------------|
      | 25                                       | 40                                  |

      | Fluorescent Yellow | x   | y   | x   | y   | x   | y   | x   | y   |
      |-------------------|-----|-----|-----|-----|-----|-----|-----|-----|
      | 0.521             | 0.424| 0.557| 0.442| 0.479| 0.520| 0.454| 0.491| 25   |

   2.02 Anchoring Materials. Polymer anchoring materials shall be provided in accordance with Section 701-07 Anchoring Materials – Chemically Curing.
   2.04 Connections. Mechanical fasteners shall be provided in accordance with Section 715-16 Stainless Steel Connecting Products.
   2.05 Adhesive. An adhesive caulking system such as 3M Window-Weld Super Fast Urethane (#08609), or approved equal, shall supplement mechanical anchorage in all installations.
3. **CONSTRUCTION DETAILS**:

3.01 Materials shall be installed on temporary concrete barrier segments in accordance with the manufacturer’s recommendations. Mechanical anchorage shall be provided in accordance with Section 586-3.01 and Section 586-3.03.

3.02 Panels shall be attached 6 inches below the top of the temporary concrete barrier segment and spaced 86 inches apart. Gaps between panels may be adjusted as directed by the Engineer for temporary concrete barrier segments that are not 20 feet in length.

3.03 Panels shall be attached on all temporary concrete barrier segments tangent to the traveled way: white shall be displayed on the right and fluorescent yellow shall be displayed on the left.

3.04 Temporary concrete barrier segments in narrow medians shall have fluorescent yellow panels on both sides of the barrier.

3.05 The Contractor shall be responsible for maintaining the panels. Any materials that fail shall be immediately replaced as directed by the Engineer.

3.02 Temporary concrete barrier installed at the Contractor’s option, or required solely by a delay in the Contractor’s operations, shall be provided with a linear delineation system.

4. **METHOD OF MEASUREMENT**:

4.01 Linear delineation system will be measured as the number of linear feet satisfactorily installed on temporary concrete barrier. No measurement will be made for the number of linear feet of gaps between delineation panels.

5. **BASIS OF PAYMENT**:

5.01 The unit price shall include the cost of furnishing all labor, materials, and equipment necessary to satisfactorily complete the work.

5.02 Payment will be made for the length of Linear Delineation System installed upon satisfactory installation of temporary concrete barrier.

5.03 Payment for this item will only be allowed once in this contract for each temporary concrete barrier unit. No payment will be made for a subsequent movement of the barrier unit unless a different color is required.

5.04 No payment will be made for the linear delineation system on temporary concrete barrier installed at the Contractor’s option, or required solely by a delay in the Contractor’s operations.
1. **DESCRIPTION.** This work shall consist of providing, for the Engineer’s use a building, or a portion thereof, or a modular trailer of a specified type erected at a location approved by the Engineer. In addition, all computer hardware, software and internet communications described in this specification shall be provided for the duration of the contract.

2. **MATERIALS:**

2.01 **Engineer’s Field Office.** The Engineer’s Field Office shall be within a secured, weatherproof building or mobile trailer. If two (2) or more mobile trailer units are provided, they shall be joined with weatherproof connections. Mobile trailers shall be in new or like new condition. The Contractor may furnish equivalent facilities in an existing building, provided that the building is located to provide convenient service. The Contractor shall supply the Engineer with a copy of the Certificate of Occupancy for the existing building.

The Engineer’s Field Office shall be in accordance with the requirements of the New York State Uniform Fire Prevention and Building Code, 19 NYCRR, and any applicable local codes.

The electrical system shall be able to continuously operate all equipment and be provided with adequate receptacles. To accommodate computer equipment, the field office shall be provided with a dedicated 20 amp electrical service and a vacant floor-to-ceiling area with a 39 inch by 39 inch footprint along a wall for the installation of a computer hardware rack/cabinet. Electric light shall be provided by non glare-type luminaires to provide a minimum illumination level of 1,000 lux at desk-height level. An ambient air temperature of 70 °F ±10 °F shall be maintained.

Fire extinguishers and smoke and carbon monoxide detectors shall be provided and installed.

The Engineer’s Field Office shall be partitioned to provide separate rooms, defined as either “small” or “large”, with adjoining doors. Table 637-1 contains the minimum area requirements for each of the office types.

</table>

A. **Potable Water.** From a local municipal water supply, certified well or bottled with a heating/refrigerator unit to provide hot and cold water. An exterior frost-free hose bib shall be provided in a location adjacent to the Engineer’s Field Office. The hose bib need not be installed on a potable water line, and if the water in the line is not potable, it shall be clearly marked as such.
B. **Restroom.** A separately enclosed room, lockable from the inside, that is properly ventilated and in compliance with applicable sanitary codes. The Contractor shall provide all lavatory amenities, necessary paper and soap products, hot and cold running water and a toilet. The toilet shall be flush-type where sanitary facilities are available, and a type approved by the Engineer prior to installation where sanitary facilities are not available. The minimum required number of restrooms to be provided is specified in Table 637-2.

C. **Parking Area.** The Contractor shall provide and/or construct paved or hard surfaced (gravel or bankrun material) secure parking area with dedicated parking spaces adjacent to the Engineer’s Field Office. Each parking space shall be 9 feet by 18 feet, and the minimum required number of spaces to be provided is specified in Table 637-2.

D. **Field Office Signs.** The sign panel material shall be aluminum, fiberglass, plywood or lightweight plastic. The sign sheeting shall be ASTM Type III. The sign panel shall be 36 inches high by 48 inches wide with white legend on green background with the phrases as positioned and described below. If erected at a location where the sign might be struck by an errant vehicle, the sign support shall be a breakaway type.

The letters in the phrase "FIELD OFFICE" shall be 6 inch C series with the top of the letters 6 inches below the top of the panel. The letters in the phrase “ENGINEER-IN-CHARGE” shall be 6 inch B series with the top of the letters 18 inches below the top of the panel. The letters in the phrase “N.Y.S. THRUWAY AUTHORITY” shall be 1½ inch E series with the top of the letters 30 inches below the top of the panel. All phrases shall be centered horizontally on the panel.

If the Engineer’s Field Office is not located within or adjacent to the contract limits, two (2) additional signs shall be displayed conspicuously within the contract limits. The signs shall be similar to the above description, except that they shall be 48 inches high by 64 inches wide and have an additional bottom line of text containing the street address of the Engineer’s Field Office. The letters in the street address shall be 6 inch B series with the top of the letters 36 inches below the top of the panel and centered horizontally on the panel.

E. **Mailbox.** Standard mailbox (with post if necessary) or post office box meeting the requirements of the U.S. Postal Service.

F. **Telephone and Answering System.** A separate telephone and digital answering system for the exclusive use of the inspection staff. The minimum required number of telephone voice lines to be provided is specified in Table 637-2 (these lines are in addition to the separate lines to be provided for the facsimile machine and dial-up computer access if high speed internet access is not available where the field office is located). The telephone and answering system shall provide the ability to answer all voice lines from each voice line, transfer calls to all voice lines and be equipped with a single, dedicated answering system.

A minimum of one (1) telephone shall be cordless and a minimum of one (1) telephone shall be equipped with speaker and conference call capability. The remaining telephones, at least one (1) per required voice line, shall be extension telephones with minimum 25 foot long cords. The digital answering system shall be capable of recording outgoing messages up to 60 seconds long and receiving a minimum of 40 incoming messages of 60 seconds duration. The system must include automated voice marking of time and day of each message received and provide a message mark so
that new messages may be played back without erasing old messages. The system shall include remote programming of playback, backspace, and outgoing message re-record and allow for the retrieval of messages without a remote control unit.

G. Facsimile Machine. Plain paper laser or inkjet facsimile machine with a dedicated telephone line. The machine shall be capable of sending and printing a maximum paper size of 8½ x 14 inches, have a minimum 20-page memory storage, a minimum 20-sheet document feeder, a minimum 50-sheet paper capacity, transmit at least 6 pages per minute and have an autodial/redial with a minimum of 50 phone number memory. The machine shall be capable of storing and printing outgoing message confirmation information and printing the sender’s name, fax number and page number on incoming faxes.

H. Photocopier. Heavy duty, electric, dry-process photocopying machine. The machine shall be an all-in-one copy machine with black & white and color copying, black & white and color printing and black & white and color scanning capabilities. Machine shall have at least three paper bins (8½ x 11 inches, 8½ x 14 inches and 11 x 17 inches), enlarging and reducing capabilities, and collating, sorting stapling and double-sided copying. Set-up, printer drivers, software and networking are required. All on-site staff email addresses shall be set up and programmed for ease of scanning. Maintenance shall be provided, as required, including repairs and all necessary toner cartridges and staples for the life of the contract and until final completion. One (1) case (5,000 sheets, 20 lb, white) of each paper size shall be provided as initial stock.

I. Paper Shredder. Automatic start, heavy duty cross-cut paper shredder. The shredder shall be able to receive 8½ inch wide paper and shred a minimum of 15 sheets simultaneously along with CDs and staples.

J. Pencil Sharpener. Manual or electric pencil sharpener, minimum 1 per room.

K. Exterior Bulletin Board. An installed 4 foot by 8 foot weatherproof bulletin board in front of or adjacent to the Engineer’s Field Office. The bulletin board may be attached to an outside wall of the office. The location selected must be handicapped accessible and clearly visible.

L. Interior Bulletin Board. An installed, wall-mounted 4 foot by 6 foot bulletin board made of cork or similar material in a large room, and one (1) 2 foot by 4 foot wall mounted bulletin board installed per room.

M. Dry Erase Board. Installed, wall-mounted 2 foot by 4 foot dry erase boards, minimum one (1) per room.

N. Storage Locker. Metal or wood storage locker with shelves, a tumbler lock and two (2) keys for the storage of survey, GPS and testing equipment. The total locker space footprint provided shall be a minimum of 9 square feet with a minimum height of 6 feet.

O. Fire Resistant Cabinet. Fire resistant, legal size filing cabinet with locks and two (2) keys each, meeting the requirements of ANSI/UL Standard 72 for Insulated Filing Devices, Class 350-1 hour. Each office shall be provided with two (2) 2-drawer cabinets, and the required number of additional 4-drawer cabinets as specified in Table 637-2.
P. **Bookcase.** Self-standing, 3-shelf metal or wood bookcase, approximately 4 feet high, 4 feet wide and 1 foot deep. The minimum required number of bookcases to be provided is specified in Table 637-2.

Q. **Wastebasket.** Minimum 7 gallon wastebasket, minimum one (1) per desk.

R. **Refrigerator.** Electric, top-freezer type providing a minimum storage space of 15 cubic feet for Engineer’s Field Office Types 1 and 2, and a minimum storage space of 21 cubic feet for Types 3, 4 and 5.

S. **Kitchenette.** To include a minimum 1 cubic foot, 1,300 watt microwave oven, a sink with hot and cold running water with minimum dimensions of 15 inch by 15 inch by 6 inch deep, usable counter space with minimum dimensions of 5 feet long by 2 feet deep and cabinet space with minimum dimensions of 5 feet long by 1½ feet deep by 2½ feet high. If the water in the sink is not potable, it shall be clearly marked as such.

T. **Stove.** Electric, propane or bottle gas stove with a minimum of two (2) burners adequate for rapid drying of soil samples, including fuel or electrical supply. A stove is required when a separate Field Laboratory is not included.

U. **First Aid Kit.** A Type III kit in accordance with ANSI Z308.1 *Minimum Requirements for Workplace First Aid Kits*. The minimum number of first aid kits to be provided is specified in Table 637-2.

V. **Thermometer.** A minimum-maximum thermometer displaying in degrees Fahrenheit and mounted with an external probe to give the temperature both indoors and outdoors.

W. **Coat Rack.** A metal or wood coat rack or closet capable of holding at least 4 coats. The minimum required number of coat racks to be provided is specified in Table 637-2. A single coat rack may be provided as long as it holds the minimum number of coats as per Table 637-2.

X. **Office Desk and Chair.** Fully assembled freestanding office desks and chairs. Each desk shall have a 5 foot long by 2½ foot wide work surface and a height of 30 inches, at least 2 lockable drawers and include an adjustable shelf approximately 1 foot wide and no less than 2½ feet long. Each desk shall also be provided with an adjustable chair with arms, 5 legs with casters and be adjustable from approximately 16 inches to 24 inches in height. Each desk shall have a dedicated electrical outlet receptacle. The required number of office desks and chairs to be provided is specified in Table 637-2.

Y. **Office/Conference Table.** Commercial-grade rectangular table with weather/spill resistant top a minimum of 8 feet long by 2½ feet wide by 30 inches high. The minimum required number of office/conference tables to be provided is specified in Table 637-2.

Z. **Folding Chair.** Commercial-grade, folding steel chair with approximate overall dimensions of 30 inches by 19 inches wide by 21 inches deep. The minimum required number of folding chairs to be provided is specified in Table 637-2.

AA. **Drafting Table.** Adjustable height, tilting top drafting table with brackets and legs and approximate dimensions of 6 feet long by 3 feet wide by 3 feet high. The minimum required number of drafting tables to be provided is specified in Table 637-2.

BB. **Drafting Stools.** Adjustable height stool with backrest. The minimum required number of drafting stools to be provided is specified in Table 637-2.
CC. **Vertical Plan Filing Rack.** Constructed of metal, capable of hanging up to 12 sets of plan drawings up to 3 feet by 4 feet in size, 12 hanging clamps included. The minimum required number of vertical plan filing racks to be provided is specified in Table 637-2.

DD. **Roll File Unit.** Twelve (12) compartments, each measuring approximately 6 inches by 6 inches. The minimum required number of roll file units to be provided is specified in Table 637-2.

2.02 **Information Technology.** The minimum required number of personal computers to be provided is specified in Table 637-2. The minimum requirements for each personal computer are:

A. **Hardware**

- CPU to operate Windows 8.1 for Business (32 bit or 64 bit edition) and all other software listed in this specification;
- Optical Drive – CD-RW/DVD-RW;
- 500 GB minimum hard drive;
- 8 GB minimum RAM;
- USB Port(s);
- 24” LCD monitor (1920 x 1080 resolution minimum);
- One (1) 500 GB External Hard Drive;
- Locking cabinet(s) which encloses all computer hardware;
- Surge protection device;
- External 3 button optical scroll mouse;
- External Speakers;
- Modem with separate phone line for computer (if high speed internet service is unavailable), (minimum 56K baud rate).

B. **Software.** Substitutions for the specified software shall not be permitted unless noted otherwise. All manuals shall be provided.

- Windows 8.1 for Business (32 bit or 64 bit edition);
- Microsoft Word (2013 version or later);
- Microsoft Excel (2013 version or later);
- WINZIP 15;
- Norton Internet Security (latest version for Windows 8) set up to run in Auto-Protect Mode and Auto Update Mode (monthly), or McAfee Internet Security Suite (latest version);

  **Note:** Microsoft Office 2013 Standard Edition, or later version, may be used in lieu of Word 2013 and Excel 2013.

C. **Additional Software.** The following software shall also be provided on the number of personal computers specified in Table 637-2:

- Microsoft Photo Editor (latest version);
- Adobe Acrobat XI Professional (latest version);
ITEM 637.11——25 – ENGINEER’S FIELD OFFICE – TYPE 1
ITEM 637.12——25 – ENGINEER’S FIELD OFFICE – TYPE 2
ITEM 637.13——25 – ENGINEER’S FIELD OFFICE – TYPE 3
ITEM 637.14——25 – ENGINEER’S FIELD OFFICE – TYPE 4
ITEM 637.15——25 – ENGINEER’S FIELD OFFICE – TYPE 5

- Primavera scheduling software capable of meeting all scheduling requirements of the NYS Thruway Authority Addendum to the Standard Specifications §108-01 Start and Progress of Work and compatible with the operating system supplied under this specification.

D. Internet Communication.

- **Cable Internet Service.** 10/100 Ethernet cable network card and high-speed cable modem capable of transferring data at a minimum of 50 megabits per second;
- Subscription to an Internet Service Provider capable of providing high-speed Internet service;
- Network/Wireless – Ethernet or wireless card to be compatible with the selected internet and office network connections.

E. **LaserJet Printer.** Photo-quality color LaserJet printer capable of printing on 8½ by 11 inch and 8½ by 14 inch paper. Supply with spare toner cartridge, standard LaserJet and photo paper, diskettes and read/write CDs.

F. **Digital Camera.** The digital camera system shall meet the requirements below. All necessary hardware, cables, operating manuals, and other pertinent media required for the operation of the camera unit itself, including connecting the camera to the office computer system shall be provided. The camera must be able to download the images to a computer without any proprietary software having to be installed on a computer.

- Minimum 16.0 megapixel resolution with 20x optical zoom and autofocus operation;
- 3 inch LCD screen and optical viewfinder;
- Built-in intelligent flash (auto/on/off);
- Time/date stamp on each picture;
- A total of two (2) rechargeable sets of batteries (Lithium-Ion) and high-capacity (approximately 1 hour) charging unit;
- Two (2) SDHC highest capacity and speed (Class) memory cards that are compatible with the camera;
- Soft storage/carry case with shoulder strap;
- Motion Video: 640 x 480 resolution capability at 30 frames per second (MPEG Video).

3. **CONSTRUCTION DETAILS.** The Contractor shall be responsible, until use and occupancy is relinquished by the Authority, for any and all damage, direct or indirect, of whatever nature, occurring to the property of the Authority and property of the inspection staff which is kept in the Engineer's Field Office. The Engineer will provide the Contractor with a detailed list of items kept in the office, with corresponding dollar values, and will provide the Contractor with updates when something on the list changes. Non-Authority-owned property shall only be those items used in the performance of contract-related work activities. Such property shall be replaced within 30 days of the reported damages and would include any loss caused by, but not limited to, fire, theft, vandalism or malicious mischief. The Contractor shall not be responsible for items kept in the Engineer's Field Office that are not on this list.

The Contractor shall install the Engineer’s Field Office sign at a location approved by the Engineer. If the Engineer’s Field Office is not located within or adjacent to the contract limits, two (2) additional signs shall be displayed conspicuously within the contract limits in locations directed by the Engineer.
ITEM 637.11 – ENGINEER’S FIELD OFFICE – TYPE 1
ITEM 637.12 – ENGINEER’S FIELD OFFICE – TYPE 2
ITEM 637.13 – ENGINEER’S FIELD OFFICE – TYPE 3
ITEM 637.14 – ENGINEER’S FIELD OFFICE – TYPE 4
ITEM 637.15 – ENGINEER’S FIELD OFFICE – TYPE 5

The Engineer’s Field Office shall be fully equipped and made available for use and occupancy by the inspection staff prior to the start of any contract work, and shall be made available after contract final acceptance as directed in writing by the Regional Construction Engineer.

All furniture and equipment shall be fully assembled, operational, clean and serviceable. The Engineer’s Field Office shall be cleaned weekly or more often if required, and the timing of the cleaning operations shall be coordinated with the Engineer. The Contractor shall remove and dispose of all rubbish generated in the office and shall keep the office free from pests. The Contractor shall remove snow from all areas subject to vehicular circulation and parking.

After completion, all portable buildings or trailers, fencing, surfacing and utilities shall be removed from the location and the areas cleaned, loamed and restored as required. The Contractor shall be responsible for providing all necessary computer hardware, software and peripheral devices as well as high-speed Internet service to the Engineer’s Field Office until use and occupancy of the Engineer’s Field Office is relinquished by the Authority. Only internet services that can provide a minimum data transfer rate of 768 kilobits per second will be considered acceptable. The Contractor shall be responsible for providing all necessary service connections to the Engineer’s Field Office and Engineer’s Field Office computer(s). In addition, the Contractor shall provide a cable or DSL modem and any other equipment necessary to provide the minimum specified data transfer rate.

4. METHOD OF MEASUREMENT. The Engineer’s Field Office will be measured for payment as the number of months satisfactorily provided, measured to the nearest 0.25 months.

5. BASIS OF PAYMENT. The unit price bid per month for the Engineer’s Field Office shall include the cost of all labor, materials and equipment necessary to complete the work including property rental, utility charges and incidental expenses. Payment will be made for each month of availability for occupancy by the Engineer and inspection field staff.

No payment will be made under Engineer's Field Office when deficiencies in compliance with these requirements are not promptly addressed by the Contractor after notification by the Engineer. Should the aggregate of non-compliance days exceed 3 days in any one month, no payment shall be made for the entire month in which deficiencies were cited.

Monthly payments may be terminated prior to contract final acceptance by written notification by the Division Construction Engineer that such office will no longer be required on the contract. Payment for each month's occupancy of the Engineer’s Field Office after the date of contract final acceptance will be made as part of the final contract payment. Failure of the Contractor to supply documentation required to complete the final estimate may result in nonpayment during this delaying period.

During periods of contract extension of time where Engineering Charges are assessed, no payment will be made for occupancy and services, except that payment for each month's occupancy after the date of final acceptance will be made as part of the final estimate.
ITEM 647.30—25 - BRIDGE SIGN REMOVAL, STORAGE AND REMOUNTING

1. DESCRIPTION:

1.01 This work shall consist of the removal, storage and remounting of the bridge mounted signs shown on the Plans, specified in the Contract documents, or ordered by the Engineer.

2. MATERIALS:

2.01 All bolts, nuts or washers unable to be reused shall be supplied by the Contractor and meet the requirements of NYS Standard Specifications Section 715-16 – Stainless Steel Connecting Products.

3. CONSTRUCTION DETAILS:

3.01 The Contractor shall remove the sign, supporting members, and connections as shown on the Plans or ordered by the Engineer. He will then pack and protect these materials, deliver and store them at a site approved by the Engineer. Upon completion of the bridge, rehabilitation or at such time as the Engineer orders, the Contractor shall remove the sign and all its appurtenances from the storage area, deliver it to the site and remount on the bridge as shown on the Plans or ordered by the Engineer.

3.02 All materials not used will become the property of the Thruway Authority.

3.03 It will be the Contractor's responsibility to deliver the sign to and from storage. He will be totally responsible for maintaining the sign during dismantling, delivery and erection. Any damage to the sign or its appurtenances during these operations will be repaired or replaced by the Contractor at no cost to the Thruway Authority.

3.04 The Contractor will be responsible for damages to the sign or its appurtenances while in storage.

3.05 If the sign is to be replaced, the Contractor shall turn over the existing sign to the Authority and the Authority shall provide a new fabricated sign.

4. METHOD OF MEASUREMENT:

4.01 The quantity to be paid for under the work will be the number of signs and associated appurtenances removed, stored and reinstalled as shown on the Plans or directed by the Engineer.

5. BASIS OF PAYMENT:

5.01 The unit price bid for each sign shall be compensation in full for removal, delivery to and from storage and reinstallation of the sign. This will include all labor and materials and transportation necessary to properly complete the work as shown on the Plans and called for in the Specification.
1. DESCRIPTION:

1.01 General: The Field Change Order (FCO) provides a contract contingency allowance for the timely payment of authorized additional work that is necessary to fulfill the intent of the plans and specifications.

1.02 Eligible Work: FCO payments shall be limited to work that is: (1) within the scope of the contract; (2) a quantity variation of existing contract pay items, or; (3) a new contract pay item introduced as a result of minor field adjustments in the details of the project. All eligible items of work shall have a known unit price, either through use of a contract bid price or through an Agreed Price.

2. MATERIALS:

2.01 None specified.

3. CONSTRUCTION DETAILS:

3.01 None specified.

4. METHOD OF MEASUREMENT:

4.01 This item will be measured for payment on a dollars-cents pay unit basis.

4.02 Bid Price: The unit price shown in the proposal for this item will be considered as the price bid, and shall not be altered in any manner. Should the amount shown be altered, the new figure will be disregarded and the original bid price will be used to determine the total amount bid for the contract.

4.03 Payments: Work for which FCO payments are processed will be measured in accordance with the specifications governing the work.

5. BASIS OF PAYMENT:

5.01 All work to be paid under the FCO item must be authorized in conformance with §104-02 – Changes, Contingencies, Extra Work and Deductions. Disputed work, force account work, work associated with §104-10 – Value Engineering Change Proposals, or payments for time related provisions are not eligible for FCO payment.

5.02 FCO payments will be determined from the quantities and unit prices of eligible work that has been completed in conformance with applicable Specifications. Work for which FCO payments are processed will be paid in accordance with the specifications governing the work.

5.03 Prior to processing the final agreement, the FCO payments will be reconciled through a final Order-on-Contract, such that the amount of FCO payments are converted to the corresponding quantities of the pertinent contract pay items. When payments are transferred to the appropriate items, the remaining amount of FCO funds will be deleted.
ITEM 699.04——25 - MOBILIZATION

1. DESCRIPTION:

1.01 Under this work the Contractor shall provide the following:

   A. Necessary bonds, insurance, and prefinancing and set-up of necessary general plant, including shops, storage areas, Engineer’s and Contractor’s offices and such sanitary and other facilities as are required by local or state law or regulation.

   B. Critical path method (CPM) schedule of operations as described in §108-01 of the TA Addendum.

   C. M/WBE participation program meeting the M/WBE goals of the contract as described in §109-06 Contract Payments and in accordance with §102-12 D/M/WBE Utilization.

2. MATERIALS:

2.01 Unless otherwise specified, such materials as required for mobilization and are not to be part of the completed contract shall be as determined by the Contractor, except that they shall conform to any pertinent local or state law, regulation or code.

3. CONSTRUCTION DETAILS:

3.01 The work required to provide the above facilities and service for mobilization shall be done in a safe and workmanlike manner and shall conform with any pertinent local or state law, regulation or code. Good housekeeping consistent with safety and other requirements of this contract shall be maintained.

4. METHOD OF MEASUREMENT:

4.01 Payment for mobilization will be made on a lump sum basis.

5. BASIS OF PAYMENT:

5.01 The amount bid for mobilization shall not exceed four percent (4%) of the total contract bid price excluding the bid price for mobilization. Should the bidder exceed the foregoing four percent (4%), the Authority will make the necessary adjustment to determine the total amount bid based on the arithmetically correct proposal.

The amount bid shall include the furnishing and maintaining of services and facilities noted under Section 1.01 to the extent and at the time the Contractor deems them necessary for its operations, consistent with the requirements of this work and the contract.

The amount bid shall be payable to the Contractor with the first contract payment made for other contract work following acceptable completion of all requirements noted under Section 1.01.

Payment will be made under:

03/09 RBF
Rev. 06/17
SPECIAL NOTES
CONFIDENTIAL INFORMATION

1. **Confidential Information**: “Confidential Information” means any information not generally known to the public, whether oral or written, that the Authority claims is confidential and discloses to Contractor for the purposes of performing work on the Project. Confidential Information may include, but is not limited to, operational and infrastructure information relating to: bid documents, plans, drawings, specifications, reports, product information and data, business and security processes and procedures; personnel and organizational data, and financial statements; information system IP addresses, passwords, security controls, architectures and designs; and such other data, information and images that the authority deems confidential. The Authority will identify written Confidential Information by marking it with the word “Confidential” and will identify oral Confidential Information as confidential at the time of disclosure to the Contractor.

2. **Exempt Materials**: Confidential Information does not include information which, at the time of the Authority disclosure to Contractor; (a) is already in the public domain or becomes publicly known through no act of Contractor; (b) is already known by Contractor free of any confidentiality obligations; (c) is information that the Authority has approved in writing for disclosure; or (d) is required to be disclosed by Contractor pursuant to law so long as Contractor provides the Authority with notice of such disclosure requirement and an opportunity to defend prior to any such disclosure.

3. **Permitted Use**: Contractor may use Confidential Information solely for the purposes of performing work on the Project. Contractor may share Confidential Information with its employees, consultants, sub-consultants, sub-contractors, suppliers, and agents that are necessary to perform work on the Project (“Authorized Personnel”), but must ensure that such Authorized Personnel execute a Confidentiality and Non-Disclosure Agreement as set forth in the Minimum requirements for the Handling and Treatment of confidential Information. The Authority’s disclosure of Confidential Information to Contractor shall not convey to Contractor any right to or interest in such Confidential Information and the Authority shall retain all right and title to such Confidential Information at all times.

4. **Protections**: Contractor shall hold Confidential Information confidential to the maximum extent permitted by law. Contractor shall safeguard Confidential Information in accordance with the Minimum Requirements for the Handling and Treatment of Confidential Information.

5. **Return of Confidential Information**: Upon the written request of the Authority, Contractor shall return all written Confidential Information to the Authority.

EXTERNAL CONNECTIONS

If in order to perform work on the Project, Contractor must make an external connection to the Authority’s data communications infrastructure and/or access Authority information systems, Contractor shall in all respects comply with all Authority policies and procedures regarding such connections and information systems access and undertake whatever actions are necessary in the discretion of the Authority to ensure such compliance. Contractor shall be responsible for all costs associated with ensuring that its own network security measures comply with all Authority policies and procedures regarding external connections.
MINIMUM REQUIREMENTS FOR THE
HANDLING AND TREATMENT OF CONFIDENTIAL INFORMATION

Contractor shall meet the following minimum requirements relative to project information that is identified as CONFIDENTIAL.

Authorized Personnel:

Contractor shall require that all authorized individuals or entities (e.g., employees, consultants, sub-consultants, sub-contractors, suppliers and agents) (“Authorized Personnel”) to which it discloses CONFIDENTIAL information sign a Confidentiality and Nondisclosure Agreement (“Agreement”). Such Agreement shall provide that Authorized Personnel: are personally responsible at all times for protecting CONFIDENTIAL information that is in their possession or control; must always use proper precautions to safeguard against the unauthorized access and disclosure of CONFIDENTIAL information; must notify Contractor of any known or suspected instances of loss or theft of, or unauthorized access to, CONFIDENTIAL information; and must return all CONFIDENTIAL information to Contractor upon completion of the project. Contractor shall be responsible for enforcing the provisions of such Agreement through personal observation and supervision of Authorized Personnel and utilization of appropriate processes.

Contractor shall maintain a list of all Authorized Personnel which have access to CONFIDENTIAL information and must provide the Authority with such list upon the Authority’s request. Contractor shall update such list monthly and notify the Authority of any changes in such list.

Inventory Control:

Contractor shall create and maintain an inventory of all CONFIDENTIAL information that it provides to Authorized Personnel. Upon completion of the project, Contractor shall check all CONFIDENTIAL information returned from Authorized Personnel against the inventory. Contractor shall provide a copy of the checked inventory to the Authority.

Use and Storage:

Contractor shall implement reasonable processes during normal working hours to prohibit unauthorized individuals from gaining access to CONFIDENTIAL information that is within the Contractor’s custody and control. At times other than normal working hours, Contractor shall store CONFIDENTIAL information in a secure area, such as a fire-proof safe, locked desk, cabinet or other secure storage facility, where access can be controlled. Contractor shall control the access that Authorized Personnel have to CONFIDENTIAL information stored in such secure areas through the use of manual or automated locks and keys. Contractor shall maintain a list of Authorized Personnel who have access to such secure areas and the specific CONFIDENTIAL information therein.

Reproduction:

Contractor may reproduce CONFIDENTIAL information only to the extent necessary to carry out contract performance. Contractor must stamp/mark all CONFIDENTIAL information that is reproduced with the word CONFIDENTIAL and protect it in the same manner as the original.

Transportation:

To the extent feasible and reasonable, Contractor shall hand deliver CONFIDENTIAL information with instructions that only the addressee is allowed to open or view it. Contractor may send CONFIDENTIAL information that cannot be hand delivered via the U.S. Postal Service or express mail services (e.g., FEDEX) provided: it is packaged and sealed in a way that does not disclose its contents or the fact that it is CONFIDENTIAL information, and a signature from the recipient is required.
Under no circumstances shall a transportation method be used that cannot guarantee that CONFIDENTIAL information is accessed only by the intended recipient.

**Disposal:**

Contractor shall dispose of all CONFIDENTIAL information, regardless of its form or format, using a destruction method that prevents its unauthorized retrieval (e.g., crosscut or micro shredding, degaussing).

**Loss, Theft or Unauthorized Access:**

Contractor shall provide timely notice to the Authority upon discovery of any incident involving the loss or theft of, or unauthorized access to, CONFIDENTIAL information.
SPECIAL NOTE:  
CONTROL OF MATERIALS

The Contractor’s attention is directed to the TA Addendum, Section 106 – CONTROL OF MATERIAL, available from the Authority’s website at: http://www.thruway.ny.gov/business/addendum/index.html. The Contractor understands and agrees that some or all of the off-site inspection and approval of material such as precast concrete items, structural steel, bridge bearings, concrete structural elements and/or their components to be used on this project will be done by the New York State Department of Transportation (NYSDOT) as the Authority’s agent.

The Contractor agrees to the following conditions:

1. Whenever the Contractor receives direction from the NYSDOT regarding the approval/rejection of material that direction constitutes direction by the Authority under the contract and, shall be final and accepted as such by the Contractor.

2. The Contractor will not allow off-site materials subject to inspection and approval of NYSDOT to be shipped to the project site without direct authorization from the NYSDOT.

3. At the Pre-Award Meeting or as soon as practicable, but in any case, before the Pre-Construction Conference, the Contractor will provide the following information to the Thruway Authority’s Director, Office of Construction Management, for transmittal to NYSDOT to arrange off-site inspections:

   A. The name and address of each Manufacturer of all materials, and portions thereof, requiring off-site quality assurance to be incorporated into this highway project.

   B. The name and address of each Fabricator fabricating each steel item or any portion thereof to be incorporated into this highway project.

   C. The name and address of each Fabricator manufacturing structural pre-cast/pre-stressed items or any portion thereof to be incorporated into this highway project.

4. The Contractor agrees that it and its Subcontractors and Suppliers will acquire all materials to be incorporated into this Thruway project only through Manufacturing, Batching and Fabrication facilities approved by NYSDOT.
1. **SUMMARY:**

The New York State Thruway Authority (NYSTA) uses Trns•port Expedite Software for electronic bidding. Expedite is a product of the American Association of State Highway and Transportation Officials (AASHTO) that is currently used by the majority of State Departments of Transportation. It is provided free of charge, and can be used on almost any Windows-compatible PC. It integrates with many existing electronic bid preparation software, and has import/export capability for use with database and spreadsheet systems. Expedite allows bidders to receive electronic proposal bid item information from the New York State Thruway Authority (NYSTA) internet web site and to produce both an electronic and a paper-based bid.

For additional information and downloads, see the NYSTA website at [http://www.nysthruway.gov](http://www.nysthruway.gov).

2. **PARTICIPATION AND RELATIONSHIP TO PAPER DOCUMENTS:**

Electronic bidding neither replaces paper bids nor forces any Contractor to bid electronically. Rather, participation is voluntary and electronic bidders must submit matching paper documents to backup the electronic file. Expedite writes a matching date-time group in both the computer file and on every printed bid page as per NYSTA specifications. This date-time helps verify that the electronic and printed files are consistent. In case of discrepancy, paper bids always prevail and are the primary legal document.

3. **THIRD-PARTY SOFTWARE:**

The NYSTA endorses no particular product but expects all such vendors and individuals to voluntarily keep pace with changes in NYSTA specifications.

4. **PROPOSAL NOTES AND CHANGES BY AMENDMENT:**

Contractors are solely responsible for recognizing and properly responding to any and all special notes and circumstances printed in the Contract Proposal and any and all changes by amendment from the amendment documents and/or notices communicated to them by the NYSTA Contracts Unit. Amendments are posted online at: [http://www.thruway.ny.gov/business/contractors](http://www.thruway.ny.gov/business/contractors). If an amendment involves changes to item bid date, an amended Expedite file will be posted to the NYSTA website, and this file must be applied to your electronic bid. However, not all amendments will involve changes to item bid data. Do not bid without carefully reviewing the printed proposal and any and all changes by amendment. Proposal notes and circumstances include, but are not limited to, printed information on alternate, fixed and/or limited cost items and/or special circumstances regarding item placement and use.
SPECIAL NOTE:

REQUIREMENTS FOR CONTRACTOR’S UTILIZATION OF AREAS OUTSIDE OF THE RIGHT-OF-WAY

1. Before the contractor can utilize any area outside of the NYS Thruway Authority (NYSTA) Right of Way (or outside of a temporary easement obtained for the project by the NYSTA), for any work associated with this project, written approval to do so shall be obtained from the NYS Thruway Authority through the Project Engineer. The contractor’s request for approval shall be in writing and the Authority shall be allowed 2 weeks to review the request and respond.

2. This requirement applies to areas such as, but not limited to: borrow areas, spoil areas, equipment and/or material storage areas, haul roads, batching areas, water points, shop areas, and all similar areas. This requirement does not apply to the Contractor’s established and permanent headquarters, commercial borrow sources, commercial gravel pits, commercial quarries, and all similar areas.

3. The contractor’s written request for approval shall include a letter report prepared by an Environmental Professional, acceptable to the Authority, documenting the investigation of the proposed site. The expectation is that an Environmental Professional visits the site, performs an assessment of the proposed use against all applicable environmental requirements, and then documents their findings and recommendations. The letter report shall include the following unless otherwise authorized by the Authority:
   a) A written description of the activities the contractor wishes to perform at the proposed site, including timeframes.
   b) Maps showing Federal and State regulated wetlands. The area proposed for use shall be depicted on each map.
   c) A site location map which accurately shows the area proposed for use, adjacent property boundaries/owners, the location of all wetland boundaries observed, and any required erosion and sediment control measures. If present, wetlands shall be delineated in the field by the Environmental Professional with stakes and ribbon, and wetland delineation data forms shall be completed.
   d) A written statement prepared by the Environmental Professional regarding the presence of any rare animals or plants or significant natural communities. The Environmental Professional shall use the NYSDEC Environmental Resource Mapper to make this determination. If any rare species are identified, then determine if the rare species are listed as endangered or threatened and whether the NYSDEC determines the proposed use may be harmful to the species or their habitat. If so, address to the satisfaction of the NYSDEC.
   e) A copy of the applicable SPDES permit and any local municipal permits related to use of the site.
   f) A listing of other Environmental Permits which were obtained by the Authority for the project. These are referenced in the contract proposal.
   g) A completed NYSTA Property Release form. The form is available through the Project Engineer.
   h) A plan showing all restoration work. This includes, but is not limited to, plans for grading, surface restoration details, and erosion and sediment control.

4. This requirement does not waive other provisions of the contract related to use of lands outside the Right of Way. Rather, it shall be viewed as supplementary. The following contract provisions still remain in effect:

   §107-08 Protection and Restoration of Property and Landscape, Subsection B. Outside the Right of Way
   §107-10 Managing Surplus Material and Waste
COMPLIANCE WITH SPDES REGULATIONS

The Contractor is advised that the NYS Thruway Authority has evaluated Stormwater requirements for this project and has determined that coverage is not warranted under NYS Department of Environmental Conservation’s SPDES General Permit for Stormwater Discharges from Construction Activity (GP-0-15-002). The Contractor shall read and understand the requirements of GP-0-15-002. In the event the Contractor’s operations, e.g., clearing and grubbing, expanded staging area; will cause an increase in ground disturbance beyond the amount identified in the Contract Documents, coverage under GP-0-15-002 may be required. Prior to commencing these operations, the Contractor should immediately advise the Project Engineer, who will in turn discuss the request with the Project Designer and Division Environmental Specialist or Environmental Point of Contact.

- In the event coverage is required under GP-0-15-002 as a result of these operations, the Contractor will be required to prepare a Stormwater Pollution Prevention Plan (SWPPP) and submit a Notice of Intent (NOI) with the NYS Department of Environmental Conservation.

- In the event coverage is required under GP-0-15-002 as a result of changes made by the Authority, the Authority will be required to prepare a SWPPP and submit a NOI.

In either case, the Contractor will not be allowed to proceed until verification of coverage under GP-0-15-002 has been provided to the Project Engineer. The Contractor shall make no claim against the Authority for delays resulting from preparing a SWPPP, filing a NOI, and seeking verification of permit coverage.
SPECIAL NOTES

GREEN CONSTRUCTION REQUIREMENTS

ULTRA LOW SULFUR DIESEL FUEL

In order to reduce diesel emissions, the Contractor shall use Ultra Low Sulfur Diesel (ULSD) fuel to operate all diesel engines used to complete the work that will operate for 10 hours or more on the contract site. ULSD fuel requirements shall apply to:

- All diesel engines/equipment.
- Stationary and mobile equipment.
- Owned, leased and rented equipment.

The hours the piece of equipment is used to complete the work is defined as the actual time the engine is running. The time may be continuous or discontinuous and includes warm-up periods idling, in traffic periods, etc.

The Contractor shall repair deficiencies when any diesel powered construction equipment is in non-compliance. When non-compliance items are identified by NYSTA/CC, the Contractor will be notified for correction within a 24-hour period.
CONTROLLING EXPOSURE TO DIESEL EXHAUST

The Contractor shall exercise measures to protect “Sensitive Receptors” from the impacts of diesel exhaust fumes. Sensitive Receptors include, but are not limited to: hospitals, schools, daycare facilities, building fresh air or ventilation intakes, elderly housing or convalescent facilities. The Contractor shall ensure that diesel powered engines are located away from building air conditioners and windows.

The goal is to minimize exposure of Sensitive Receptors in close proximity to diesel exhaust, in terms of both concentration and time. In general, close proximity is defined as within 15 meters of a Sensitive Receptor. Mitigation techniques include positioning stationary equipment exhausts greater than 15 meters from Sensitive Receptors, extension of equipment exhausts through the use of flexible tubing; protecting building air intakes; and the use of moving operations.

Idling time for diesel powered equipment shall be limited to three consecutive minutes for delivery and dump trucks and all other diesel powered equipment except as follows:

- When a “mobile source” (vehicle) is forced to remain motionless because of traffic conditions or mechanical difficulties over which the operator has no control.
- When it is necessary to operate a loading, unloading or processing device.
- When the outdoor temperature is less than -3°C (27°F).
- When the “mobile source” is being repaired.

Arrow panels and portable variable message signs shall be solar powered wherever possible or practical.

Whenever possible and practicable, the Contractor shall establish staging areas for diesel powered vehicles waiting to load or unload materials at the work site. Such areas shall be located where diesel emissions have the least impact on Sensitive Receptors and the general public.
DUST CONTROL

The Contractor shall minimize dust from disturbed soil surfaces or other materials that can cause off-site damage, health hazards and traffic safety problems. Dusty conditions resulting from the Contractor's operations shall be corrected at no additional cost to the State. Buffer areas of vegetation should be left where practical. Water quality shall be considered when selecting materials for dust control. An approved dust palliative may be used in conformance with applicable conditions placed on its use. A list of acceptable dust palliatives is available at: www.nysdot.gov/divisions/engineering/technical-services/geotechnical-engineering-bureau/dust-palliatives.

For areas not subject to traffic, products and materials may be applied or placed on soil surfaces to prevent airborne migration of soil particles, including:

- Vegetative Cover –provides the most practical method of dust control.
- Mulch (including rolled erosion control products) –provides a fast, effective method of dust control.
- Spray Adhesives –Generally composed of polymers in a liquid or solid form mixed with water to form an emulsion that is sprayed on the soil surface. The mixing ratios and application rates will be in accordance with the manufacturer’s recommendations for the specific soils on the site. Adhesives shall not be applied to wet soils or if there is a probability of precipitation within 48 hours.

For areas subject to traffic (traveling public or construction traffic) products and materials may be applied or placed on soil surfaces to prevent airborne migration of soil particles, including:

- Water Sprinkling – The site may be sprayed with water until the surface is wet. This is especially effective on haul roads and access routes.
- Polymer Additives –Polymers shall be mixed with water and applied to the driving surface using mixing ratios and application rates in accordance with the manufacturer’s recommendations. No application of the polymer will be made if there is a probability of precipitation within 48 hours of its proposed use. Any polymers must be used in accordance with the NYSDEC issued “Conditions for Use” and “Application Instructions.” This information can be obtained from the NYSDEC website.
- Barriers – Woven geotextiles or stone can be placed on the driving surface to effectively reduce dust throw and particle migration on haul roads.
- Windbreak – A silt fence or similar barrier can control air currents at horizontal intervals equal to ten times the barrier height. Preserve existing vegetation that acts as a wind barrier as much as practical.
- Wheel Washing – Mechanical or manual wet-method cleaning of on-road construction vehicle tires prior to leaving site.
SPECIAL NOTE

GENERATOR KNOWLEDGE FOR DISPOSAL OF TREATED WOOD

The U.S. Environmental Protection Agency (EPA) and New York State Department of Environmental Conservation (NYSDEC) technique for evaluating whether a material is hazardous for toxicity is the Toxicity Characteristic Leaching Procedure (TCLP). TCLP testing of pentachlorophenol ("penta") and creosote treated wood by the Electric Power Research Institute, Association of American Railroads, and others has conclusively demonstrated that treated wood products are not a hazardous waste. Under EPA’s and NYSDEC’s rules, such “generator knowledge” can be utilized in place of testing to determine that a waste is not hazardous. This information can be used as evidence that treated wood products can be disposed as non-hazardous waste, based on generator knowledge, in lieu of physical testing.

Generator knowledge information, obtained from the American Wood Preservers Institute (AWPI) can be viewed at their web site located at www.awpi.org. AWPI’s information comes from studies conducted by the Electric Power Research Institute (EPRI), the Washington Public Ports Association (WPPA), and the Association of American Railroads (AAR). EPRI test results are for both penta-treated and creosote-treated wood. WPPA and AAR test results are for creosote-treated wood.

NOTE: Arsenically-treated (e.g., chromated copper arsenate [CCA]) wood products disposed by the end user are exempt from classification as a federal hazardous waste regardless of the TCLP results for specified constituents from any individual sample. Also, wood products treated with preservatives that contain no TCLP constituents (e.g., Kodiak Preserved Wood containing Copper Dimethylthiocarbamate) are not hazardous waste.
MOVEMENT OF WOOD MATERIALS FROM PROJECT SITES

Pursuant to New York State Department of Environmental Conservation (NYSDEC) Regulations, 6NYCRR, part 192.5, *Firewood Restrictions to Protect Forests from Invasive Species*, it is unlawful to transport any firewood material more than 50 miles from its point of origin to limit the spread of invasive insect species. “Firewood” shall mean all wood of any species, cut or not cut, split or not split, regardless of length which is (a) in a form and size appropriate for use as a fuel, or (b) which is destined for use as a fuel. Firewood shall not include kiln-dried dimensional lumber, wood that has been chipped to a maximum piece size that is no greater than 1-inch in two dimensions, or logs or wood being transported to sawmills or other manufacturing facilities for use in their primary operations. All Thruway Authority (TA) projects are subject to this requirement. Additional information can be found at the following link: http://www.dec.ny.gov/regs/4079.html

If firewood is to be moved within 50 miles of its point of origin a “Self-Issued Certificate of Origin for Transport and Possession of Untreated Firewood” must be completed. This form can be found at the following link: http://www.dec.ny.gov/docs/lands_forests_pdf/selfisscert.pdf

INVASIVE SPECIES AND QUARANTINE MATERIALS MOVEMENT

NYSDEC Regulations, 6NYCRR, part 192.6, *Quarantine Orders*, No person shall fail to comply with the provisions of any quarantine order issued by the Department pursuant to Environmental Conservation Law (ECL) section 9-1303. To the extent the provisions of section 192.5 *Firewood Restrictions to Protect Forests from Invasive Species* and such quarantine order are in conflict, the more restrictive provision shall apply. TA is under New York State and Federal ash quarantines where it is unlawful to transport any ash material outside of several counties (see quarantine maps at http://www.agriculture.ny.gov/PI/eab/emerald_ash_borer_quarantine.pdf and http://www.dec.ny.gov/animals/47761.html). Therefore, any parts of ash trees, including leaves, bark, stumps, limbs, branches, roots, and ash logs of any length, and firewood (see above for definition of firewood) from ANY tree species, are all considered regulated articles and must be handled properly. Tree-felling, clearing and grubbing operations at project sites may result in the contractor’s need to handle materials from ash tree species and/or firewood or chips from ANY tree species. To the greatest extent possible in areas of clearing and grubbing, ash trees should be pre-identified and marked prior to commencement of construction to promote the proper handling of these materials.

Un-infested ash materials in any form may be moved offsite, but only within the quarantine zone. Firewood from ANY tree species may never be moved more than 50 miles and never from the quarantine area, into non-quarantine areas. Transport of any wood needs the required transport certificate: http://www.dec.ny.gov/docs/lands_forests_pdf/selfisscert.pdf

Note: According to the quarantine maps, several parts of the Thruway are the boundary between the quarantine area (south) and the non-quarantine area (north). Therefore, transport of any wood material would be prohibited across the roadway from south to north, but acceptable from north to south.

Note: Any ash materials that are known or suspected to be infested with live emerald ash borer pests in any life stage must be reported immediately to the EIC and/or designee for further appropriate action and coordination with regulatory agencies.
Any ash materials chipped to a size no greater than 1-inch in at least two dimensions is considered safe to be transported outside the quarantine zone, but only in accordance with a Chip/Mulch Agreement and Transport Agreement received from the NYS Department of Agriculture and Markets (NYSDAM). If any regulated ash materials must be moved outside of the currently quarantined area, a certification from the NYS Department of Agriculture and Markets (NYSDAM) or USDA Animal & Plant Health Inspection Service (APHIS) must be obtained. For further information see the following links:

http://www.dec.ny.gov/animals/47761.html
http://www.agriculture.ny.gov/PI/eab.html
MARKER RELOCATION DURING CONSTRUCTION
EXISTING MILE MARKERS AND TENTH-MILE MARKERS AND DELINEATORS

All Mile Markers and Tenth-Mile Markers are to be maintained during construction of this project. The Contractor will be allowed to temporarily relocate them to avoid damage to them or for constructability purposes. The Mile Markers and Tenth-Mile Markers can be moved but the new location must be visible to traffic and be reasonably close to their original location. The Mile Markers must be returned to their original location upon completion of construction at that location. Cost for this work shall be included in the bid price for the various pay items in the Project, unless the work is specifically called for in the Contract Documents.

If the Contract calls for replacement of existing Milemakers and/or Tenth-Milemarkers, they shall remain in place, or reset to a location reasonably close to their original location, until the new markers are installed.
SPECIAL NOTE

BIRD / BAT WASTE AWARENESS

The Contractor should be aware that there may be bird/bat waste in the work area. The waste may contain trace amounts of metals and the fungus *Histoplasma capsulatum*. Exposure to this fungus can result in the disease histoplasmosis. Proper health and safety precautions shall be identified in the contractor’s health and safety plan in accordance with section 107-05. The disposal facility that accepts the bird/bat waste may need documentation as to its composition to determine that it is non-hazardous and/or otherwise suitable for disposal at that location.
BRIDGE (BIN) PLATE

One Bridge Identification Number (BIN) plate will be required for each bridge in this contract. For each bridge there may, or may not, be an existing BIN plate.

Therefore, one of the following conditions will exist with regard to BIN plates for any particular structure:

Condition No. 1. A BIN plate is attached to the structure but the nature of the work to be done does not require its removal.

Condition No. 2. A BIN plate is attached to the structure and the nature of the work to be done requires its removal.

Condition No. 3. A BIN plate is attached to the structure and is defaced, or otherwise damaged.

Condition No. 4. A BIN plate is not attached to the structure.

Under Condition No. 1, the Contractor's sole obligation shall be to protect the plate from damage during the course of the work.

Under Condition No. 2, the Contractor shall be required to remove and store the BIN plate until such time as the BIN plate may be reinstalled without danger of damage. This requirement shall also apply if the BIN plate is being transferred from an existing abandoned bridge to a new in-service bridge. The Contractor shall furnish all necessary expansion anchors.

Under Condition No. 3, the Contractor shall be required to furnish and install a new BIN plate, and remove the damaged BIN plate. The Contractor shall furnish the panel with reflective background, numerals and expansion anchors. IF the BIN number cannot be deciphered the Engineer will supply the number.

Under Condition No. 4, the Contractor shall be required to furnish and install a BIN plate on the completed structure. The Engineer will supply the Bridge Identification Number. The Contractor shall furnish the panel with reflective background, numerals and expansion anchors.

 Regardless of which condition governs the BIN plate installation, should damage occur to the BIN plate and the Engineer determines it cannot be repaired, the Contractor shall furnish a new plate consisting of the panel with reflective background, numerals, and expansion anchors at no expense to the State. If the Engineer determines the BIN plate may be repaired, repair shall be done at no expense to the State. This requirement applies to all four conditions.

The material requirements for the three parts of the BIN plate are:

Panel with reflective background. The aluminum panel and reflective background shall conform to the material and fabrication requirements of Material Specification 730-01, Aluminum Sign Panels. The background material shall be green reflective sheeting conforming to Materials Specification 730-05.01 (Class A Sheeting). The size of the panels shall be 1/8 inch thick by 3 inch by 12 inch. The panels shall
BRIDGE (BIN) PLATE

have two 5/16 inch drilled or punched holes for mounting, located 1/2 inch from the ends of the panel and 1 1/2 inch from the top or bottom of the panel. The reflective sheeting used to form the background shall be a minimum of 3 inches wide by 10 inches long, or may be a full 12 inches long.

**Numbers.** The numbers shall be reflective sheeting conforming to Materials Specification 730-05.01 (Class A Sheeting), except that the adhesive shall be pressure-sensitive such that the numbers can be applied to the background in the field. The numbers shall be 2 inches high and silver-white in color conforming to FHWA series C dimensions.

Prior to placing the cutout numbers on the panel, the reflective background shall be clean and free of dirt and oil which may adversely affect proper adhesion. The numbers shall be placed on the reflective background, perpendicular to the longitudinal axis of the panel, and vertically centered. The reflective background and numbers shall be coated and/or edge sealed in accordance with the recommendations of the sheeting manufacturer.

**Expansion Anchors.** 1/4 inch diameter by 1 1/2 inch long stainless steel nail drive expansion anchors meeting GSA Specification FF-S-325, #3.2.5.2 shall be used to attach the BIN plates to concrete and masonry surfaces.

The BIN plates shall be attached to the beginning abutment of the bridge using expansions anchors. The plate shall be placed high on the abutment, near the fascia of the bridge.

The cost of this work shall be included in the various items of the contract.
SPECIAL NOTE

ASBESTOS CONTAINING MATERIAL (ACM)

The Contractor is cautioned that suspect asbestos-containing material (ACM) is present within the project proximity as follows:

- Masonry Coating – on piers and deck fascia
- Premoulded Bituminous Joint

Work to be performed under this contract does not require the disturbance of this ACM and does not include any destruction, or removal of this ACM. The Contractor shall take precautions to not disturb this ACM in any way. Any inadvertent disturbance of the ACM resulting in the need for handling of this ACM shall require remediation of the ACM disturbed with handling only by employees appropriately certified in accordance with 12 NYCRR 56.
SPECIAL NOTE

PG BINDER AND MIX DESIGN LEVEL

Requirements of this note apply to all Section 402 and Section 404 Asphalt (HMA and WMA) items in this contract.

PG BINDER

Use a PG 64H-22 (High) meeting the requirements of AASHTO M 332, *Standard Specification for Performance Graded Asphalt Binder using Multiple Stress Creep Recovery (MSCR)*, for the production of hot mix asphalt mixtures for this project. Terminal Blend Crumb Rubber modifier may be used for this PG binder.

When terminal blend CRM PG binder is used, the following shall apply:

- Crumb rubber particles shall be finer than #30 sieve size.
- The CRM PG binder shall be storage-stable and homogeneous.
- The Dynamic Shear Rheometer (DSR) shall be set at 2-mm gap.
- The CRM PG binder shall be 99% free of particles retained on the 600 µm sieve as tested in accordance with Section 5.4 of M 332.

Use of polyphosphoric acid (PPA) to modify the PG binder properties is prohibited for mixtures containing limestone, limestone as an aggregate blend component, limestone as a constituent in crushed gravel aggregate, or recycled asphalt pavement (RAP) that includes any limestone. This prohibition also applies to the use of PPA as a cross-linking agent for polymer modification.

MIX DESIGN

The mixture designs must be developed in accordance with the criteria specified in the HMA items that are appropriate for an Estimated Traffic Level of <30 Million ESALs.

**Note:** The PG binder for this project may be modified with CRM additives to meet the requirements stated above. Handling of the HMA shall be discussed at pre-construction and pre-paving meetings.
SPECIAL NOTE

OPTIONAL USE OF WARM MIX ASPHALT (WMA) TECHNOLOGIES

The contractor has the option of using an Approved WMA Technology in the production of all 402, Hot Mix Asphalt (HMA) items, except SUPERPAVE HMA with Ice Retardant items, Waterproofing Bridge Deck HMA items, and Paver-Placed Surface Treatment items, at no additional cost to the State.

If the contractor chooses to use a WMA technology, the provisions of §401 and §402 shall apply including the following:

Use an approved technology appearing on the Approved List for Technologies for Warm Mix Asphalt. Design a mixture using a WMA Technology in accordance with MM 5.16, Superpave Hot Mix Asphalt Mixture Design and Mixture Verification Procedure. At a minimum, a one point verification of the mixture’s volumetric properties is acceptable for the following situations:

- When the WMA mix design is based on an existing Production Status HMA mix design.
- When the WMA mix design is based on, and utilizes a different WMA technology than, an existing Production Status WMA mix design.

Comply with the latest manufacturer’s “Production, Testing, and Compaction Details” from the Approved List for incorporating the WMA technology. Test specimens may be made from plant produced or laboratory prepared WMA. Test specimens must be made from plant produced WMA if adding the WMA technology in the lab does not simulate the production process. The Regional Materials Engineer (RME) may require a State representative be present during the fabrication and testing. Submit the WMA design to the RME for review and verification at least 14 calendar days before production, including:

- Name of WMA technology and the target dosage rate.
- If using an additive other than water,
  - Submit a MSDS for the additive.
  - Submit either enough of the additive for the laboratory mix design verification, or the additive pre-blended in the PG Binder at the correct dosage. If the additive is not pre-blended into the PG Binder, include directions for properly incorporating the additive into the laboratory made mixture.
- Prior to the submission of any mix design, contact the RME to determine if there is an increased concern regarding the mixture’s moisture susceptibility based on the WMA technology and/or the type of aggregate being used, or the performance of similar mixes. The RME may require AASHTO T 283 moisture susceptibility test results, meeting a minimum Tensile Strength Ration (TSR) of 80%, as part of the mix design submission.

Submit Production Quality Control Plan revisions incorporating the WMA technology if not previously submitted.

For 80 Series Compaction Method, complete all breakdown roller passes before the mat temperature falls below 230° F, unless approved by the Director, Materials Bureau.

When the asphalt mixture is being placed over a Sheet-Applied Waterproofing Membrane, maintain a minimum delivery temperature in accordance with the Material Detail Sheets prepared by the membrane manufacturer.
HMA WITH CRUSHED GLASS

SCOPE. This specification covers the requirements for the addition of crushed glass to hot mix asphalt mixtures. The provisions of Section 402 - Hot Mix Asphalt (HMA) Pavements applies except that the Contractor has the option of blending of the crushed glass in the following mixes:

1 1/2 inch  Nominal Max. Size
1 inch       Nominal Max. Size
3/4 inch     Nominal Max. Size

Truing and Leveling Course

If the Contractor chooses the crushed glass option, the following modifications to the Standard Specifications shall apply:

MATERIAL REQUIREMENTS

Crushed glass shall be subject to the approval of the Regional Materials Engineer prior to its use. The crushed glass shall contain no more than 1% (by weight) contaminants and shall meet the following gradation:

<table>
<thead>
<tr>
<th>Sieve Size</th>
<th>Percent Passing</th>
</tr>
</thead>
<tbody>
<tr>
<td>3/8 inch</td>
<td>100</td>
</tr>
<tr>
<td>1/4 inch</td>
<td>90 - 100</td>
</tr>
<tr>
<td>No. 30</td>
<td>0 - 20</td>
</tr>
</tbody>
</table>

Note: The gradation requirements may be modified upon approval by the Regional Materials Engineer.

Crushed glass may be included in the mixture up to 5%, maximum, of the total aggregate weight. The crushed glass, aggregate, and Performance-Graded Binder (PGB) shall meet the requirements specified in the Standard Specification §401-2.01 Hot Mix Asphalt Designs and §401-2.04 Performance-Graded Binder.

CONSTRUCTION DETAILS

The crushed glass shall be proportioned from a separate feed bin approved by the Regional Materials Engineer. In addition, all requirements pertaining to aggregate shall apply to crushed glass including the equipment requirements for automatic proportioning and recording as stipulated for aggregate in §401-3.08.

METHOD OF MEASUREMENT. The provisions of §401-4 and §402-4, Method of Measurement, shall apply.

BASIS OF PAYMENT. The provisions of §402-5, Basis of Payment, shall apply.
USE OF RECLAIMED ASPHALT SHINGLES (RAS) IN THE PRODUCTION OF ASPHALT MIXTURES

DESCRIPTION. The requirements below cover the use of Reclaimed Asphalt Shingles (RAS) in the production of asphalt mixtures. Sections 401 and 402 of the NYS Standard Specifications apply except as modified herein.

MATERIAL REQUIREMENTS

The Contractor has the option of using the following:

- Manufactured Waste (MW) RAS may be used in shim, base, binder, and top courses (excluding 6.3 HMA Top Course, Waterproofing Bridge Deck Overlay, and Ice Retardant mixtures).
- Post Consumer Waste (PCW) RAS and may be used in shim, base and binder courses.

The RAS must be stockpiled at the plant facility and shall be subject to the approval of the Regional Materials Engineer (RME) prior to its use. RAS shall meet the following requirements:

- Shall be from a source that has obtained a beneficial use determination (BUD) from the NYS Department of Environmental Conservation (DEC) as specified in 6 NYCRR 360-1.15.
- Shall be certified to be asbestos free.
- Shall be completely free of nails. In addition, it shall contain no more than 1% by weight of other deleterious materials such as glass, wood, plastic, etc.
- Shall meet the following gradation:

<table>
<thead>
<tr>
<th>Sieve Size</th>
<th>Percent Passing</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Min.</td>
</tr>
<tr>
<td>½ inch (6.3 mm)</td>
<td>100</td>
</tr>
<tr>
<td>#4 (4.75 mm)</td>
<td>90</td>
</tr>
<tr>
<td>#8 (2.36 mm)</td>
<td>75</td>
</tr>
<tr>
<td>#16 (1.18 mm)</td>
<td>50</td>
</tr>
<tr>
<td>#30 (0.600 mm)</td>
<td>30</td>
</tr>
<tr>
<td>#50 (0.300 mm)</td>
<td>15</td>
</tr>
<tr>
<td>#100 (0.150 mm)</td>
<td>5</td>
</tr>
<tr>
<td>#200 (0.075 mm)</td>
<td>-</td>
</tr>
</tbody>
</table>

The maximum RAS allowed in the mixture is 2% by weight of the total mixture. A Control Plan for using shingles in HMA shall be developed and submitted to the Regional Materials Engineer detailing the control and testing of the stockpiles. RAS shall be uniformly blended with RAP to reduce clumping and must be stockpiled separate from other stockpiles. Other methods of reducing RAS clumping can be utilized with the approval of the RME.

Rejuvenator. A rejuvenator shall be added to PCW RAS using a pugmill or similar equipment to pre-blend and stockpile the rejuvenated PCW RAS. Alternatively, a spray system may be used to spray the rejuvenator onto the PCW RAS prior to its introduction into the plant mixer.
USE OF RECLAIMED ASPHALT SHINGLES (RAS) IN THE PRODUCTION OF ASPHALT MIXTURES

rejuvenator shall meet the requirements of ASTM D 4552, *Standard Practice for Classifying Hot-Mix Recycling Agents*. Other liquid products or methods which facilitate softening of the PCW RAS binder may be used with the approval of the Regional Materials Engineer. The application rate shall be as recommended by the rejuvenator supplier.

**Mixture Design.** Prior to production of the HMA, the mixture design shall be developed to meet all the requirements in the latest Materials Method (MM) 5.16, *Hot Mix Asphalt (HMA) Mixture Design and Mixture Verification Procedures*, available on the Department’s website. The mixture design shall also meet the performance test criteria listed in the table below. The testing must be performed by an AASHTO Materials Reference Laboratory (AMRL) approved laboratory that has the capability of performing these tests. When RAS is used in conjunction with RAP, the total percentage of reclaimed material shall not exceed the maximum of 20% for Top Course and Binder Course, and 30% for Base Course currently allowed under the specifications during the production of HMA.

</tbody>
</table>

**Reclaimed PG Binder Ratio:** The ratio of reclaimed PG binder from the RAP and RAS to the total PG binder content shall not exceed 0.2.

**CONSTRUCTION DETAILS**

The provisions of Section 401 and Section 402 apply except that the RAP/RAS stockpile shall be tested at a frequency of at least once per day of production to determine the asphalt content and the gradation of the combined reclaimed material.
REINFORCEMENT FOR CEMENT CONCRETE

Bar reinforcement and wire fabric specified in the Contract Documents shall be in accordance with the following:

**Bar Reinforcement** used on this project shall meet the requirements of Section 709-01 *Bar Reinforcement, Grade 60*, or Section 709-14 *Bar Reinforcement, Grade 75*, as detailed on the plans. No substitutions will be allowed. Bar reinforcement (for the items listed below) shall be galvanized and fabricated in accordance with ASTM A767 and meet the requirements of Section 709-11 *Galvanized Bar Reinforcement*. The requirements of ASTM A767 Section 6.8 (Chromating) will not be waived.

**Wire Fabric Reinforcement** used on this project (for the items listed below) shall meet the requirements of Section 709-02 *Wire Fabric for Concrete Reinforcement*. Any Wire Fabric Reinforcement required for the items listed below shall be galvanized in accordance with Section 719-01 *Galvanized Coatings and Repair Methods*, Type I. Galvanized Wire Fabric Reinforcement shall be fabricated and galvanized in accordance with ASTM A123 and ASTM A767. The requirements of ASTM A767 Section 6.8 (Chromating) will not be waived.

Item Numbers that require the use of *Galvanized Bar Reinforcement* and/or *Galvanized Wire Fabric Reinforcement* on this project are as follows:

- 557.30
- 578.120901
- 580.01
- 581.01
- 670.2004
- 670.2005

**Reinforcement for Reinforced Concrete Pipe and Related Drainage Structures** shall meet the requirements of Section 706 – *Concrete, Clay, and Plastic Pipe*.
ARCHIVING

DELETE Section 202.10 of the New York State Steel Construction Manual in its entirety and ADD the following:

ARCHIVING – After successful erection of the steel components and prior to final acceptance, the Contractor shall deliver two (2) complete sets of final signature approved shop drawings in the Tag Image File Format (tiff), CCITT group IV, 2D compression minimum 200 dpi on two (2) separate compact discs. Thereafter, these shall remain the property of the New York State Thruway Authority.

For a list of Items requiring archiving disc of final signature approved shop drawings see Appendix G of the New York State Steel Construction Manual.

The Contractor shall also deliver the original signature approved hard copy of all drawings requiring a Professional Engineer’s signature and stamp.

Items requiring a Professional Engineer’s signature and stamp include, but are not limited to, erection, demolition, and transportation drawings.

Final payment will be held until the above requirements are met.
SPECIAL NOTE

BRIDGE WASHING WASTE

The solid waste material generated by the debris collection and pressure washing operation may contain organic and non-organic matter such as sand, soil, loose pavement material, paper, bird nests, animal droppings, other trash and debris, and loose rust and paint. The collection, storage, transport and disposal of waste generated by this work shall be managed in accordance with the provisions of §107-10 Managing Surplus Material & Waste. All sand, dirt, cinders, and other trash and debris collected from the bridge shall be disposed of at a suitable disposal facility.
Compliance Requirements and Procedures

For Participation of Disadvantaged/Minority/Women/Service-Disabled Veteran-Owned Business Enterprises and Equal Employment Opportunity on NYS Thruway Authority Contracts

(DBE/MWBE/SDVOB/EEO)
The New York State Thruway Authority herein after, (“Authority”) is committed to providing and ensuring Minority-owned Business Enterprises (MBE), Women-owned Business Enterprises, (WBE) Service-Disabled Veteran-Owned Business Enterprises (SDVOB) and Disadvantaged Business Enterprises (DBE) with opportunities to participate in the Authority’s contracting and procurement processes in accordance with Title 49, Part 26 of the United States Code of Federal Regulations (CFR), New York State Executive Law, Articles 15-A, 17-B, and all applicable federal and state laws, rules, regulations and Executive Orders, including but not limited to Executive Order 177 - Prohibiting State Contracts with Entities that Support Discrimination, as incorporated herein and/or contained in the NYS Department of Transportation Standard Specifications Section 102, “Bidding Requirements and Conditions” to the extent applicable to the contract.

Goal(s) have been established for this Contract/Agreement, expressed as a percentage of the total Contract/Agreement amount as follows:

**Disadvantaged Business Enterprise - DBE** (Federal-Aid)

Disadvantaged Business Enterprise (DBE) Participation Goal: ____%  
Directories and/or Information related to the current certification status of Disadvantaged Business Enterprises can be obtained from the New York State Certified DBEs website at: https://nysucp.newnycontracts.com

**Minority/Women-Owned Business Enterprise - MWBEs** (Non Federal-Aid)

Minority Business Enterprise (MBE) Participation Goal 3 %  
Women's Business Enterprise (WBE) Participation Goal 5 %  
Directories and/or information related to the current certification status of Minority/Women Business Enterprises can be obtained from the New York State Certified MWBE website at: ny.newnycontracts.com

**Service-Disabled Veteran-Owned Business Enterprise (SDVOB)**

Service-Disabled Veteran-Owned Business Participation Goal 1 %  
Directories and/or information related to the current certification status of Service-Disabled Veteran Business Enterprises can be obtained from the New York State Certified SDVOB website at: ogs.nv.gov/veterans/

**Equal Employment Opportunity**

Minority 17 %  
Female 6.9 %  
For more information about the development of the goals, see Federal Register, Vol. 45, No. 194, at 65976-65991 (October 3, 1980) (minorities) and Federal Register, Vol. 45, No. 251 at 85750-85751 (December 30, 1980) (females). The text of these Federal Register notices can be found at Federal Register Notice: Vol. 45, No. 194, at 65976-65991 (October 3, 1980)

Training Special Provisions  

1/ Yes 0/ No  
Training/Special Provision supplements each of the foregoing prescribed specific Equal Employment Opportunity percentage goals for utilization of minorities and women in the performance of work for the geographic location of the contract, included in this Proposal entitled “Equal Employment Opportunity (EEO) Requirements.”

**Elevator constructors**……… 5.5 to 6.5  **Boilermakers**………………… 13.0 to 15.5

All others ..........................16.4 to 17.5

### GOALS FOR FEMALE PARTICIPATION

Goal _________________________________________________ 6.9%
COMPLIANCE REQUIREMENTS AND PROCEDURES

It is the policy of the New York State Thruway Authority ("Authority") to comply with the provisions of Article 15-A of the New York State Executive Law, which requires that every contract over $25,000 will afford equality of economic opportunities for minority group members and women, the facilitation of participation by minority-owned business enterprises and women-owned business enterprises. The Authority shall establish separate goals for participation of certified minority-owned business enterprises and women-owned business enterprises on all Authority contracts where applicable.

In addition, it is the policy of the Authority to ensure participation of DBEs on Federal-Aid contracts, pursuant to the provisions of Title 49, Part 26 of the United States Code of Federal Regulations.

Article 17-B of the New York State Executive Law provides for more meaningful participation in public procurement by certified Service-Disabled Veteran-Owned Business Enterprises ("SDVOBs"); thereby further integrating such businesses into New York State’s economy. The Authority recognizes the need to promote the employment of service-disabled veterans and to ensure that certified SDVOBs have opportunities for maximum feasible participation in the performance of Authority contracts.

The Authority is further committed to providing equal training and employment opportunities to minorities and women to participate in the Authority’s contracting and procurement processes, and by ensuring nondiscrimination in accordance with Appendix A - Standard Clauses for New York State Thruway Authority Contracts, including Clause 4 – Non-Discrimination Requirements, Clause 11 - Equal Employment Opportunities for Minorities and Women, Executive Order 11246, Executive Order 177, Training/Special Provisions and/or all applicable, federal, state, laws, rules, regulations and Executive Orders.

1. GENERAL PROVISIONS

   A. The Contractor and/or all subcontractors/subconsultants, shall comply with the applicable laws, rules, regulations and provisions governed by this Contract/Agreement, in addition to any nondiscrimination or diversity practices and provisions of the Contract/Agreement at no additional cost to Authority.

   B. These provisions and requirements shall be included in all subcontracting/subconsultant contracts/agreements so that these requirements and provisions shall be binding upon all subcontractors/subconsultants, performing work under this Contract/Agreement.
2. MINORITY/WOMEN-OWNED BUSINESS ENTERPRISES (MWBEs)

In accordance with Article 15-A of the Executive Law, including regulations promulgated thereunder, the Authority has established the Minority-Owned Business Enterprise (“MBE”) and/or Women-Owned Business Enterprise (“WBE”) participation goals for this Contract/Agreement. Contractor shall facilitate MWBE participation for the scopes of work to be performed under this Contract/Agreement, to satisfy the participation goals, or document good faith efforts taken to fulfill the goals in a manner prescribed by the Authority in accordance with the Compliance Requirements and Procedures specified herein.

The goals are applicable to the total amount payable under any Contract/Agreement awarded from this procurement and any changes made to the Contract/Agreement.

1. The Authority establishes MWBE goals for all applicable contracts. The MWBE goals for this Contract/Agreement are located on the “Contract Goals” page of this document and can also be found in the contractors/consultants documents for this Contract/Agreement.

2. For purposes of providing meaningful participation to certified MWBEs on this Contract/Agreement and in an effort to attain the certified MWBEs contract goals identified for this Contract/Agreement, the Contractor should reference the directory of MWBEs at the following internet address: ny.newnycontracts.com.

3. The Contractor understands that only sums paid to MWBEs for the performance of a Commercially Useful Function, as that term is defined in 5 NYCRR § 140.1, may be applied towards the achievement of the applicable MWBE participation goal.

In the performance of this Contract/Agreement, the monetary value of fees, or markup percentage, charged by the MWBE shall be deemed to represent the Commercially Useful Function of the MWBE serving as a broker.

4. The Contractor agrees to provide, upon request by the Authority, documentation and/or evidence of actions taken to demonstrate “Good Faith Efforts,” in accordance with 5 NYCRR § 142.8, to provide meaningful participation by MWBEs as subcontractors and suppliers in the performance of this Contract/Agreement.

3. MWBE UTILIZATION REQUIREMENTS

The Contract’s/Agreement’s MWBE goals have been established by the Authority based on certified MWBE availability, job assignments, services to be performed and/or type of work to be performed under the Contract/Agreement.

In the performance of this Contract/Agreement, 60% of the total participation value shall be deemed to represent the Commercially Useful Function of the MWBE serving as a supplier and the mark up and/or broker’s fee shall represent the Commercially Useful Function of the MWBE serving as a broker.

A. The Contractor shall certify that the Utilization Plan identifies all subcontractors/subconsultants reflected on Exhibit D of the Contract/Agreement.

B. The Contractor agrees to adhere to the approved MWBE Utilization Plan in the performance of the Contract/Agreement.
C. The Contractor further agrees that failure to submit and/or adhere to such MWBE Utilization Plan shall constitute a material breach of the terms of the Contract/Agreement. Upon the occurrence of such a material breach, the Authority shall be entitled to any remedy provided herein, including but not limited to, a finding that the Contractor is non-responsible.

Utilization Plan - All Subcontractors (TA-W1022)

4. REPORTING

The Contractor is required to submit forms TA-1023 or TA-W1059 on or before the 10th of each month, following the month being reported. Monthly reports must be submitted via email, to Compliance@thruway.ny.gov, however, during the term of the contract, the Contractor may arrange to provide such reports via a non-electronic method to the Authority by the 10th day following the end of each month during the term of the Contract/Agreement.

TA-W1023 Payments to DBE/MWBE Subcontractor Firms

5. COMPLIANCE

The Contractor will comply with any procedures and guidelines established by the Director of the Division of Minority and Women-Owned Business Enterprise (hereinafter the Director) under the authority of New York State Governor’s Executive Order 8, issued August 3, 1983 (hereinafter Executive Order 8) and will comply with any rules, regulations and orders of the Director as may be promulgated pursuant to or under the authority of Executive Order 8, or other applicable law or order.

6. MWBE WAIVERS

A. Prior to submission of a request for a partial or total waiver, Contractor shall speak to someone from the Authority’s Office of Compliance for guidance.

B. In accordance with 5 NYCRR § 142.7, a Contractor that is able to document good faith efforts to meet the goal requirements, as set forth herein, may submit a request for a partial or total waiver on Form TA-W1077, accompanied by supporting documentation. A Contractor may submit the request for waiver at the same time it submits its MWBE Utilization Plan.

Supporting documentation of good faith efforts shall include, but not be limited to:

1. Evidence of targeted and specific outreach to MWBEs;
2. Logs, written correspondence, records of telephone contacts and other information to document responses from MWBEs to the Contractor outreach;
3. Copies of advertisements for participation by MWBEs in appropriate general circulation, trade, and minority or women-oriented publications;
4. The dates of attendance at any pre-bid, pre-award, or other meetings, if any, scheduled by the Authority with MWBEs; and,
5. Information describing specific steps undertaken by the Contractor to reasonably structure the Agreement’s scope of work to maximize opportunities for MWBE participation.

C. If a request for waiver is submitted with the MWBE Utilization Plan and is not approved by the Authority at that time, the provisions of clauses (C - H) will apply.

If the documentation included with the Contractor waiver request is complete, the Authority shall evaluate the request and issue a written notice of acceptance or denial within 20 business days of receipt.

D. Contractor shall attempt to utilize, in good faith, certified MWBEs, during the performance of the Contract/Agreement. Requests for a partial or total waiver of established goal requirements may be made to the Authority, at time of bid/proposal submission, subsequent to award of the Contract/Agreement or at any time during the term of the Contract/Agreement, but must be made no later than prior to the submission of a request for final payment on the Contract/Agreement.

E. If the Authority, upon review of the MWBE Utilization Plan and Monthly MWBE Form TA-1023 – Payments to DBE/MWBE/SDVOBs, determines that Contractor is failing or refusing to comply with the Contract’s/Agreement’s MWBE goals and no waiver has been granted in regards to such non-compliance, the Authority may issue a notice of deficiency to the Contractor.

F. The Contractor must respond to the notice of deficiency within seven business days of receipt. Such response may include a request for partial or total waiver of the Contract’s/Agreement’s MWBE goals.

G. If the Contractor, after making good faith efforts, is unable to achieve the MWBE goals stated herein, the Contractor may submit a request for a waiver to the Office of Compliance. Such waiver request must be supported by evidence of the good faith efforts by the Contractor to achieve the maximum feasible MWBE participation towards the applicable MWBE goals. If the documentation included with the waiver request is complete, the Authority shall evaluate the request and issue a written notice of approval or denial within twenty (20) business days of receipt.

H. If the Authority, upon review of the MWBE Utilization Plan and the forms TA-W1023 or TA-W1059 as described in Section 4, or any other relevant information, determines that the Contractor is noncompliant, deficient or failing to document the good faith efforts to meet the Contract’s/Agreement’s MWBE goals or requirements and no waiver has been issued in regards to such non-compliance, the Authority may issue a notice of deficiency to the Contractor. The Contractor must respond to the notice of deficiency letter within seven (7) business days of receipt. Such response may include a request for partial or total waiver of the Contract’s/Agreement’s MWBE goals.

Waiver requests shall be sent to the Authority’s Office of Compliance at Compliance@thruway.ny.gov.
Contractor Forms:

Forms are located at: [thruway.ny.gov/business/contractors/forms/index.html](thruway.ny.gov/business/contractors/forms/index.html)

Questions regarding compliance with MWBE participation goals, requirements and provisions should be directed to the Authority’s Office of Compliance.

7. NON-COMPLIANCE

A. Where the Authority determines that the Contractor is not in compliance with the requirements specified herein and/or other contract requirements, refuses to comply with such requirements, or if the Contractor is found to have willfully and intentionally failed to comply with the MWBE participation goals, the Contractor may be found in breach of the contract, which may result in withholding of any mobilization pay item and monthly estimates, a delay in award of the Contract/Agreement, a finding that the Contractor is non-responsible, and/or the Authority may impose liquidated damages.

B. Such liquidated damages shall be calculated as an amount equaling the difference between:

1. All sums identified for payment to MWBEs had the Contractor achieved the contractual MWBE goals; and

2. All sums actually paid to MWBEs for work performed or materials supplied under the Contract/Agreement.

C. In the event a determination has been made by the Authority, after Contractor has been afforded due process, which requires the payment of liquidated damages, Contractor shall pay such liquidated damages to the Authority within sixty (60) days after such determination or the Authority shall have the ability to withhold such amount from Contractor unless prior to the expiration of such sixtieth day, the Contractor has filed a complaint with the Director of the Division of Minority and Women’s Business Development pursuant to 5 NYCRR § 142.12, in which event the liquidated damages shall be payable or withheld from the Contractor only in the event of a determination adverse to the Contractor following the complaint process.
Article 17-B of the New York State Executive Law provides for meaningful participation in public procurement by certified Service-Disabled Veteran-Owned Business Enterprises ("SDVOB"), thereby further integrating such businesses into New York State's economy. The Authority recognizes the need to ensure that certified SDVOBs have opportunities for maximum feasible participation in the performance of Authority contracts. In recognition of the service and sacrifices made by service-disabled veterans and in recognition of their economic activity in doing business in New York State, Contractor is required to foster participation of SDVOBs in the fulfillment of the requirements of the Contract/Agreement.

In accordance with Article 17-b of the Executive Law, including regulations promulgated thereunder, the Authority has established the SDVOB participation goals for this Contract/Agreement, set forth in the “Contract Goals” page of this agreement.

Contractor shall facilitate SDVOB participation for the scopes of work to be performed under this Contract/Agreement, and/or document good faith efforts taken to achieve the goals in a manner prescribed by the Authority in accordance with the Compliance Requirements and Procedures specified herein.

1. **SDVOB GOALS**

The goals are applicable to the total amount payable under this Contract/Agreement and any changes made to the Contract/Agreement.

1. The Authority establishes SDVOB goals for all applicable contracts/agreements. The SDVOB goals for this Contract/Agreement are located on the “Contract Goals” page of this document and can also be found in the procurement documents pertaining to this Contract/Agreement.

2. For purposes of providing meaningful participation to certified SDVOBs on this Contract/Agreement and in an effort to attain the certified SDVOB goals for this Contract/Agreement, the Contractor should reference the directory of SDVOBs at the following internet address: [online.ogs.ny.gov/SDVOB/search](http://online.ogs.ny.gov/SDVOB/search)

3. Contractor must document "Good Faith Efforts" to provide meaningful participation by SDVOBs as subcontractors or suppliers in the performance of the Contract/Agreement (see clause 4 below).

2. **SDVOB UTILIZATION PLANS**

A. In accordance with 9 NYCRR § 252.2(i), Bidders/Proposers are required to submit a completed SDVOB Utilization Plan on Form TA-W1022 within 10 business days of letting.

B. The Utilization Plan shall list the certified SDVOBs that the Contractor intends to use to perform work on the Contract/Agreement, a description of the work that the Contractor intends the SDVOB to perform to meet the goals on the Contract/Agreement, the estimated dollar amounts to be paid to a certified SDVOB, or, if not known, an estimate of the percentage of Contract/Agreement work the SDVOB will perform. By signing the Utilization Plan, the Contractor acknowledges that making false representations or providing information that shows a lack of good faith as part of, or in conjunction with, the submission of a Utilization Plan is prohibited by law and may result in penalties including, but not limited to, termination of a Contract/Agreement.
contract for cause, loss of eligibility to submit future bids, and/or withholding of payments. Any modifications or changes to the agreed participation by SDVOBs after the award of the Contract/Agreement and during the term of the Contract/Agreement must be reported on a revised Utilization Plan and submitted to the Authority’s Chief Compliance Officer for approval.

C. The Authority will review the submitted SDVOB Utilization Plan and advise the Contractor of the Authority’s acceptance or issue a notice of deficiency within 20 business days of receipt.

D. If a notice of deficiency is issued, Contractor agrees that it shall respond to the notice of deficiency, within seven business days of receipt, by submitting to the Authority a written remedy in response to the notice of deficiency. If the written remedy that is submitted is not timely or is found by the Authority to be inadequate, the Authority shall notify the Contractor and direct the Contractor to submit, within five business days of notification by the Authority, a request for a partial or total waiver of SDVOB participation goals on Form TA-W1077 Contractor/Consultant Waiver Request. Failure to file the waiver request form in a timely manner may be grounds for disqualification of the bid or proposal.

E. The Authority may disqualify a Contractor’s bid/proposal/letter of interest as being non-responsive under the following circumstances:

(a) If a Contractor fails to submit a SDVOB Utilization Plan;
(b) If a Contractor fails to submit a written remedy to a notice of deficiency;
(c) If a Contractor fails to submit a request for waiver; or
(d) If the Authority determines that the Contractor has failed to document and/or demonstrate good faith efforts.

F. If Contractor is awarded a Contract/Agreement, Contractor certifies that it will follow the submitted SDVOB Utilization Plan for the performance of SDVOBs on the Contract/Agreement in accordance with the prescribed SDVOB compliance requirements and procedures for the Contract/Agreement goals set forth in this agreement.

G. Contractor further agrees that failure to use SDVOBs as agreed in the Utilization Plan shall constitute a material breach of the terms of the Contract/Agreement. Upon the occurrence of such a material breach, the Authority shall be entitled to any remedy provided herein, including but not limited to, a finding of Contractor non-responsibility.

3. SDVOB WAIVER

A. Prior to submission of a request for a partial or total waiver, Contractor shall speak with someone from the Authority’s Office of Compliance for guidance.

B. In accordance with 9 NYCRR § 252.2(m), a Contractor that is able to document good faith efforts to meet the goal requirements, as set forth herein, may submit a request for a partial or total waiver on Form TA-W1077, accompanied by supporting documentation. A Contractor may submit the request for waiver at the same time it submits its SDVOB Utilization Plan.

If a request for waiver is submitted with the SDVOB Utilization Plan and is not approved by the Authority at that time, the provisions of clauses 2 (C), (D) & (E) will apply. If the documentation
included with the Contractor's waiver request is complete, the Authority shall evaluate the request and issue a written notice of acceptance or denial within 20 days of receipt.

C. Contractor shall attempt to utilize, in good faith, certified SDVOBs, during the performance of the Contract/Agreement. Requests for a partial or total waiver of established goal requirements may be made to the Authority, at time of bid submission, subsequent to Contract/Agreement award or at any time during the term of the Contract/Agreement, but must be made no later than prior to the submission of a request for final payment on the Contract/Agreement.

D. If the Authority, upon review of the SDVOB Utilization Plan and Monthly SDVOB Form TA-1023 Payments to DBE/MWBE/SDVOBs determines that Contractor is failing or refusing to comply with the contract goals and no waiver has been granted in regards to such non-compliance, the Authority may issue a notice of deficiency to the Contractor.

The Contractor must respond to the notice of deficiency within seven business days of receipt. Such response may include a request for partial or total waiver of the Contract/Agreement SDVOB goals.

Waiver requests shall be sent to the Authority’s Office of Compliance at Compliance@thruway.ny.gov.

4. GOOD FAITH EFFORTS

In accordance with 9 NYCRR § 252.2(n), Contractor must document their good faith efforts toward utilizing SDVOBs on the Contract/Agreement. Evidence of required good faith efforts shall include, but not be limited to, the following:

(1) Copies of solicitations to SDVOBs and any responses thereto.

(2) Explanation of the specific reasons each SDVOB that responded to Contractor’s solicitation was not selected.

(3) Dates of any pre-bid, pre-award or other meetings attended by Contractor, if any, scheduled by the Authority with certified SDVOBs which the Authority determined were capable of fulfilling the SDVOB goals set in the Contract/Agreement.

(4) Information describing the specific steps undertaken to reasonably structure the Contract/Agreement scope of work for the purpose of subcontracting with, or obtaining supplies from, certified SDVOBs.

(5) Other information deemed relevant to the waiver request.

5. MONTHLY SDVOB CONTRACTOR COMPLIANCE REPORT

In accordance with 9 NYCRR § 252.2(q), Contractor is required to report Monthly SDVOB Contractor Compliance to the Authority during the term of the Contract/Agreement for the preceding month's activity, documenting progress made towards achieving the Contract/Agreement SDVOB goals.

This information must be submitted by the Contractor, using Form TA-1023 Payments to DBE/MWBE/SDVOBs available on the Authority’s website, reflecting the preceding month's activities. Timely, complete and accurate forms must be submitted to
Compliance@thruway.ny.gov, by the 10th day of each month, with a courtesy copy to Thruway Project Engineer (TPE)/Engineer in Charge (EIC).

6. NON-COMPLIANCE

Where the Authority determines that the Contractor is not in compliance with the requirements specified herein and/or other contract requirements, refuses to comply with such requirements, or if the Contractor is found to have willfully and intentionally failed to comply with the SDVOB participation goals, the Contractor may be found in breach of the contract, which may result in withholding of any mobilization pay item and monthly estimates, a delay in award of the Contract/Agreement, a finding that the Contractor is non-responsible, and/or the Authority may impose other breach of contract damages.

7. BREACH OF CONTRACT AND DAMAGES

In accordance with 9 NYCRR § 252.2(s), any Contractor found to have willfully and intentionally failed to comply with the SDVOB participation goals set forth in the Contract/Agreement, shall be found to have breached the Contract/Agreement and Contractor shall pay damages equivalent to the Authority’s expenses for personnel, supplies and overhead related to establishing, monitoring, and reviewing certified Service-Disabled Veteran-Owned Business Enterprise programmatic goals for the specific Contract/Agreement.

Questions regarding compliance with SDVOB participation goals should be directed to the Authority’s Office of Compliance.

All forms are available at:

For Contractors: thruway.ny.gov/business/contractors/forms/index.html
For Consultants: thruway.ny.gov/business/consultants/forms/index.html
For Purchasers: thruway.ny.gov/business/consultants/forms/index.html

EQUAL EMPLOYMENT OPPORTUNITY AND REMOVAL OF INSTITUTIONAL POLICIES OR PRACTICES THAT FAIL TO ADDRESS THE HARASSMENT AND DISCRIMINATION OF INDIVIDUALS

Contractor agrees to comply with all Authority Compliance Requirements and Procedures, in accordance with the terms and conditions of Appendix A – Standard Clauses for New York State Thruway Authority Contracts including Clause 4 – Non-Discrimination Requirements and Clause 11 - Equal Employment Opportunities for Minorities and Women.

Equal Employment Opportunities for minority group members and women (“EEO”) and related provisions shall be deemed supplementary to, and not in lieu of, the nondiscrimination provisions required by New York State Executive Law Article 15 (the “Human Rights Law”) and other applicable federal, state, and local laws.

In the performance of this Contract/Agreement, Contractor shall demonstrate compliance with the Work Force Diversity Requirements and Procedures Regarding Equal Employment Opportunities for Minority Group Members and Women, pursuant to 5 NYCRR § 143, Executive Order 177, and all other applicable federal, state and local laws, rules and regulations.
The Contractor will be required to submit its written Policy Statement ensuring “Equal Employment Opportunity and Removal of Institutional Policies or Practices That Fail to Address the Harassment and Discrimination of Individuals,” to the Authority within 10 business days after the letting/bid opening.

During the performance of this contract, the Contractor agrees to comply with the Equal Employment Opportunity (EEO) requirements specified herein.

1. DEFINITIONS – As used in these requirements, the following definitions will apply:

A. “Covered Area” means the geographical area described in the solicitation from which this contract resulted or the geographic area within which this contract will be performed.

B. “Authority” means the New York State Thruway Authority.

C. “Executive Director” means the Executive Director of the New York State Thruway Authority, or his/her duly authorized representative.

D. “Office of Compliance” means the Thruway Authority’s Office of Compliance or his/her duly authorized representative.

F. “Minority” includes:

(i) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(ii) Hispanic (a person of Mexican, Puerto Rican, Dominican, Cuban, Central or South American descent of either Indian or Hispanic origin, regardless of race;

(iii) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast, Asia, the Indian Subcontinent, or the Pacific Islands); and

(iv) American Indian or Alaskan Native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification. Identification may be made by any suitable authority in the community such as an educational institution, religious organization, or a state agency).

2. NON-DISCRIMINATION CLAUSE

The Contractor will ensure equal employment opportunity by not discriminating against any applicant for employment because of race, color, religion, sex, national origin, age, disability, or marital status, regarding, (among other things) the following: upgrading, demotion, transfer, recruitment, recruitment advertising, layoff, termination, rates of pay or other forms of compensation and selection for training, including apprenticeship.

3. MINORITY AND WOMEN EMPLOYMENT GOALS

The Contractor shall make a good faith effort to ensure equal employment opportunity by taking the affirmative action’s set forth in paragraph 5A through P of these requirements. The Bidder’s/Proposer’s/Contractor’s/Consultant’s/Engineer’s success in achieving or bettering the goals set forth on the contract goals page, shall be a substantial factor in any determination of.
whether the Contractor has complied with its obligation to ensure equal employment opportunity in the performance of this Contract/Agreement. The goals are expressed as percentages of the total hours of employment and training that the Contractor should reasonably be able to give to female or minority employees in a certain covered area. The hours of minority and female employment and training must be substantially uniform throughout the length of the Contract/Agreement, and in each trade. These goals were established from materials published by the NYS Department of Economic Development based on appropriate workforce, demographic or other relevant data or labor force developed by the Division of Minority & Women’s Business Development utilizing the 1990 Census Data.

4. AFFIRMATIVE ACTION STEPS AND NON-FEDERAL TRAINING REQUIREMENTS

The Contractor shall implement affirmative action steps at least as extensive as the following:

A. Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor’s employees are assigned to work. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor’s obligation to maintain such a working environment, with specific attention to minority and female individuals working at such sites or in such facilities.

B. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations’ responses.

C. Maintain a current file of the name, address, and telephone number of each minority and female off-the-street applicant and minority or female referral from a union, a recruitment source, or community organization and of the action which was taken with respect to each such individual.

If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union, or if referred, not employed by the Contractor, this shall be documented in writing to the Office of Compliance and noted in the file with the reasons therefore, along with whatever additional actions the Contractor may have taken.

D. Provide immediate written notification to the Office of Compliance when the Contractor has information that the union referral process has impeded the Contractor’s efforts to meet its obligation.

E. Develop on-the-job training opportunities and/or participation in training programs which expressly include minorities and women, including upgrading programs and apprenticeships and trainee programs relevant to the Contractor’s employment needs, especially those programs funded or approved by the United States Department of Labor, the New York State Department of Labor, or the New York State Thruway Authority and appropriate for utilization on New York State Thruway Authority projects. The Contractor shall provide notice of these programs to the sources compiled under 5B. above. If the Contractor fails to develop or participate in such apprentice or training programs, its failure to meet the goal set forth herein will be presumed to be noncompliance with these requirements.

F. Disseminate the Contractor’s equal employment opportunity policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its equal employment opportunity obligations, by including it in any
policy, annual and collective bargaining agreement, by publicizing it in the company newspaper, annual report, and other similar items, by specific review of the policy with all management personnel and with all minority and female at least once a year, and by posting the Contractor’s equal employment opportunity policy on bulletin boards accessible to all employees at each location where work under this contract is performed.

G. Review, at least annually, the Contractor’s equal employment opportunity policy and affirmative action obligations under this requirement with all employees having any responsibility for hiring, assignment, layoff, termination, or other employment decision, including specific review of these items with on-site supervisory personnel such as superintendents, general forepersons, etc., prior to the initiation of work at any job site.

A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

H. Disseminate the Contractor’s equal employment opportunity policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to, and discussing the Contractor’s equal employment opportunity policy with, other Contractors and subcontractors with whom the Contractor does or anticipates doing business.

I. Direct its recruitment efforts, both oral and written, to minority, female, and community organizations, to schools with minority and female students, and to minority and female students, and to minority and female recruitment and training organizations serving the Contractor’s recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above describing the openings, screening procedures, and tests to be used in the selection process.

J. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer, and vacation employment to minority and female youth both on the site and in other areas of the Contractor’s workforce.

K. State in all solicitations or advertisements for employees placed by or on behalf of the Contractor that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability, or marital status.

L. Conduct, at least annually, an inventory and evaluation of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for such opportunities through appropriate training or other similar activities.

M. Ensure that seniority practices, job classifications, work assignments, and other personnel practices do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the equal employment opportunity policy and the Contractor’s obligations under this requirement are being carried out.

N. Ensure that all facilities and company activities are non-segregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

O. Send to each labor union or representative of workers with which the Contractor has a collective bargaining agreement or other contract or understanding, a notice advising the said labor union or workers’ representative of the Contractor’s commitments under this requirement
and post copies of the notice in conspicuous places available to employees and applicants for employment.

P. Conduct a review, at least annually, of all supervisors’ adherence to, and performance under, the Contractor’s equal employment opportunity policies and affirmative action obligations.

5. CONTRACTOR/CONSULTANT ASSOCIATIONS

Contractor is encouraged to participate in voluntary associations which assist in fulfilling one or more of their affirmative action obligations. The efforts of a contractor association, joint contractor union, contractor community, or other similar group of which the Contractor is a member and participant, may be asserted as fulfilling one or more of its obligations under this requirement provided that the Contractor actively participates in the group, makes every effort to ensure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the Contractor’s minority and female workforce participation, makes a good faith effort to meet its individual goals, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the Contractor. The obligation to comply, however, is the Contractor’s and failure of such a group to fulfill an obligation shall not be a defense for the Contractor’s noncompliance.

6. TRANSFER OF MINORITY OR FEMALE EMPLOYEES

Through implementing the affirmative action’s set forth above and the Contractor’s other efforts to ensure equal employment opportunity, the Contractor must have made a commitment to employ minorities and women throughout the life of the contract. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting the Contractor’s goals shall be violation of the contract.

7. CREDITING NON-WORKING TRAINING HOURS TOWARD EMPLOYMENT GOALS

In order for the non-working training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the Contractor during the training period, and the Contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the United States Department of Labor, the New York State Department of Labor or the New York State Thruway Authority and appropriate for utilization on the New York State Thruway Authority projects.

8. REQUIRED RECORDS

A. The Contractor shall designate a responsible official to monitor all employment related activity to ensure that the Contractor’s equal employment opportunity policy is being carried out and to keep records. The records shall include the names, address, telephone number, construction trade, union affiliation, if any, employee identification number when assigned, social security number, race, sex, status (e.g. mechanic, apprentice, trainee, helper or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay and locations at which the work was performed for each employee.

Records shall be maintained in an understandable and retrievable form. To the extent that records kept by the Contractor for other purposes satisfy the requirements of this paragraph, the Contractor need not maintain separate records.
B. Contractor shall submit on a monthly basis “Monthly Workforce Utilization Composite” (Form TA-W1017) to the TPE/EIC for approval and submitted electronically upon approval to Compliance@thruway.ny.gov. The report shall reflect a monthly composite of the total cumulative hours of work for the entire project workforce (including all subcontractors) from the start of the contract through the contract ending date. For the purpose of composite reporting, the employment and training hours for females and minorities shall be calculated separately. Female utilization hours (minority and non-minority) shall be counted towards female utilization and minority female utilization hours shall also be counted towards minority utilization hours.

C. All records required by this Section must be retained for a period of six years following completion of the contract work and shall be available at reasonable times and places for inspection by authorized representatives of the Authority or the Office of Compliance.

9. GOALS NOT TO BE USED TO DISCRIMINATE

The Contractor shall not use the goals or affirmative action requirements to discriminate against any person because of race, color, religion, sex, national origin, age disability, or marital status.

10. AVAILABILITY OF CONTRACTOR’S RECORDS

The Contractor will furnish all information and reports as may be required by the Authority or by rules, regulations and orders incorporated herein by the Authority and will permit access to its books, records and accounts by the Authority’s Office of Compliance for purposes of monitoring and investigating compliance with these requirements and such rules, regulations, orders, procedures and guidelines.

11. ENFORCEMENT

In order to determine whether the Contractor has complied with the requirements, the Authority may proceed by order to show cause, compliance conference, hearing or any other lawful procedure upon due notice in writing to the Contractor. In the event the Authority finds that the Contractor has failed to comply with these requirements, this contract may be canceled, terminated, or suspended in whole or in part or liquidated damages may be imposed in accordance with the procedures authorized in Section 312 of Executive Law 15-A, Section 40 of the Highway Law, provisions of this Contract/Agreement, relevant laws and statutes as deemed appropriate by the Authority, at no cost or liability to the Authority.

In accordance with EO 177 entitled “Prohibiting State Contracts with Entities that Support Discrimination”, provisions of this Contract/Agreement and Section 40 of the Highway Law, the Contractor may be declared ineligible for further New York State government contract or construction contracts, and such other sanctions may be imposed and remedies invoked as deemed appropriate by the Authority by rule, regulation, or order of the Authority, or as otherwise provided by law.

12. CONTRACTOR’S RESPONSIBILITY REGARDING COLLECTIVE BARGAINING AGREEMENT

Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom the Contractor has a collective bargaining agreement to refer either minorities or women shall excuse the Contractor’s obligations under these requirements, any rules, regulations, procedures and guidelines promulgated or established pursuant to Executive Order 21.
13. APPLICABILITY TO SUBCONTRACT

As per Section 312 of Executive Law 15-A the Contractor will physically include the document Equal Employment Opportunity Requirements as part of every subcontract or purchase order unless exempted by rules, regulations, or orders of the Director, pursuant to the Executive Order 8, and such requirements shall be binding upon each subcontractor, service provider, or vendor. The Contractor will take such action with respect to any subcontract or purchase order as the Authority may direct as a means of enforcing such provisions, including sanctions for noncompliance; provided, however that in the event the Contractor becomes involved in or is threatened with litigation by a subcontractor or vendor as a result of any provision or direction issued pursuant to these requirements or by the Authority, the Contractor may request the State of New York to enter into such litigation or dispute to protect the interests of the State of New York.

14. EQUAL EMPLOYMENT OPPORTUNITY OFFICER

The Contractor will designate and make known to the Office of Compliance who will have the responsibility for and must be capable of effectively administering and promoting an active Contractor program of equal employment opportunity and who must be assigned adequate authority and responsibility to do so.

15. COMPLAINTS OF ALLEGED DISCRIMINATION/SEXUAL HARASSMENT

The Contractor will promptly investigate all complaints of alleged discrimination/sexual harassment made to the Contractor in connection with his/her obligations under this contract, will attempt to resolve such complaints, and will take appropriate corrective action within a reasonable time. If the investigation indicates that the discrimination/sexual harassment may affect persons other than the complainant, such corrective action shall include such other persons. Upon completion of each investigation, the Contractor will inform every complainant of all of his or her avenues of appeal, including the New York State Division of Human Rights and Equal Employment Opportunity Commission.

The Contractor shall inform the Office of Compliance (within 24 hours) in writing of any formal or informal complaint, incident or any issue of discrimination/sexual harassment. Results of investigation must be submitted to the Office of Compliance within ten (10) days of the complaint.

TRAINING SPECIAL PROVISIONS

TA-1041 – Training Report
TA-1046 – Monthly Training Report

This work shall consist of the employment and meaningful and effective training of minority and women in New York State Thruway Authority approved training programs leading to their qualification as journeyworkers in the skilled trades required in highway construction. This Training/Special Provision supplements the Equal Employment Opportunity requirements included elsewhere in this Proposal entitled “Equal Employment Opportunity (EEO) Requirements”. Each of the foregoing prescribed specific percentage goals for utilization of minorities and women in the performance of work for the geographic location of the contract.

GENERAL: The primary objective of this Training/Special Provision is to provide training opportunities to minorities and women in construction trades for two purposes:
1. To maintain a pool of qualified minorities and women to replace those journeyworkers who, in the natural course of events, will leave the workforce; and

2. To provide minorities and women as indentured apprentices or trainees in those geographic areas where shortages in minorities and women journeyworkers are recognized because of the Contractor’s inability to meet the EEO goals set forth in this contract.

Each contract which contains this Training/Special Provision shall require the training of at least one minority or woman indentured apprentice or trainee. Such individual shall be approved by the Authority. Other than this initial training obligation, to be undertaken and provided by the Contractor, no additional training obligations will exist under this Training/Special Provision unless the goals for minority and women employment and training in the skilled workforce (exclusive of laborers) are not continuously met on the contract and generally distributed amongst the trades. In the five counties of New York City, the goals specified for each trade are applicable and must be met. Whenever the goals are not met, additional minorities and/or women indentured apprentices and/or trainees will be assigned or approved in numbers necessary to meet the goals. Data necessary to determine if goals are being met will be provided on Contractor and Subcontractor Employment Utilization Reports (Form TA-1017-9). The data will be verified by the visual observance of the Project Engineer, or designated project inspectors, and hours of employment reported on Contractor or Subcontractor certified weekly payrolls.

The number of minorities and women indentured apprentices and trainees required to be trained under this item shall not exceed 12% of the total journeyworker workforce on the contract, i.e. no more than 1 in 8 of the skilled workforce is required to be a minority or woman indentured apprentice or trainee. This limitation applies regardless of minority and women representation in the trades. However, this limit on required training in no way absolves the Contractor of the responsibility to comply with the EEO requirements.

**PRE-AWARD MEETING:** Before the Contractor will be allowed to begin work, the Contractor shall attend a Pre-award Meeting and shall submit for Authority use and acceptance, a Workforce and Training Utilization Schedule (Form TA-1024) which shall be correlated to the Contractor’s contract work schedule. The Schedule shall include at least the following information:

1. A work schedule for the entire contract,

2. An estimate of the work force required to conform to the work schedule on a monthly basis including an estimate of the workforce in each trade and/or work classification projected to be used including Subcontractors,

3. Separate estimates of the number of minorities and women indentured apprentices or trainees that would be required in each skilled trade to meet the contract EEO employment goals for that trade assuming no minorities or women journeymen in the workforce,

4. The proposed training programs to be used and the starting dates for training in each trade and/or work classification,

5. An estimate of the availability of minorities and women journeymen in numbers sufficient to meet the EEO contract goals, and
6. Any proposal by the Contractor to use trainees or indentured apprentices to make up for anticipated EEO goal shortfalls. Such proposals shall include the name and craft of any individual proposed by the Contractor as the required trainee or indentured apprentice. In the case of an indentured apprentice, evidence of indentureship and registration of the approved apprenticeship program must be included.

No contract work may be undertaken until the Authority has accepted the Workforce and Training Utilization Schedule. The Contractor shall submit a revised Workforce and Training Utilization Schedule at such times as major changes in the contract work schedule occur which substantially affect the previously submitted schedule.

**RECRUITMENT:** Although the training requirements of this Training/Special Provision are not intended, and shall not be used to discriminate against any applicant for training, whether a member of a protected class or not, it is recognized that non-minority males have traditionally been and continue to be trained, either formally or on-the-job in an informal manner, for work in the trades utilized in construction work. Therefore, until such time that representative numbers of minorities and women complete training and their utilization as journeyworkers is demonstrated to the extent of the participation goals as set forth in the Authority’s construction contract, training required under this Training/Special Provisions will be primarily limited to minorities and women.

Thus, the Contractor shall demonstrate compliance with the intent of this Training/Special Provision by affording the Authority the opportunity to:

1. First, approve the use of a minority or woman indentured apprentice known to the Contractor through an existing Joint Apprenticeship Training program, or

2. Second, provide a partially trained minority or woman trainee who is currently enrolled in a New York State Department of Labor approved training program, or

3. Third, work cooperatively with the Contractor in recruitment of new minorities or women trainees, when needed.

In conformance with the foregoing, the Authority’s Form TA-1018 (Request for Personnel), should be submitted to the TPE/EIC for submission to the Authority’s Office of Compliance. The Contractor shall allow reasonable time for the Authority’s Office of Compliance to ensure on-the-job orientation for approved apprentices or assigned trainees within their first month of employment.

**WORK HISTORY:** No individual shall be employed as a trainee in any trade and/or work classification in which such person has successfully completed a training course providing journeyworker status in the same trade or work classification, or in which such person has been gainfully employed as a journeyworker by virtue of informal on-the-job training. Detection of individuals in the above categories may be accomplished by including appropriate questions on employee application forms, inquiries to the Authority’s Office of Compliance, checking personal references, or by other suitable means. Regardless of the method used, the Contractor shall document the finding for each indentured apprentice or trainee provided training under this requirement. A copy of the finding shall be given to the Authority’s Office of Compliance. In the case of indentured apprentices, evidence of indentureship in a registered approved apprenticeship program shall also be submitted.
SUBCONTRACTING: In the event the Contractor subcontracts a portion of the contract work, the Contractor shall ensure the requirements of this Training/Special Provision are physically incorporated in such subcontracts to ensure the workforce utilization by the Subcontractor meets the goals for minorities and women employment and training, either independently or in combination with the prime Contractor’s workforce. The Contractor must determine the hours of training, if any, and in which trade or work classification, minorities or women indentured apprentices or trainees are to be trained by the Subcontractor(s). However, the Contractor shall retain the primary responsibility for meeting the training requirements of this Training/Special Provision. Subcontractors are hereby advised that disregard of these requirements may result in the Authority either rescinding approval for work on this contract or disapproving their use on subsequent Authority contracts.

TRAINING PROGRAMS: The minimum length, type of training, and rate of pay for the trade or the work classification of the trade will be specified in the training program approved or sanctioned by the New York State Department of Labor.

Where training is to be provided under this Training/Special Provision, the Contractor shall obtain acceptance and/or approval of the training program to be used, and the starting time for training, prior to commencing training. The Contractor shall provide on-the-job training directed toward developing journeymen in the trade, or work classification(s) of the trade involved. To the extent the work involved on the contract permits, such training should include all phases and facets of a trade, or work classification of a trade, to satisfy usual construction industry requirements for continued or future employment therein.

It is the intent of this Training/Special Provision that training will be provided in construction trades rather than clerical type positions. Training may be permitted, in unique circumstances, in lower level management positions such as office engineers, where the training is oriented toward construction related activities. Some off-site training is permissible as long as the training is an integral part of an approved training program and does not comprise a significant part of an overall training program. Both off-site and lower level management training are subject to the Authority’s approval.

TRAINEE WAGES: An employee on any New York State Public Works Contract must be paid the full journeyperson prevailing wage unless such employee is individually registered in an approved and registered New York State Department of Labor Apprenticeship Program. It is the responsibility of the Contractor to ascertain the status of any employee utilized to satisfy the trainee requirements under this contract, and to ensure that all New York State Department of Labor apprenticeship requirements are met.

Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeymen wage rate on the wage determination which provides for less than full benefits for apprentices.

DURATION OF TRAINING: Once an indentured apprentice is approved or a trainee is assigned to the contract under the Training/Special Provision, that individual shall be trained in the designed trade throughout the duration of the contract whenever such trade is in use on the
contract until the trainee or apprentice has completed the approved training program. Where training is provided under a multiphase apprenticeship or training program, it is expected that training will be provided continually through all phases to the extent that opportunities for such training exist in the work under contract. Upon satisfactory completion of a phase of training under a multiphase training program, if further appropriate and required training is not available and work in the work classification of the completed phase is available, the minority or woman indentured apprentice or trainee shall continue employment, and be compensated at the prevailing journeyworker wage rate for such work. Hours of employment as a journeyworker described above will not be credited toward training hours required by the approved training or apprenticeship program.

If an indentured apprentice or trainee is terminated before completion of the contract for any reason other than seasonal lay-off or completion of work in that trade, the Contractor shall hold a counseling session with the Authority's Chief Compliance Officer and the individual to explain the reasons for termination. Documentation that the counseling session was held and the reasons for termination shall be given to the Authority's Chief Compliance Officer.

REQUIRED RECORDS: The Contractor shall provide each minority or woman trained under this provision with a certification showing the type and length of training satisfactorily completed. In addition, the Contractor shall keep records on the job site indicating the nature and hours of training provided to each trainee or indentured apprentice and furnish weekly reports documenting performance under this Training/Special Provision to the Project Engineer. No measurement will be made of training provided to indentured apprentices or trainees for whom no work history has been provided to the Project Engineer. In addition, no measurement will be made of training provided to apprentices for whom no evidence of indentureship in a registered apprenticeship program has been provided to the Project Engineer.

NO PAYMENT FOR TRAINING: No payment will be made for the training required of the Contractor under this Training/Special Provision. The required training is a labor cost which is included in the lump sum bid by the Contractor for the items of work comprising the contract.

(1) Journeyworker means a person who is capable of performing all the duties within a trade or a given work classification of a trade.

WORKFORCE UTILIZATION/GROSS WAGES REPORTING

In accordance with the requirements pursuant to Executive Order (EO) 162, Contractors must report employee workforce utilization on a monthly basis and gross wages on a quarterly basis for its company and all subcontractors in accordance with EO 162, as follows:

A. EO 162 (Monthly/Quarterly) Workforce Utilization/Gross Wages Reporting

Construction Contractors/Subcontractors are required to submit (Monthly) Workforce Utilization and (Quarterly) Workforce Utilization/Gross Wages Reports for their firm and all subcontractors.

(Monthly)Workforce Utilization/ (Quarterly) Gross Wages Reports are required to be electronically submitted to WorkforceUtilizationReportConstruction@thruway.ny.gov.

(Monthly) Workforce Utilization report for the preceding month must be submitted by the 10th of each month, for the Contractor and all subcontractors.
The (Monthly) EO 162 Workforce Utilization/Gross Wages Reporting are located on the Thruway website @ thruway.ny.gov/business/dmwbe/eo-162-monthly-construction.xls

(Quarterly) - Workforce Utilization, including Gross Wages Reports for quarterly reporting must be submitted by 10th of April, July, October and January, for the Contractor and all subcontractors.

The (Quarterly) EO 162 Workforce Utilization/Gross Wages Reporting are located on the Thruway website @ thruway.ny.gov/business/dmwbe/eo-162-quarterly-construction.xls

B. Form TA-1017 Monthly Workforce Utilization Composite Report

Form TA–1017 (Monthly) Workforce Utilization Composite report must be completed for each calendar month by the Contractor reflecting the cumulative total work hours of employment to date for the entire workforce.

Form TA-1017 (Monthly) - Workforce Utilization Composite Report, must be approved by the TPE/EIC and electronically submitted prior to the 10th of the month to Compliance@thruway.ny.gov.

Form TA-1017 (Monthly) - Workforce Utilization Composite Report is located on the Thruway website @ thruway.ny.gov/business/dmwbe/ta-w1017.xls

NONDISCRIMINATION

The Contractor shall comply with the provisions of the Human Rights Law, and all other state and federal statutory and constitutional non-discrimination provisions. The Contractor and its subcontractors shall not discriminate against any employee or applicant for employment because of race, creed (religion), color, sex, national origin, sexual orientation, military status, age, disability, predisposing genetic characteristic, marital status or domestic violence victim status, and shall also follow the requirements of the Human Rights Law with regard to non-discrimination on the basis of prior criminal conviction and prior arrest.

Questions regarding compliance with Workforce Utilization/Gross Wages Reporting should be directed to the Authority’s Office of Compliance.

MOBILIZATION AND PAYMENT OF ESTIMATES/INVOICES

Processing of mobilization, estimates and/or invoices is contingent upon Contractor demonstration and/or documentation of compliance with all of the Authority’s Disadvantaged Business/Equal Employment Opportunity/Minority/Women and Service-Disabled Veteran Owned-Business Enterprise Contract/Agreement requirements and provisions.

Forms listed herein may be revised, updated, at the Authority’s sole discretion and are required during the covered period, under the reporting schedules established by the Authority.

DBE/EEO/MWBE/SDVOB forms, requirements and reporting schedules will be discussed during the pre-award meeting or by contacting the Authority’s Office of Compliance.
REPORTING AND SUBMISSION SCHEDULES

Contractors are required to submit the following forms or reports by the 10th of each month, for the preceding month’s activities to: Compliance@thruway.ny.gov

- TA-W1017 Monthly Workforce Utilization Composite
- TA-W1023 Payments to D/M/WBE Subcontracting Firms
- TA-1024 Workforce and Training Utilization Schedule
- TA-W1046-9 Weekly Training Progress Report

The above forms or reports must accurately reflect the information reported on the following forms:

- TA-W1022-9 Utilization Plan
- TA-W1024-9 Workforce and Training Utilization Schedule
- TA-W1041-9 Training Report
- TA-W1064-9 Construction Contractors Annual EEO Report

Contractors are also required to submit the following forms or reports by the 10th of each month, for the preceding month’s activities to:
WorkforceUtilizationReportConstruction@thruway.ny.gov

- EO 162 - Monthly Workforce Utilization/Gross Wage Report
- EO 162 - Workforce Utilization/Quarterly Gross Wage Report

All Authority Forms are available at:
http://www.thruway.ny.gov/business/contractors/forms/index.html

Timely, complete and accurate reports shall be submitted as required and/or upon request.
STATE WAGE RATE INFORMATION
WAGE RATES

The New York State Thruway Authority does not represent or warrant that the accompanying schedule of wages with the classification of workmen, mechanics and laborers, as required by Section 220 of the Labor Law, is complete and it reserves the right to revise such schedule when required.

In the event that revisions are made before the letting date, an amendment will be issued by the Department of purchasers of plans. In the event that the current wage rate schedule should expire before the contract for this project becomes effective the said wage rate schedule will be recertified and the Contractor will be bound by such revised schedule as recertified.

Labor classifications not appearing on this rate sheet can be used only with the consent of the Chief Engineer of the Authority and then the rate to be paid will be given by the Chief Engineer of the Authority after consulting with the State Department of Labor.

All requests for minimum wage rates for additional occupations shall be directed through the Chief Engineer, Thruway Authority.

By legislation effective August 9, 1975, if the prevailing rate of wages or the prevailing practices for supplements as determined by the State Labor Department changes after the contract is let, the Thruway Authority shall request of the State Labor Department a redetermination of the schedules of wages and supplements and such revised wage rates and supplements shall be annexed to and form a part of the contract for the work. The prevailing wage rates and supplemental benefits to be paid are those in effect at the time the work is being performed. The bidder shall take into account in his bid prices all changes in wage rates and supplements that may be forthcoming during the time the contract is in force.

The bidder shall take into account in his bid prices all changes in wage rates and supplements that may be forthcoming during the time the contract is in force.

Pursuant to Section 220-A of the New York State Labor law, the prime Contractor must provide each approved subcontractor with a copy of the schedule of wages and any supplements as specified in this Contract.

The prime Contractor must immediately obtain from each approved subcontractor a certification (TA-44105) of their receipt of, and agreement to pay the applicable prevailing wages as specified in this contract. The prime Contractor shall retain all Subcontractor certifications and provide these certifications to the Authority prior to the processing of the final payment.

The prime Contractor must submit an affidavit (TA-44115) verifying the proper payment of wages to its own employees prior to the processing of the final payment. All completed certifications and affidavits must be originals and be properly signed and notarized.

SPECIAL NOTICE TO BIDDERS
IN RELATION TO OVERTIME DISPENSATION

All bidders, in submitting their bids, should base their bids and work progression on the assumption that Overtime Dispensation pursuant to Article 8 of the New York State Labor Law, for any workmen, laborers and mechanics to work more than 8 hours in any one calendar day or more than five days in any one week will not be granted for any operation for the contract duration. Subsequent to award, where the contract documents have imposed specific scheduling and/or phasing requirements or where it is determined by the Authority to be in the best interest of the public, the Authority may process, for approval by the new York State Department of Labor, requests for Overtime Dispensation on certain specific operations and, in the event approval is granted, there shall be no adjustments therefore in any bid prices.
SPECIAL NOTE
STATE PREVAILING WAGE RATES

The Contractor shall ensure that workers are paid the appropriate wages and supplemental (fringe) benefits. Throughout the contract, the Contractor shall obtain and pay workers in accordance with periodic wage rate schedule updates from the NYS Department of Labor (NYSDOL). Wage rate amendments and supplements are available on the NYSDOL web site at www.labor.ny.gov. All changes or clarification of labor classification(s) and applicability of prevailing wage rates shall be obtained in writing from the Office of the Director, NYSDOL Bureau of Public Work.

The NYSDOL prevailing wage rate schedule for this contract has been determined and is available on the internet. The prevailing wage rate schedule is accessed by visiting the NYSDOL web site, navigating to the appropriate web page, and entering the Prevailing Rate Case No. (PRC#). The PRC# is provided on NYSDOL Form PW-200 included in this contract Proposal.

A copy of the project specific prevailing wage rate schedule will be provided to the successful bidder upon award of the contract. Upon written request, the schedule will be provided by the Thruway Authority to prospective bidders without internet access.
Attached is the current schedule(s) of the prevailing wage rates and prevailing hourly supplements for the project referenced above. A unique Prevailing Wage Case Number (PRC#) has been assigned to the schedule(s) for your project.

The schedule is effective from July 2019 through June 2020. All updates, corrections, posted on the 1st business day of each month, and future copies of the annual determination are available on the Department's website www.labor.ny.gov. Updated PDF copies of your schedule can be accessed by entering your assigned PRC# at the proper location on the website.

It is the responsibility of the contracting agency or its agent to annex and make part, the attached schedule, to the specifications for this project, when it is advertised for bids and/or to forward said schedules to the successful bidder(s), immediately upon receipt, in order to insure the proper payment of wages.

Please refer to the "General Provisions of Laws Covering Workers on Public Work Contracts" provided with this schedule, for the specific details relating to other responsibilities of the Department of Jurisdiction.

Upon completion or cancellation of this project, enter the required information and mail OR fax this form to the office shown at the bottom of this notice, OR fill out the electronic version via the NYSDOL website.

General Provisions of Laws Covering Workers on Article 8 Public Work Contracts

Introduction

The Labor Law requires public work contractors and subcontractors to pay laborers, workers, or mechanics employed in the performance of a public work contract not less than the prevailing rate of wage and supplements (fringe benefits) in the locality where the work is performed.

Responsibilities of the Department of Jurisdiction

A Department of Jurisdiction (Contracting Agency) includes a state department, agency, board or commission: a county, city, town or village; a school district, board of education or board of cooperative educational services; a sewer, water, fire, improvement and other district corporation; a public benefit corporation; and a public authority awarding a public work contract.

The Department of Jurisdiction (Contracting Agency) awarding a public work contract MUST obtain a Prevailing Rate Schedule listing the hourly rates of wages and supplements due the workers to be employed on a public work project. This schedule may be obtained by completing and forwarding a "Request for wage and Supplement Information" form (PW 39) to the Bureau of Public Work. The Prevailing Rate Schedule MUST be included in the specifications for the contract to be awarded and is deemed part of the public work contract.

Upon the awarding of the contract, the law requires that the Department of Jurisdiction (Contracting Agency) furnish the following information to the Bureau: the name and address of the contractor, the date the contract was let and the approximate dollar value of the contract. To facilitate compliance with this provision of the Labor Law, a copy of the Department's "Notice of Contract Award" form (PW 16) is provided with the original Prevailing Rate Schedule.

The Department of Jurisdiction (Contracting Agency) is required to notify the Bureau of the completion or cancellation of any public work project. The Department's PW 200 form is provided for that purpose.

Both the PW 16 and PW 200 forms are available for completion online.

Hours

No laborer, worker, or mechanic in the employ of a contractor or subcontractor engaged in the performance of any public work project shall be permitted to work more than eight hours in any day or more than five days in any week, except in cases of extraordinary emergency. The contractor and the Department of Jurisdiction (Contracting Agency) may apply to the Bureau of Public Work for a dispensation permitting workers to work additional hours or days per week on a particular public work project.

There are very few exceptions to this rule. Complete information regarding these exceptions is available on the "4 Day / 10 Hour Work Schedule" form (PW 30.1).

Wages and Supplements

The wages and supplements to be paid and/or provided to laborers, workers, and mechanics employed on a public work project shall be not less than those listed in the current Prevailing Rate Schedule for the locality where the work is performed. If a prime contractor on a public work project has not been provided with a Prevailing Rate Schedule, the contractor must notify the Department of Jurisdiction (Contracting Agency) who in turn must request an original Prevailing Rate Schedule form the Bureau of Public Work. Requests may be submitted by: mail to NYSDOL, Bureau of Public Work, State Office Bldg. Campus, Bldg. 12, Rm. 130, Albany, NY 12240; Fax to Bureau of Public Work (518) 485-1870; or electronically at the NYSDOL website www.labor.ny.gov.

Upon receiving the original schedule, the Department of Jurisdiction (Contracting Agency) is REQUIRED to provide complete copies to all prime contractors who in turn MUST, by law, provide copies of all applicable county schedules to each subcontractor and obtain from each subcontractor, an affidavit certifying such schedules were received. If the original schedule expired, the contractor may obtain a copy of the new annual determination from the NYSDOL website www.labor.ny.gov.

The Commissioner of Labor makes an annual determination of the prevailing rates. This determination is in effect from July 1st through June 30th of the following year. The annual determination is available on the NYSDOL website www.labor.ny.gov.

Payrolls and Payroll Records

Every contractor and subcontractor MUST keep original payrolls or transcripts subscribed and affirmed as true under penalty of perjury. Payrolls must be maintained for at least three (3) years from the project's date of completion. At a minimum, payrolls must show the following information for each person employed on a public work project: Name, Address, Last 4 Digits of Social Security Number, Classification(s) in which the worker was employed, Hourly wage rate(s) paid, Supplements paid or provided, and Daily and weekly number of hours worked in each classification.
The filing of payrolls to the Department of Jurisdiction is a condition of payment. Every contractor and subcontractor shall submit to the Department of Jurisdiction (Contracting Agency), within thirty (30) days after issuance of its first payroll and every thirty (30) days thereafter, a transcript of the original payrolls, subscribed and affirmed as true under penalty of perjury. The Department of Jurisdiction (Contracting Agency) shall collect, review for facial validity, and maintain such payrolls.

In addition, the Commissioner of Labor may require contractors to furnish, with ten (10) days of a request, payroll records sworn to as their validity and accuracy for public work and private work. Payroll records include, by are not limited to time cards, work description sheets, proof that supplements were provided, cancelled payroll checks and payrolls. Failure to provide the requested information within the allotted ten (10) days will result in the withholding of up to 25% of the contract, not to exceed $100,000.00. If the contractor or subcontractor does not maintain a place of business in New York State and the amount of the contract exceeds $25,000.00, payroll records and certifications must be kept on the project worksite.

The prime contractor is responsible for any underpayments of prevailing wages or supplements by any subcontractor.

All contractors or their subcontractors shall provide to their subcontractors a copy of the Prevailing Rate Schedule specified in the public work contract as well as any subsequently issued schedules. A failure to provide these schedules by a contractor or subcontractor is a violation of Article 8, Section 220-a of the Labor Law.

All subcontractors engaged by a public work project contractor or its subcontractor, upon receipt of the original schedule and any subsequently issued schedules, shall provide to such contractor a verified statement attesting that the subcontractor has received the Prevailing Rate Schedule and will pay or provide the applicable rates of wages and supplements specified therein. (See NYS Labor Laws, Article 8, Section 220-a).

**Determination of Prevailing Wage and Supplement Rate Updates Applicable to All Counties**

The wages and supplements contained in the annual determination become effective July 1st whether or not the new determination has been received by a given contractor. Care should be taken to review the rates for obvious errors. Any corrections should be brought to the Department's attention immediately. It is the responsibility of the public work contractor to use the proper rates. If there is a question on the proper classification to be used, please call the district office located nearest the project. Any errors in the annual determination will be corrected and posted to the NYSDOL website on the first business day of each month. Contractors are responsible for paying these updated rates as well, retroactive to July 1st.

When you review the schedule for a particular occupation, your attention should be directed to the dates above the column of rates. These are the dates for which a given set of rates is effective. To the extent possible, the Department posts rates in its possession that cover periods of time beyond the July 1st to June 30th time frame covered by a particular annual determination. Rates that extend beyond that instant time period are informational ONLY and may be updated in future annual determinations that actually cover the then appropriate July 1st to June 30th time period.

**Withholding of Payments**

When a complaint is filed with the Commissioner of Labor alleging the failure of a contractor or subcontractor to pay or provide the prevailing wages or supplements, or when the Commissioner of Labor believes that unpaid wages or supplements may be due, payments on the public work contract shall be withheld from the prime contractor in a sufficient amount to satisfy the alleged unpaid wages and supplements, including interest and civil penalty, pending a final determination.

When the Bureau of Public Work finds that a contractor or subcontractor on a public work project failed to pay or provide the requisite prevailing wages or supplements, the Bureau is authorized by Sections 220-b and 235.2 of the Labor Law to so notify the financial officer of the Department of Jurisdiction (Contracting Agency) that awarded the public work contract. Such officer MUST then withhold or cause to be withheld from any payment due the prime contractor on account of such contract the amount indicated by the Bureau as sufficient to satisfy the unpaid wages and supplements, including interest and any civil penalty that may be assessed by the Commissioner of Labor. The withholding continues until there is a final determination of the underpayment by the Commissioner of Labor or by the court in the event a legal proceeding is instituted for review of the determination of the Commissioner of Labor.

The Department of Jurisdiction (Contracting Agency) shall comply with this order of the Commissioner of Labor or of the court with respect to the release of the funds so withheld.

**Summary of Notice Posting Requirements**

The current Prevailing Rate Schedule must be posted in a prominent and accessible place on the site of the public work project. The prevailing wage schedule must be encased in, or constructed of, materials capable of withstanding adverse weather conditions and be titled "PREVAILING RATE OF WAGES" in letters no smaller than two (2) inches by two (2) inches.

The "Public Work Project" notice must be posted at the beginning of the performance of every public work contract, on each job site.
Every employer providing workers' compensation insurance and disability benefits must post notices of such coverage in the format prescribed by the Workers' Compensation Board in a conspicuous place on the jobsite.

Every employer subject to the NYS Human Rights Law must conspicuously post at its offices, places of employment, or employment training centers, notices furnished by the State Division of Human Rights.

Employers liable for contributions under the Unemployment Insurance Law must conspicuously post on the jobsite notices furnished by the NYS Department of Labor.

**Apprentices**

Employees cannot be paid apprentice rates unless they are individually registered in a program registered with the NYS Commissioner of Labor. The allowable ratio of apprentices to journeyworkers in any craft classification can be no greater than the statewide building trade ratios promulgated by the Department of Labor and included with the Prevailing Rate Schedule. An employee listed on a payroll as an apprentice who is not registered as above or is performing work outside the classification of work for which the apprentice is indentured, must be paid the prevailing journeyworker’s wage rate for the classification of work the employee is actually performing.

NYSDOL Labor Law, Article 8, Section 220-3, require that only apprentices individually registered with the NYS Department of Labor may be paid apprenticeship rates on a public work project. No other Federal or State Agency of office registers apprentices in New York State.

Persons wishing to verify the apprentice registration of any person must do so in writing by mail, to the NYSDOL Office of Employability Development / Apprenticeship Training, State Office Bldg. Campus, Bldg. 12, Albany, NY 12240 or by Fax to NYSDOL Apprenticeship Training (518) 457-7154. All requests for verification must include the name and social security number of the person for whom the information is requested.

The only conclusive proof of individual apprentice registration is written verification from the NYSDOL Apprenticeship Training Albany Central office. Neither Federal nor State Apprenticeship Training offices outside of Albany can provide conclusive registration information.

It should be noted that the existence of a registered apprenticeship program is not conclusive proof that any person is registered in that program. Furthermore, the existence or possession of wallet cards, identification cards, or copies of state forms is not conclusive proof of the registration of any person as an apprentice.

**Interest and Penalties**

In the event that an underpayment of wages and/or supplements is found:

- Interest shall be assessed at the rate then in effect as prescribed by the Superintendent of Banks pursuant to section 14-a of the Banking Law, per annum from the date of underpayment to the date restitution is made.
- A Civil Penalty may also be assessed, not to exceed 25% of the total of wages, supplements, and interest due.

**Debarment**

Any contractor or subcontractor and/or its successor shall be ineligible to submit a bid on or be awarded any public work contract or subcontract with any state, municipal corporation or public body for a period of five (5) years when:

- Two (2) willful determinations have been rendered against that contractor or subcontractor and/or its successor within any consecutive six (6) year period.
- There is any willful determination that involves the falsification of payroll records or the kickback of wages or supplements.

**Criminal Sanctions**

Willful violations of the Prevailing Wage Law (Article 8 of the Labor Law) may be a felony punishable by fine or imprisonment of up to 15 years, or both.

**Discrimination**

No employee or applicant for employment may be discriminated against on account of age, race, creed, color, national origin, sex, disability or marital status.

No contractor, subcontractor nor any person acting on its behalf, shall by reason of race, creed, color, disability, sex or national origin discriminate against any citizen of the State of New York who is qualified and available to perform the work to which the employment relates (NYS Labor Law, Article 8, Section 220-e(a)).

No contractor, subcontractor, nor any person acting on its behalf, shall in any manner, discriminate against or intimidate any employee on account of race, creed, color, disability, sex, or national origin (NYS Labor Law, Article 8, Section 220-
The Human Rights Law also prohibits discrimination in employment because of age, marital status, or religion.

There may be deducted from the amount payable to the contractor under the contract a penalty of $50.00 for each calendar day during which such person was discriminated against or intimidated in violation of the provision of the contract (NYS Labor Law, Article 8, Section 220-e(c)).

The contract may be cancelled or terminated by the State or municipality. All monies due or to become due thereunder may be forfeited for a second or any subsequent violation of the terms or conditions of the anti-discrimination sections of the contract (NYS Labor Law, Article 8, Section 220-e(d)).

Every employer subject to the New York State Human Rights Law must conspicuously post at its offices, places of employment, or employment training centers notices furnished by the State Division of Human Rights.

**Workers' Compensation**

In accordance with Section 142 of the State Finance Law, the contractor shall maintain coverage during the life of the contract for the benefit of such employees as required by the provisions of the New York State Workers' Compensation Law.

A contractor who is awarded a public work contract must provide proof of workers' compensation coverage prior to being allowed to begin work.

The insurance policy must be issued by a company authorized to provide workers' compensation coverage in New York State. Proof of coverage must be on form C-105.2 (Certificate of Workers' Compensation Insurance) and must name this agency as a certificate holder.

If New York State coverage is added to an existing out-of-state policy, it can only be added to a policy from a company authorized to write workers' compensation coverage in this state. The coverage must be listed under item 3A of the information page.

The contractor must maintain proof that subcontractors doing work covered under this contract secured and maintained a workers' compensation policy for all employees working in New York State.

Every employer providing worker's compensation insurance and disability benefits must post notices of such coverage in the format prescribed by the Workers' Compensation Board in a conspicuous place on the jobsite.

**Unemployment Insurance**

Employers liable for contributions under the Unemployment Insurance Law must conspicuously post on the jobsite notices furnished by the New York State Department of Labor.
Notice of Contract Award

New York State Labor Law, Article 8, Section 220.3a requires that certain information regarding the awarding of public work contracts, be furnished to the Commissioner of Labor. One "Notice of Contract Award" (PW 16, which may be photocopied), MUST be completed for EACH prime contractor on the above referenced project.

Upon notifying the successful bidder(s) of this contract, enter the required information and mail OR fax this form to the office shown at the bottom of this notice, OR fill out the electronic version via the NYSDOL website.

IMPORTANT NOTICE

FOR

CONTRACTORS &
CONTRACTING AGENCIES

Social Security Numbers on Certified Payrolls

The Department of Labor is cognizant of the concerns of the potential for misuse or inadvertent disclosure of social security numbers. Identity theft is a growing problem and we are sympathetic to contractors’ concerns with regard to inclusion of this information on payrolls if another identifier will suffice.

For these reasons, the substitution of the use of the last four digits of the social security number on certified payrolls submitted to contracting agencies on public work projects is now acceptable to the Department of Labor.

NOTE: This change does not affect the Department’s ability to request and receive the entire social security number from employers during the course of its public work / prevailing wage investigations.
To all State Departments, Agency Heads and Public Benefit Corporations

IMPORTANT NOTICE REGARDING PUBLIC WORK ENFORCEMENT FUND

Budget Policy & Reporting Manual

B-610

Public Work Enforcement Fund

effective date December 7, 2005

1. Purpose and Scope:

This Item describes the Public Work Enforcement Fund (the Fund, PWEF) and its relevance to State agencies and public benefit corporations engaged in construction or reconstruction contracts, maintenance and repair, and announces the recently-enacted increase to the percentage of the dollar value of such contracts that must be deposited into the Fund. This item also describes the roles of the following entities with respect to the Fund:

- New York State Department of Labor (DOL),
- The Office of the State of Comptroller (OSC), and
- State agencies and public benefit corporations.

2. Background and Statutory References:

DOL uses the Fund to enforce the State's Labor Law as it relates to contracts for construction or reconstruction, maintenance and repair, as defined in subdivision two of Section 220 of the Labor Law. State agencies and public benefit corporations participating in such contracts are required to make payments to the Fund.

3. Procedures and Agency Responsibilities:

The Fund is supported by transfers and deposits based on the value of contracts for construction and reconstruction, maintenance and repair, as defined in subdivision two of Section 220 of the Labor Law, into which all State agencies and public benefit corporations enter.

Chapter 407 of the Laws of 2005 increased the amount required to be provided to this fund to .10 of one-percent of the total cost of each such contract, to be calculated at the time agencies or public benefit corporations enter into a new contract or if a contract is amended. The provisions of this bill became effective August 2, 2005.
To all State Departments, Agency Heads and Public Benefit Corporations

IMPORTANT NOTICE REGARDING PUBLIC WORK ENFORCEMENT FUND

OSC will report to DOL on all construction-related ("D") contracts approved during the month, including contract amendments, and then DOL will bill agencies the appropriate assessment monthly. An agency may then make a determination if any of the billed contracts are exempt and so note on the bill submitted back to DOL. For any instance where an agency is unsure if a contract is or is not exempt, they can call the Bureau of Public Work at the number noted below for a determination. Payment by check or journal voucher is due to DOL within thirty days from the date of the billing. DOL will verify the amounts and forward them to OSC for processing.

For those contracts which are not approved or administered by the Comptroller, monthly reports and payments for deposit into the Public Work Enforcement Fund must be provided to the Administrative Finance Bureau at the DOL within 30 days of the end of each month or on a payment schedule mutually agreed upon with DOL.

Reports should contain the following information:

- Name and billing address of State agency or public benefit corporation;
- State agency or public benefit corporation contact and phone number;
- Name and address of contractor receiving the award;
- Contract number and effective dates;
- Contract amount and PWEF assessment charge (if contract amount has been amended, reflect increase or decrease to original contract and the adjustment in the PWEF charge); and
- Brief description of the work to be performed under each contract.

Checks and Journal Vouchers, payable to the "New York State Department of Labor" should be sent to:

Department of Labor
Administrative Finance Bureau-PWEF Unit
Building 12, Room 464
State Office Campus
Albany, NY 12240

Any questions regarding billing should be directed to NYSDOL's Administrative Finance Bureau-PWEF Unit at (518) 457-3624 and any questions regarding Public Work Contracts should be directed to the Bureau of Public Work at (518) 457-5589.
Construction Industry Fair Play Act

Required Posting For Labor Law
Article 25-B § 861-d

Construction industry employers must post the "Construction Industry Fair Play Act" notice in a prominent and accessible place on the job site.

Failure to post the notice can result in penalties of up to $1,500 for a first offense and up to $5,000 for a second offense.

The posting is included as part of this wage schedule. Additional copies may be obtained from the NYS DOL website, www.labor.ny.gov.

If you have any questions concerning the Fair Play Act, please call the State Labor Department toll-free at 1-866-435-1499 or email us at: dol.misclassified@labor.state.ny.us.
Attention All Employees, Contractors and Subcontractors: You are Covered by the Construction Industry Fair Play Act

The law says that you are an employee unless:

- You are free from direction and control in performing your job, and
- You perform work that is not part of the usual work done by the business that hired you, and
- You have an independently established business.

Your employer cannot consider you to be an independent contractor unless all three of these facts apply to your work.

It is against the law for an employer to misclassify employees as independent contractors or pay employees off the books.

Employee Rights: If you are an employee, you are entitled to state and federal worker protections. These include:

- Unemployment Insurance benefits, if you are unemployed through no fault of your own, able to work, and otherwise qualified,
- Workers’ compensation benefits for on-the-job injuries,
- Payment for wages earned, minimum wage, and overtime (under certain conditions),
- Prevailing wages on public work projects,
- The provisions of the National Labor Relations Act, and
- A safe work environment.

It is a violation of this law for employers to retaliate against anyone who asserts their rights under the law. Retaliation subjects an employer to civil penalties, a private lawsuit or both.

Independent Contractors: If you are an independent contractor, you must pay all taxes and Unemployment Insurance contributions required by New York State and Federal Law.

Penalties for paying workers off the books or improperly treating employees as independent contractors:

- **Civil Penalty**
  
  First offense: Up to $2,500 per employee
  
  Subsequent offense(s): Up to $5,000 per employee

- **Criminal Penalty**
  
  First offense: Misdemeanor - up to 30 days in jail, up to a $25,000 fine and debarment from performing public work for up to one year.
  
  Subsequent offense(s): Misdemeanor - up to 60 days in jail or up to a $50,000 fine and debarment from performing public work for up to 5 years.

If you have questions about your employment status or believe that your employer may have violated your rights and you want to file a complaint, call the Department of Labor at (866) 435-1499 or send an email to dol.misclassified@labor.ny.gov. All complaints of fraud and violations are taken seriously. You can remain anonymous.

Employer Name:
IA 999 (09/16)
WORKER NOTIFICATION

(Labor Law §220, paragraph a of subdivision 3-a)

Effective February 24, 2008

This provision is an addition to the existing prevailing wage rate law, Labor Law §220, paragraph a of subdivision 3-a. It requires contractors and subcontractors to provide written notice to all laborers, workers or mechanics of the prevailing wage rate for their particular job classification on each pay stub*. It also requires contractors and subcontractors to post a notice at the beginning of the performance of every public work contract on each job site that includes the telephone number and address for the Department of Labor and a statement informing laborers, workers or mechanics of their right to contact the Department of Labor if he/she is not receiving the proper prevailing rate of wages and/or supplements for his/her particular job classification. The required notification will be provided with each wage schedule, may be downloaded from our website www.labor.ny.gov or made available upon request by contacting the Bureau of Public Work at 518-457-5589.

* In the event that the required information will not fit on the pay stub, an accompanying sheet or attachment of the information will suffice.
New York State Department of Labor
Bureau of Public Work

Attention Employees

THIS IS A:

PUBLIC WORK PROJECT

If you are employed on this project as a worker, laborer, or mechanic you are entitled to receive the prevailing wage and supplements rate for the classification at which you are working.

Chapter 629 of the Labor Laws of 2007:

These wages are set by law and must be posted at the work site. They can also be found at: www.labor.ny.gov

PW 101  (4.15)
This provision is an addition to the existing prevailing wage rate law, Labor Law §220, section 220-h. It requires that on all public work projects of at least $250,000.00, all laborers, workers and mechanics working on the site, be certified as having successfully completed the OSHA 10-hour construction safety and health course. It further requires that the advertised bids and contracts for every public work contract of at least $250,000.00, contain a provision of this requirement.

NOTE: The OSHA 10 Legislation only applies to workers on a public work project that are required, under Article 8, to receive the prevailing wage.

Requirements for OSHA 10 Compliance

Chapter 282 of the Laws of 2007, codified as Labor Law 220-h took effect on July 18, 2008. The statute provides as follows:

The advertised specifications for every contract for public work of $250,000.00 or more must contain a provision requiring that every worker employed in the performance of a public work contract shall be certified as having completed an OSHA 10 safety training course. The clear intent of this provision is to require that all employees of public work contractors, required to be paid prevailing rates, receive such training “prior to the performing any work on the project.”

The Bureau will enforce the statute as follows:

All contractors and sub contractors must attach a copy of proof of completion of the OSHA 10 course to the first certified payroll submitted to the contracting agency and on each succeeding payroll where any new or additional employee is first listed.

Proof of completion may include but is not limited to:

- Copies of bona fide course completion card *(Note: Completion cards do not have an expiration date.)*
- Training roster, attendance record of other documentation from the certified trainer pending the issuance of the card.
- Other valid proof

**A certification by the employer attesting that all employees have completed such a course is not sufficient proof that the course has been completed.**

Any questions regarding this statute may be directed to the New York State Department of Labor, Bureau of Public Work at 518-485-5696.
IMPORTANT INFORMATION
Regarding Use of Form PW30.1
(Previously 30R)
“Employer Registration for Use of 4 Day / 10 Hour Work Schedule”

To use the ‘4 Day / 10 Hour Work Schedule’:

There MUST be a Dispensation of Hours (PW30) in place on the project

AND

You MUST register your intent to work 4 / 10 hour days, by completing the PW30.1 Form.

REMEMBER...

The ‘4 Day / 10 Hour Work Schedule’ applies ONLY to Job Classifications and Counties listed on the PW30.1 Form.

Do not write in any additional Classifications or Counties.

(Please note : For each Job Classification check the individual wage schedule for specific details regarding their 4/10 hour day posting.)
Instructions for Completing Form PW30.1
(Previously 30R)
“Employer Registration for Use of 4 Day / 10 Hour Work Schedule”

Before completing Form PW30.1 check to be sure ...

- There is a Dispensation of Hours in place on the project.
- The 4 Day / 10 Hour Work Schedule applies to the Job Classifications you will be using.
- The 4 Day / 10 Hour Work Schedule applies to the County / Counties where the work will take place.

Instructions (Type or Print legibly):

Contractor Information:
- Enter the Legal Name of the business, FEIN, Street Address, City, State, Zip Code; the Company’s Phone and Fax numbers; and the Company’s email address (if applicable)
- Enter the Name of a Contact Person for the Company along with their Phone and Fax numbers, and the personal email address (if applicable)

Project Information:
- Enter the Prevailing Rate Case number (PRC#) assigned to this project
- Enter the Project Name / Type (i.e. Smithtown CSD – Replacement of HS Roof)
- Enter the Exact Location of Project (i.e. Smithtown HS, 143 County Route #2, Smithtown, NY; Bldgs. 1 & 2)
- If you are a Subcontractor, enter the name of the Prime Contractor for which you work
- On the Checklist of Job Classifications -
  o Go to pages 2 and 3 of the form
  o Place a checkmark in the box to the right of the Job Classification you are choosing
  o Mark all Job Classifications that apply
    ***Do not write in any additional Classifications or Counties.***

Requestor Information:
- Enter the name of the person submitting the registration, their title with the company, and the date the registration is filled out

Return Completed Form:
- **Mail** the completed PW30.1 form to: NYSDOL Bureau of Public Work, SOBC – Bldg.12 – Rm.130, Albany, NY 12240  -OR-
- **Fax** the completed PW30.1 form to: NYSDOL Bureau of Public Work at (518)485-1870
Employer Registration for Use of 4 Day / 10 Hour Work Schedule

Before completing this form, make sure that:

- There is a **Dispensation of Hours** in place on the project.
- The 4 Day / 10 Hour Work Schedule applies to the Job Classifications you will be using.
- The 4 Day / 10 Hour Work Schedule applies to the County / Counties where the work will take place.

Please **type or print** the requested information and then **mail or fax** to the address above.

**Contractor Information**

- **Company Name:** ____________________________ **FEIN:** ____________

Introduction to the Prevailing Rate Schedule

Information About Prevailing Rate Schedule

This information is provided to assist you in the interpretation of particular requirements for each classification of worker contained in the attached Schedule of Prevailing Rates.

Classification

It is the duty of the Commissioner of Labor to make the proper classification of workers taking into account whether the work is heavy and highway, building, sewer and water, tunnel work, or residential, and to make a determination of wages and supplements to be paid or provided. It is the responsibility of the public work contractor to use the proper rate. If there is a question on the proper classification to be used, please call the district office located nearest the project. District office locations and phone numbers are listed below.

Prevailing Wage Schedules are issued separately for "General Construction Projects" and "Residential Construction Projects" on a county-by-county basis.

General Construction Rates apply to projects such as: Buildings, Heavy & Highway, and Tunnel and Water & Sewer rates.

Residential Construction Rates generally apply to construction, reconstruction, repair, alteration, or demolition of one family, two family, row housing, or rental type units intended for residential use.

Some rates listed in the Residential Construction Rate Schedule have a very limited applicability listed along with the rate. Rates for occupations or locations not shown on the residential schedule must be obtained from the General Construction Rate Schedule. Please contact the local Bureau of Public Work office before using Residential Rate Schedules, to ensure that the project meets the required criteria.

Payrolls and Payroll Records

Contractors and subcontractors are required to establish, maintain, and preserve for not less than six (6) years, contemporaneous, true, and accurate payroll records.

Every contractor and subcontractor shall submit to the Department of Jurisdiction (Contracting Agency), within thirty (30) days after issuance of its first payroll and every thirty (30) days thereafter, a transcript of the original payrolls, subscribed and affirmed as true under penalty of perjury.

Paid Holidays

Paid Holidays are days for which an eligible employee receives a regular day’s pay, but is not required to perform work. If an employee works on a day listed as a paid holiday, this remuneration is in addition to payment of the required prevailing rate for the work actually performed.

Overtime

At a minimum, all work performed on a public work project in excess of eight hours in any one day or more than five days in any workweek is overtime. However, the specific overtime requirements for each trade or occupation on a public work project may differ. Specific overtime requirements for each trade or occupation are contained in the prevailing rate schedules.

Overtime holiday pay is the premium pay that is required for work performed on specified holidays. It is only required where the employee actually performs work on such holidays.

The applicable holidays are listed under HOLIDAYS: OVERTIME. The required rate of pay for these covered holidays can be found in the OVERTIME PAY section listings for each classification.

Supplemental Benefits

Particular attention should be given to the supplemental benefit requirements. Although in most cases the payment or provision of supplements is straight time for all hours worked, some classifications require the payment or provision of supplements, or a portion of the supplements, to be paid or provided at a premium rate for premium hours worked. Supplements may also be required to be paid or provided on paid holidays, regardless of whether the day is worked. The Overtime Codes and Notes listed on the particular wage classification will indicate these conditions as required.

Effective Dates

When you review the schedule for a particular occupation, your attention should be directed to the dates above the column of rates. These are the dates for which a given set of rates is effective. The rate listed is valid until the next effective rate change or until the new annual determination which takes effect on July 1 of each year. All contractors and subcontractors are required to pay the current prevailing rates of wages and supplements. If you have any questions please contact the Bureau of Public Work or visit the New York State Department of Labor website (www.labor.ny.gov) for current wage rate information.

Apprentice Training Ratios

The following are the allowable ratios of registered Apprentices to Journey-workers.

For example, the ratio 1:1,1:3 indicates the allowable initial ratio is one Apprentice to one Journeyworker. The Journeyworker must be in place on the project before an Apprentice is allowed. Then three additional Journeyworkers are needed before a second Apprentice is allowed. The last ratio repeats indefinitely. Therefore, three more Journeyworkers must be present before a third Apprentice can be hired, and so on.

Please call Apprentice Training Central Office at (518) 457-6820 if you have any questions.

AGREEMENT
AND
FAITHFUL
PERFORMANCE
BOND
CONTRACT NO:

COUNTY:

NEW YORK STATE
THRUWAY AUTHORITY

AGREEMENT
This AGREEMENT, entered into this __________ day of __________________ 202___, by the
NEW YORK STATE THRUWAY AUTHORITY (hereinafter referred to as the "AUTHORITY")
having its principal office at 200 Southern Blvd. (P. O. Box 189, Albany, NY 12201) in the
County of Albany and State of New York and hereinafter called the
"CONTRACTOR",

☐ a corporation organized and existing under the laws of the State of

☐ a partnership, consisting of

☐ an individual conducting business as

the location of whose principal office is

WITNESSETH: That the Authority and the Contractor for the consideration hereinafter
named agree as follows:

ARTICLE 1. WORK TO BE DONE.
The Contractor shall (a) furnish all the materials, appliances, tools and labor of every kind
required, and construct and complete in the most substantial and skillful manner, the
construction, improvement or reconstruction of the project on or before the completion date
of the          as further described in ARTICLE 4, and as generally identified and shown on the plans entitled:

in accordance with the
"Standard Specifications" of the New York State Department of Transportation, which
contain the information for bidders; form of proposal, agreement, and bonds; general
specifications and conditions or contract; materials of construction; and payment Items; and
(b) do everything required by the Contract (Contract Documents) as defined herein.
The Contractor agrees that its proposal contained herein is based upon performing all the work of the Contract in accordance with a schedule that will result in the completion of the total works by the Date of Completion of the Contract and all intermediate stage and phase completion requirements of the contract, while adhering to all restrictions set forth in the Schedule and Suspension of Work, the Thruway Traffic Plan, and the General and Special Notes, and that the work will be performed at the unit bid prices, as shown on the contract documents and as detailed in the specifications and notes, utilizing the Labor Force, Qualified Disadvantaged, Women Owned and Minority Owned Subcontractor Entrepreneurs and Methods and Materials of Construction as described in the Contract Documents and any incorporated Addenda thereto, and conduct its operations in accordance with the Vehicle and Traffic Law, the Rules and Regulations of the NYS Thruway Authority, and the Thruway Operating Rules and General and Special Notes that are part of this proposal. The Contractor further agrees its proposal is not based upon the assumption that any specifications, traffic restrictions, scheduling or phasing/staging requirements will be waived, an extension of Contract Completion Date will be granted, a labor dispensation will be granted, substitution of non-approved products, alternatives or claimed functional equivalents for Specified Construction Materials and Methods will be allowed, or any Value Engineering Proposals will be entertained and approved by the New York State Thruway Authority, and any requests for a substitution, equivalent or alternate, which it proposes, will be accompanied by an agreed price analysis establishing an applicable credit or illustrating cost equal to or greater than the bid amount.

ARTICLE 2. DOCUMENTS FORMING THE CONTRACT.
The Contract (and Contract Documents) shall be deemed to include the advertisement for proposals; the contractor's proposal; the Schedule for Participation By Disadvantaged Business Enterprise Participation goals; the agreement; the "Standard Specifications" including all addenda thereto referred to above; the plans; any addenda and/or amendments to specifications if the same are issued prior to date of receipt of proposal and all provisions required by law to be inserted in the contract whether actually inserted or not. Appendix A, standard clauses for all N.Y State contracts, is attached hereto and is hereby made a part of this agreement as if set forth fully herein.

ARTICLE 3. EXAMINATION OF DOCUMENTS AND SITE.
The Contractor agrees that before making its proposal it carefully examined the contract documents, together with the site of the proposed work, as well as its surrounding territory, and is informed regarding all of the conditions affecting the work to be done and labor and materials to be furnished for the completion of this contract, including the existence of poles, wires, pipes, and other facilities and structures of municipal and other public service corporations on, over or under the site, except latent conditions that meet the requirements of §104-04 and §109-05, and that its information was secured by personal investigation and research.

ARTICLE 4. DATE OF COMPLETION.
The Contractor further agrees that it will begin the work herein embraced within ten days of the effective date hereof, unless the consent of the Authority, in writing, is given to begin at a later date, and that it will prosecute the same so that it shall be entirely completed and performed on or before the completion date shown in Article 1.
No extension beyond the date of completion fixed by the terms of this contract shall be effective unless in writing signed by the Authority. Such extension shall be for such time and upon such terms and conditions as shall be fixed by the Authority, which may include the assessment of liquidated damages and a charge for engineering and inspection expenses actually incurred upon the work, including engineering and inspection expenses incurred upon the work by railroad companies on contracts for grade crossing elimination. Notice of application for such extension shall be filed with the Chief Engineer, Department of Engineering of the Authority at least fifteen days prior to the date of completion fixed by the terms of this agreement.

**ARTICLE 5. ALTERATIONS AND OMISSIONS.**
The said work shall be performed in accordance with the true intent and meaning of the contract documents without any further expense of any nature whatsoever to the Authority other than the consideration named in this agreement.

The Authority reserves the right at any time during the progress of the work, to alter the plans or omit any portion of the work as it may deem reasonably necessary for the public interest; making allowances for additions and deductions with compensation made in accordance with the Standard Specifications, for this work without constituting grounds for any claim by the contractor for allowance for damages or for loss of anticipated profits, or for any variations between the approximate quantities and the quantities of the work as done.

**ARTICLE 6. NO COLLUSION OR FRAUD.**
The Contractor hereby agrees that the only person or persons interested as principal or principals in the bid or proposal submitted by the Contractor for this contract are named therein, and that no person other than those mentioned therein has any interest in the above-mentioned proposal or in securing of the award, and that this contract has been secured without any connection with any person or persons other than those named, and that the proposal is in all respects fair and was prepared and the contract was secured without collusion or fraud and that neither any officer nor employee of the New York State Thruway Authority or the State Department of Transportation or either of them has or shall have a financial interest in the performance of the contract or in the supplies, work or business to which it relates, or in any portion of the profits thereof. (See also Section 139-a and 139-b of the State Finance Law referred to in the Standard Specifications, which are made a part of this contract.)

**ARTICLE 7. CONTRACT PAYMENTS.**
As the work progresses in accordance with the contract and in a manner that is satisfactory to the Authority, the Authority hereby agrees to make payments to the Contractor therefore, based upon the proposal attached hereto and made a part hereof, as follows: The Authority shall, once in each month and on such days as it may fix, make an estimate of the quantity of work done and of material which has actually been put in place in accordance with the terms and conditions of the contract, during the preceding month, and compute the value thereof and pay to the Contractor the moneys due in accordance with Public Authorities Law Section 2880, as detailed in 21 NYCRR Part 109 (Prompt Payment). No monthly estimate shall be rendered unless the Contractor has provided acceptable documentation with regard to actions taken to comply with the MWBE goals of the contract (see also §109-06 Contract Payments) and the value of the work done equals 5% of the contract amount or $1,000, whichever is the lesser. Semi-monthly estimates may be rendered provided (a) the value of the work performed in two successive weeks is more than $100,000 or (b) the Chairman
of the Authority deems it to be for the best interest of the Authority to do so. When a performance bond is approved, 5% shall be retained from each progress payment or estimate until final acceptance of the work.

Contractor understands and agrees that payments will only be rendered electronically unless payment by paper check is expressly authorized by the Authority, in its sole discretion, due to extenuating circumstances. Contractor shall comply with the Authority’s procedures to authorize electronic payments. Authorization forms are available at http://www.thruway.ny.gov/business/purchasing/epayments/index.html, by e-mail at suppliermgmt@thruway.ny.gov, or by telephone at (518) 436-2859. Contractor acknowledges that it will not receive payment of any estimates submitted under this Agreement if it does not comply with the Authority’s electronic payment procedures, except where the Authority has expressly authorized payment by paper check as set forth above.

ARTICLE 8. PAYMENT DUE TO CONTRACTOR'S NON-COMPLIANCE.
It is further agreed that so long as any lawful or proper direction concerning the work or material given by the Chief Engineer, Department of Engineering of the New York State Thruway Authority, or his/her representative, shall remain uncomplied with, the Contractor shall not be entitled to have any estimate made for the purpose of payment, nor shall any estimate be rendered on account of work done or material furnished until such lawful or proper direction aforesaid has been fully and satisfactorily complied with.

ARTICLE 9. FINAL ACCEPTANCE OF WORK.
When in the opinion of the Thruway Division Director, a Contractor has fully performed the work under the contract, the Thruway Division Director shall recommend to the Chief Engineer, Department of Engineering of the New York State Thruway Authority, the acceptance of the work so completed. If the Chief Engineer, Department of Engineering accepts the recommendation of the Thruway Division Director, he/she shall thereupon by letter notify the Contractor of such acceptance, and similarly to Subdivision 7, Section 38 of the Highway Law, release up to 70% of the money held as retainage. Copies of such acceptance shall be sent to other interested parties. Prior to the final acceptance of the work by the Chief Engineer, Department of Engineering of the New York State Thruway Authority or a designee, the contract work may be inspected, accepted and approved by other agencies and/or municipalities who will have jurisdiction of the work after final acceptance.

Final acceptance shall be final and conclusive except for defects not readily ascertainable by the New York State Thruway Authority, actual or constructive, fraud, gross mistakes amounting to fraud or other errors which the Contractor knew or should have known about as well as the New York State Thruway Authority's rights under any warranty or guarantee. Final acceptance may be revoked by the New York State Thruway Authority at any time prior to the issuance of the final check, upon the New York State Thruway Authority's discovery of such defects, mistakes, fraud or errors in the work.

ARTICLE 10. FINAL PAYMENT.
After the final acceptance of the work, the Engineer shall prepare a final agreement of the work performed and the materials placed and shall compute the value of such work and materials under and according to the terms of the contract. This agreement shall be certified, as to its correctness, by the Engineer. Upon approval of such final agreement by the Director, Office of Construction Management, it shall be submitted to the Chief Engineer,
Department of Engineering for final approval. The right, however, is hereby reserved to the Chief Engineer, Department of Engineering to reject the whole or any portion of the final agreement, should the said certificate of the Engineer be found or known to be inconsistent with the terms of the agreement or otherwise improperly given. All certificates, upon which partial payments may have been made being merely estimates, shall be subject to correction in the final certificate or final agreement.

ARTICLE 11. RIGHT TO SUSPEND WORK AND CANCEL CONTRACT.

Article 11.1 General Right to Suspend and Cancel Contract
It is further mutually agreed that if at any time during the prosecution of the work the Authority shall determine that the work is not being performed in accordance with the Contract or for the best interest of the Authority, the Chief Engineer, Department of Engineering, may proceed in any of the following ways:

1) Temporarily suspend the execution of the work by the Contractor, and the Chief Engineer of the Authority may then proceed with the work under his/her own direction in such manner as will accord with the Contract Documents and be for the best interests of the Authority; or

2) Terminate the Contract while it is in progress, and thereupon proceed with the work by a new contract negotiated or publicly advertised, by the use of his/her own forces, by calling upon the Surety to complete the Work in accordance with the Contract Documents, or by a combination of any such methods; or

3) Cancel the Contract and re-advertise and re-procure in accordance with applicable law; or

4) Complete the Work under the Authority’s direction in such a manner as will accord with the Contract Documents and be for the best interests of the Authority.

Any excess in the cost of completing the Contract beyond the Contract Price for which it was originally awarded shall be charged to and paid by the Contractor failing to perform the Work or its Surety, all pursuant to the provisions of Section 40 of the New York State Highway Law.

In the event of suspension or termination, the Contractor shall be paid its costs, including contract close-out costs, and profit on work satisfactorily performed and project design costs actually incurred up to the time of termination, less an amount necessary to satisfy any claims, liens or judgments against the Contractor. The Contractor shall promptly submit its termination claim. The Contractor will only be paid the contract price for materials delivered and accepted, or services performed in accordance with the manner or performance set forth in this contract, less an amount necessary to satisfy any claims, liens or judgments against the Contractor.

Whenever the Authority determines to suspend or stop Work under this Contract, a written notice sent by mail to the Contractor at its address and to its Sureties at their respective addresses shall be sufficient notice of its action in the premises.

Article 11.2 Termination for Cause
A. If at any time during the prosecution of the work the Chief Engineer shall determine that the work under the Contract is not being performed according to the Contract or any
provision of the Contract is violated by the Contractor or by any subcontractor or that
an Event of Default (as defined below) has occurred hereunder, the Chief Engineer, in
his or her sole and absolute discretion, may proceed in any of the following ways:

(1) Suspend or stop work by the Contractor, and the Chief Engineer may then complete
the Work under his/her own direction in such manner as further described in the
Contract Documents and as determined by the Chief Engineer to be in the best
interests of the Authority; or

(2) Terminate the Contract while it is in progress, and thereupon complete the work
by: a new contract negotiated or publicly advertised; use of the Authority's own
forces; calling upon the Surety to complete the Work in accordance with the
Contract; or a combination of any such methods; or

(3) Terminate the Contract and re-advertise as provided in law or if applicable, demand
upon the Surety to complete any and all remaining work pursuant to the terms of the
Contract and the Faithful Performance Bond.

As used herein, an “Event of Default” shall mean a material breach of the Contract by
the Contractor which, without limitation, the following has occurred: (i) the Contractor
has failed to begin the work in accordance with the Contract requirements; (ii)
performance of this Contract has been unnecessarily or unreasonably delayed, (iii) the
Contractor has willfully violated any of the provisions of the Contract or has not executed
the same in good faith and in accordance with this Contract; (iv) the Contractor has
abandoned the work; (v) the Contractor has become insolvent (other than as a
bankrupt), or has assigned the proceeds of this Contract for the benefit of creditors, or
taken advantage of any insolvency statute or debtor or creditor law or if his property or
affairs have been put in the hands of a receiver; (vi) the Contractor has failed to obtain
an approval required by the Contract; (vii) the Contractor has failed to provide the
required insurances; (viii) the Contractor has failed to provide "adequate assurance" as
required; or (ix) the Contractor is found to be non-responsible.

B. Any excess in the cost of completing the Contract beyond the price for which it was
originally awarded shall be charged to and paid by the Contractor failing to perform the
work or by the Contractor's Surety, pursuant to the terms and conditions of Section 40
of the New York State Highway Law and the Faithful Performance Bond.

C. Whenever the Authority determines to suspend, stop work, or terminate under this
provision of the Contract, the Contractor and Surety shall receive written notice
specifying the basis for such default (the “Default Notice”). Contractor shall have fifteen
(15) days from the date of the Default Notice to cure such default, except that, at
Authority's sole discretion, the Authority may extend such fifteen (15) day period for such
additional period as the Authority shall deem appropriate without waiver of any of its
rights hereunder. The Default Notice shall specify the date the Contractor is to
discontinue all work if such default is not timely cured (the “Termination Date”). If the
Event of Default is not cured or arrangements satisfactory to the Authority are not made
(as evidenced in writing by the Authority) within the designated cure period, then
Contractor shall suspend work and/or the Contract shall terminate, as the case may be,
upon the Termination Date.
D. Upon occurrence of an Event of Default or a termination for cause pursuant to this Article, the Authority has the remedies set forth in the Faithful Performance Bond, the Contract, and all remedies at law or in equity.

E. In the event the termination for cause is determined to be improper, the termination shall be deemed a Termination for Convenience as identified in Article 11.3.

Article 11.3 Termination for Convenience
A. The Authority, at any time, may terminate the Contract in whole or in part. Any such termination shall be effected by delivering to the Contractor a written notice of termination specifying the extent to which performance of work under the Contract is terminated and the date upon which the termination becomes effective. Upon receipt of the notice of termination, the Contractor shall act promptly to minimize the expenses resulting from the termination.

B. The Authority shall pay the Contractor for work of the contract performed by the Contractor and accepted by the Authority for the period extending from the end of the period covered by the last approved Application for Payment up to the effective date of the termination, an amount determined in accordance with the Contract Documents. In no event shall the Contractor be entitled to compensation in excess of the total consideration of the Contract. In no event shall the Contractor be entitled to overhead or profit on the work not performed.

C. In the event of such termination, the Authority may take over the work and prosecute the Contract to completion and may take possession of and may utilize such materials, appliances, and equipment on the site and necessary or useful in completing the work. The Authority also has the right to suspend the execution of the Work for convenience and/or to terminate the Contract for convenience.

Whenever the New York State Thruway Authority determines to suspend or stop work under the contract, a written notice sent by mail to the Contractor at its address and to the sureties at their respective addresses, shall be sufficient notice of its action in the premises.

Article 11.4 Termination for Vendor Responsibility
A. Contractor shall at all times during the Contract term remain responsible. Contractor agrees, if requested by the Authority, to present evidence of its continuing legal authority to do business in New York State, integrity, experience, ability, prior performance, and organizational and financial capacity.

B. The Authority, in its sole discretion, reserves the right to suspend any or all activities under this Contract, at any time, when it discovers information that calls in to question the responsibility of Contractor. In the event of such suspension, Contractor will be given written notice outlining the particulars of such suspension. Upon issuance of such notice, Contractor shall comply with the terms of the suspension order. Contract activity may resume at such time as the Authority issues a written notice authorizing a resumption of performance under the Contract.

C. Notwithstanding any other provision of this Contract, if the Authority determines Contractor to be non-responsible, the Authority shall have the right to terminate the Contract for cause pursuant to the terms of Article 11.2 - Termination for Cause herein.
In such event, the Authority shall have all rights and remedies set forth in Article 11.2, including, without limitation, the right to complete Contractor’s contractual requirements in any manner the Authority may deem advisable and to pursue available legal or equitable remedies for the breach.

D. In no event shall termination of the Contract by the Authority for reasons of Contractor’s non-responsibility be deemed a breach by the Authority, nor shall the Authority be liable for any damages or lost profits or otherwise that Contractor may incur as a result of such termination.

E. The Authority may require at any time the removal of a subcontractor to the Contractor that the Authority determines is not responsible.

ARTICLE 12. DETERMINATION AS TO VARIANCES.
In any case of any ambiguity in the plans, specifications or maps, or between any of them, the matter must be immediately submitted to the Chief Engineer, Department of Engineering, who shall adjust the same, and his/her decision in relation thereto shall be final and conclusive upon the parties.

ARTICLE 13. SUCCESSORS AND ASSIGNS.
This Agreement shall bind the successors, assigns and representatives of the parties hereto.

ARTICLE 14. INTERNATIONAL BOYCOTT PROHIBITION.
In accordance with Chapter 406 of the Laws of 1981, the Contractor hereby promises, asserts and represents that neither the Contractor nor any substantially owned or affiliated person, firm, partnership or corporation has participated, is participating or shall participate in an international boycott in violation of the provisions of the United States Export Administration Act of 1969, as amended, or the United States Export Administration Act of 1979, or the effective Regulations of the United States Department of Commerce promulgated under either act.

It is understood further that the Authority in awarding a contract does so in material reliance upon the promise and representation made by the Contractor in the foregoing paragraph and that such contract shall be rendered forfeit and void by the State Comptroller if subsequent to the bid execution date, the Contractor or such owned or affiliated person, firm, partnership or corporation has been convicted of a violation of the aforesaid Acts or Regulations or has been found upon final determination of the United States Commerce Department or any other appropriate agency of the United States to have violated such Acts or Regulations.

The Contractor agrees to and shall notify the Chief Engineer, Department of Engineering and the Director of the Office of Construction Management and the Director of State Expenditures in the Office of the State Comptroller of any such conviction or final determination of violation within five (5) days thereof.

ARTICLE 15. CERTIFICATION OF STATE FINANCE LAW SECTIONS 139-J AND 139-K.
By execution of this Agreement the Contractor certifies that all information provided with respect to New York State Finance Law Section 139-j and Section 139-k is complete, true and accurate. The Authority shall have a right to terminate this Agreement in the event the Authority finds that the certification made by the Contractor in accordance with New York State
Finance Law Sections 139-j and 139-k was intentionally false or intentionally incomplete. This includes the Authority’s right to terminate this Agreement at any time in the event the Authority finds that Contractor is non-responsible or has failed to accurately disclose vendor responsibility information.

ARTICLE 16. WRITTEN NOTICES.
All notices permitted or required hereunder shall be in writing and transmitted by either:
  a. certified or registered United States mail, return receipt requested;
  b. facsimile transmission;
  c. personal delivery;
  d. expedited delivery service; or
  e. e-mail.

Such notices shall be addressed to the individuals or titles named in the contract documents, or which are designated by the Contractor or the Authority at the pre-construction meeting, or which are designated by the Authority or the Contractor from time to time during the course of the Contract pursuant to the requirements herein.

Any such notice shall be deemed to have been given either at the time of personal delivery or, in the case of expedited delivery service or certified or registered United States mail, as of the date of first attempted delivery at the address and in the manner provided herein, or in the case of facsimile transmission or email, upon receipt.

The parties may, from time to time, specify a new or different address in the United States as their address for the purpose of receiving notice under this Agreement by giving fifteen (15) days written notice to the other party sent in accordance herewith. The parties agree to mutually designate individuals as their respective representatives for the purposes of receiving notices under this Agreement. Additional individuals may be designated in writing by the parties for purposes of implementation and administration/billing, resolving issues and problems and/or for dispute resolution.

ARTICLE 17. SUBCONTRACTING.
Contractor agrees not to subcontract any of its services without the prior written approval of the Authority.

Contractor retains ultimate responsibility for all services performed under the Agreement and shall pay any subcontractors promptly for work performed under this Agreement. Contractor shall be fully responsible to the Authority for the acts and omissions of its subcontractors, and of persons either directly or indirectly employed by them, just as Contractor is fully responsible to the Authority for the acts and omissions of persons directly employed by Contractor.

All subcontracts shall be in writing and shall contain provisions, which are functionally identical to, and consistent with, the provisions of this Agreement including, but not limited to, the body of this Agreement, Appendix A – Standard Clauses for New York State Thruway Authority Contracts, and the Contract Documents. Unless expressly waived in writing by the Authority, all subcontracts between the Contractor and its subcontractors shall expressly name the Authority, as the sole intended third party beneficiary of such subcontract. The Authority reserves the right to review and approve or reject any subcontract, as well as any amendment to said subcontract(s), and this right shall not make the Authority a party to any
subcontract or create any right, claim, or interest in the subcontractor or proposed subcontractor against the Authority. The Authority shall have the right to withdraw its consent to a subcontractor if, at the sole discretion of the Authority, it appears that the subcontract will delay, prevent, or otherwise impair Contractor’s performance of services under this Agreement. Upon request, Contractor shall furnish to the Authority copies of all Contracts between Contractor and its subcontractors used to perform services for this Agreement.

The Authority reserves the right, at any time during the term of the Agreement, to verify that the written subcontract between Contractor and its subcontractors is in compliance with all of the provisions of this Article 17 and any subcontract provisions contained in this Agreement.

Contractor shall give the Authority immediate notice in writing of the initiation of any legal action or suit which relates in any way to a subcontract with a subcontractor or which may affect the performance of the Contractor’s duties under the Agreement. Any subcontract shall not relieve the Contractor in any way of any responsibility, duty and/or obligation of the Agreement.

If at any time during performance under this Agreement total compensation to a subcontractor exceeds or is expected to exceed $100,000, said subcontractor shall be required to electronically submit and certify a new Vendor Responsibility Questionnaire directly to the Office of the New York State Comptroller, or submit and certify all necessary updated information thereof.

Nothing contained in this Agreement shall create any contractual relationship between a subcontractor and the Authority.

**ARTICLE 18. CONFIDENTIALITY AND NON-DISCLOSURE**

A. “Confidential Information” means any information not generally known to the public, or that the Authority claims is confidential, whether oral, written, or electronic, that the Authority discloses, directly or indirectly, through any means of communication, to Contractor. Confidential Information includes, but is not limited to, operational and infrastructure information relating to: bid documents, plans, drawings, specifications, reports, product information and data; business and security processes and procedures; personnel and organizational data; financial statements; information system IP addresses, passwords, security controls, architectures and designs; and such other data, information and images that the Authority deems confidential.

B. Confidential Information does not include information which, at the time of the Authority’s disclosure to Contractor: (1) is already in the public domain or becomes publicly known through no act of Contractor; or (2) is already known by Contractor free of any confidentiality obligations.

If Contractor wants to disclose Confidential Information, it shall notify the Authority and specify the Confidential Information it wants to disclose. Contractor may only disclose such Confidential Information if the Authority approves such disclosure in writing, subject to such other terms and conditions as the Authority may require. Such approval, if given,
shall only apply to the particular request and the specific Confidential Information for which it is given.

If Contractor is required to disclose or make available, directly or indirectly, Confidential Information pursuant to statute, court or administrative order, subpoena, contractual obligation, or otherwise by law, Contractor shall: (1) notify the Authority that it has received such legal demand as soon as practicable, but in all events prior to any disclosure; (2) permit the Authority to take the steps it deems necessary and appropriate to protect the Confidential Information from disclosure; (3) cooperate to the fullest extent possible under the law with the Authority’s efforts to protect the Confidential Information from disclosure; and (4) disclose only such Confidential Information, and only such portions thereof, as is required to satisfy the legal demand, and limit any such disclosure of Confidential Information to the fullest extent permissible under the law.

C. Contractor may use Confidential Information solely for the purposes of providing services to the Authority pursuant to this Agreement. Contractor may make copies of Confidential Information but only to the extent necessary for the disclosures and uses permitted by this Agreement. Contractor will make commercially reasonable efforts to ensure that any copy of Confidential Information that is made is marked to show that it is or contains Confidential Information. Contractor may share Confidential Information with third parties: (i) that are required for Contractor’s provision of services to the Authority pursuant to this Agreement (e.g., Contractors and subcontractors); and (ii) that agree in writing to be bound by the confidentiality provisions of this Agreement; however, Contractor may share only that Confidential Information that is necessary to the third party’s contribution to Contractor’s provision of services to the Authority pursuant to this Agreement and Contractor must first obtain the Authority’s prior written consent.

The Authority’s disclosure of Confidential Information to Contractor shall not convey to Contractor any right, title, or interest in or to such Confidential Information, and this Agreement does not transfer ownership of Confidential Information or grant a license thereto. The Authority shall retain all right, title, and interest in and to all such Confidential Information at all times.

D. Contractor shall hold Confidential Information confidential to the maximum extent permitted by law. Contractor shall safeguard Confidential Information with at least the same level of care and security that Contractor uses to maintain and protect from disclosure its own confidential information, using all reasonable and necessary security measures, devices, and procedures that Contractor uses to maintain its own confidential information, but in all events with not less than reasonable care.

Contractor shall take reasonable steps to prevent unauthorized access to, use of, or disclosure of Confidential Information, including without limitation, by protecting its passwords and other log-in information. Contractor shall notify the Authority immediately of any known or suspected misuse or misappropriation of Confidential Information and shall use its best efforts to stop said misuse or misappropriation.

E. Upon written request of the Authority, or upon expiration or termination of this Agreement, Contractor shall return all Confidential Information to the Authority, or certify in writing that it has been destroyed and no copies exist.
F. Contractor agrees that breach of this Article 18 would cause the Authority irreparable injury, for which monetary damages would not provide adequate compensation, and that in addition to any other remedy, the Authority will be entitled to injunctive relief against such breach or threatened breach, without proving actual damages or posting a bond or other security.

G. Without limiting the foregoing, the obligations and assurances involving Confidential Information pursuant to this Agreement shall survive termination or expiration of this Agreement.

ARTICLE 19. NEW YORK STATE HUMAN RIGHTS LAW, ARTICLE 15 OF THE EXECUTIVE LAW.
The New York State Human Rights Law, Article 15 of the Executive Law, prohibits discrimination (including to refuse to hire or employ or to bar or to discharge from employment an individual or to discriminate against such individual in compensation or in terms, conditions or privileges of employment) and harassment based on age, race, creed, color, national origin, sex, sexual orientation, gender identity or expression, disability, marital status, familial status, domestic violence victim status, prior arrest or conviction record, military status or predisposing genetic characteristics, or because the individual has opposed any practices forbidden under the Human Rights Law or because the individual has filed a complaint, testified or assisted in any proceeding under the Human Rights Law, regardless of whether such harassment would be considered severe or pervasive under precedent applied to harassment claims. Harassment is an unlawful discriminatory practice when it subjects an individual to inferior terms, conditions or privileges of employment because of the individual's membership in one or more of these protected categories.

The Human Rights Law may also require reasonable accommodation for persons with disabilities and pregnancy-related conditions. A reasonable accommodation is an adjustment to a job or work environment that enables a person with a disability to perform the essential functions of a job in a reasonable manner. The Human Rights Law may also require reasonable accommodation in employment on the basis of Sabbath observance or religious practices.

Generally, the Human Rights Law applies to:
- all employers of four or more people, employment agencies, labor organizations and apprenticeship training programs in all instances of discrimination or harassment;
- employers with fewer than four employees in all cases involving sexual harassment; and,
- any employer of domestic workers in cases involving sexual harassment or harassment based on gender, race, religion or national origin.

In accordance with New York State Executive Order No. 177, by execution of this Agreement, Contractor hereby certifies, that it does not have institutional policies or practices that fail to address the harassment and discrimination of individuals on the basis of their age, race, creed, color, national origin, sex, sexual orientation, gender identity, disability, marital status, military status, or other protected status under the Human Rights Law.

Executive Order No. 177 and the aforementioned certification do not affect institutional policies or practices that are protected by existing law, including but not limited to the First
ARTICLE 20. DEBARMENT CERTIFICATION.
A. The Contractor certifies to the best of its knowledge and belief, that it and its principals:

1. Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency;

2. Have not within a three-year period preceding this contract been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

3. Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (A)(2) of this certification; and

4. Have not within a three-year period preceding this application/proposal/contract had one or more public transactions (Federal, State or local) terminated for cause or default.

ARTICLE 21. CONFLICTS OF INTEREST.
A. Contractor has provided as Exhibit V (attached hereto and made a part of this Agreement), the Vendor Assurance of No Conflict of Interest or Detrimental Effect form, signed by an authorized executive or legal representative attesting that Contractor's performance of the services does not and will not create a conflict of interest with, nor position Contractor to breach any other contract currently in force with the Authority or the State of New York, that Contractor will not act in any manner that is detrimental to any Authority or State of New York project for which Contractor is rendering services.

B. Contractor hereby reaffirms the attestations made in its proposal and covenants and represents that there is and shall be no actual or potential conflict of interest that could prevent Contractor's satisfactory or ethical performance of duties required to be performed pursuant to the terms of this Agreement. Contractor hereby agrees it shall have a continuing affirmative duty and obligation to notify the Authority immediately of any actual or potential conflicts of interest.

C. In conjunction with any subcontract under this Agreement, Contractor shall obtain and deliver to the Authority, prior to entering into a subcontract, a Vendor Assurance of No Conflict of Interest or Detrimental Effect form, signed by an authorized executive or legal representative of the subcontractor. Contractor shall also require in any subcontracting agreement that the subcontractor, in conjunction with any further subcontracting agreement, obtain and deliver to the Authority a signed and completed Vendor Assurance of No Conflict of Interest or Detrimental Effect form for each of its subcontractors prior to entering into a subcontract.
D. The Authority and Contractor recognize that conflicts may occur in the future because Contractor may have existing, or establish new, relationships. The Authority will review the nature of any relationships and reserves the right to terminate this Agreement for any reason, or for cause, if, in the judgment of the Authority, a real or potential conflict of interest cannot be cured.

ARTICLE 22. ETHICS.
Contractor and subcontractors may hire former State agency or Authority employees. However, as a general rule and in accordance with New York Public Officers Law, former employees of the Authority may neither appear nor practice before the Authority, nor receive compensation for services rendered on a matter before the Authority, for a period of two years following their separation from Authority service. In addition, former Authority employees are subject to a “lifetime bar” from appearing before the Authority or receiving compensation for services regarding any transaction in which they personally participated or which was under their active consideration during their tenure with the Authority.

During the term of the Agreement, Contractor and its subcontractors shall not engage any person who is, or has been at any time, in the employ of the Authority or New York State to perform services under the Agreement in violation of: the provisions of the Public Officers Law (“POL”); the rules, regulations, opinions, guidelines, or policies promulgated or issued by the New York State Joint Commission on Public Ethics (“JCOPE Regulations”); and any other laws applicable to the service of current or former Authority or New York State employees (“Other Laws,” and, together with POL and JCOPE Regulations, collectively, the “Ethics Provisions”). Contractor certifies that all of its employees and employees of any subcontractor who are former employees of the Authority or New York State and who are assigned to perform services under the Agreement shall be assigned in accordance with all Ethics Provisions. Further, during the term of the Agreement, no person who is employed by Contractor or its subcontractors and who is disqualified from providing services under the Agreement pursuant to any Ethics Provisions may share in any net revenues Contractor or its subcontractors derives from the Agreement.

Contractor shall identify and provide the Authority with notice of those employees of Contractor or its subcontractors who are former employees of the Authority or New York State and who will be assigned to perform services under the Agreement, and shall ensure that such employees comply with all applicable laws and prohibitions. The Authority may, request that Contractor provide it with whatever information the Authority deems appropriate about each such person’s engagement, work cooperatively with the Authority to solicit advice from the New York State Joint Commission on Public Ethics, and, if deemed appropriate by the Authority, instruct any such person to seek the opinion of the Joint Commission on Public Ethics. The Authority shall have the right to withdraw or withhold approval of any subcontractor if utilizing such subcontractor for any work performed hereunder would be in conflict with any of the Ethics Requirements. The Authority shall have the right to cancel or terminate the Agreement at any time if any work performed under the Agreement is in conflict with any Ethics Provisions.

ARTICLE 23 MINORITY AND WOMEN BUSINESS ENTERPRISE GOALS AND SERVICE DISABLED VETERANS OWNED BUSINESS GOALS
This Contract is subject to State provisions (including State Executive Law 15-A and 5 NYCRR Parts 140-145) concerning the utilization of Minority-Owned Business Enterprises
(MBE) and Women-Owned Business Enterprises (WBE) (collectively M/WBE). All State M/WBE requirements are applicable to this Contract. The approved overall combined MBE and WBE participation goal for the project is established in the Contract Documents.

This Contract is subject to State provisions (including State Executive Law 15-A and 5 NYCRR Parts 140-145) concerning the utilization of Service Disabled Veterans Owned Business (SDVOB). All State SDVOB requirements are applicable to this Contract. The approved overall SDVOB participation goal for the project is established in the Contract Documents.

ARTICLE 24. IRAN DIVESTMENT ACT- SECTION 2879-C OF THE PUBLIC AUTHORITIES LAW.

A. As used in this Article 24, “person” has the meaning set forth in paragraph (e) of subdivision 1 of Section 165-a of the State Finance Law.

B. As used in this Article 24 “Contract” means this Agreement.

C. Contractor hereby provides the following certification: By signing this Contract, each person and each person signing on behalf of any other party certifies, and in the case of a joint bid or partnership each party thereto certifies as to its own organization, under penalty of perjury, that to the best of its knowledge and belief, that each person is not on the list created pursuant to paragraph (b) of subdivision 3 of Section 165-a of the State Finance Law.

ARTICLE 25. COVENANT AGAINST CONTINGENT FEES.

Contractor warrants that it has not employed or retained any company or person, other than a bona fide employee working for Contractor, to solicit or secure this Agreement, and has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration, contingent upon or resulting from the award or making of this Agreement. In the event Contractor violates this warranty, Authority shall have the right to terminate this Agreement without liability, or, in its discretion, to deduct from payments otherwise owed to the Contractor for services provided pursuant to this Agreement the full amount of such fee, commission, percentage, brokerage fee, gift or other consideration.

ARTICLE 26. COMPLIANCE MONITORING.

In the event that the Contractor, its affiliates or any subcontractor is or becomes subject to a compliance monitoring requirement consequent to an agreement with a governmental entity at any time prior to completion of the contract, the Contractor shall promptly notify the Authority of the same. Compliance monitoring means any requirement imposed by a governmental entity arising from an investigation of activities of the Contractor, its affiliates, or any subcontractor concerning alleged compliance violations, pursuant to which the subject entity is obligated to allow an independent third party to review, analyze, investigate or report on that entity’s future compliance with governmental rules and/or contractual requirements arising from governmental rules. Said notice shall be in writing and shall include (i) a copy of the order, settlement or other document setting forth the requirement to implement a monitoring program and (ii) the specific requirements and conditions of the required program. If the order, settlement or other document is subject to confidentiality protection that cannot be unilaterally waived by the Contractor or the entity that is subject to the requirement, the Contractor shall cause the subject entity to confirm that it is subject to a compliance monitoring requirement
and to provide a confidential summary of the terms and conditions of the monitoring requirement to the Contractor, with a copy to the Authority.

The Contractor shall further cause the subject entity to promptly notify the Contractor, with a copy to the Authority, of any violations of the monitoring program by the subject entity and of any other concerns expressed by the monitor regarding compliance with the monitoring program requirements. In such event, the Contractor shall provide to the Authority a detailed written report as to whether and to what extent, if any, the violation or concerns expressed by the monitor are relevant to the Contractor's compliance with its Contract obligations, or to the performance of work by the Contractor. The Authority shall at all times have the right to independently investigate whether any matter raised by the monitor will have any effect upon the Contractor's compliance with its Contract obligations or performance of work by the Contractor and/or subject entity. If any such violation occurs or concerns expressed by the monitor involve compliance requirements that are deemed by the Authority to be relevant to the Contract, the Authority shall have the right to require the Contractor to institute, at Contractor expense, additional data keeping, reporting, and/or other safeguard measures, including permitting independent auditing and access to pertinent records of the Contractor or the subject entity to mitigate risk that a similar violation will occur on the project or be a cause for concern with respect to the Contractor's performance of its obligations under the Contract. The Authority's audit rights under the Contract shall include the right to audit and access pertinent records of the Contractor or the subject entity relating to compliance issues described herein.

The Authority agrees to take all reasonable measures to maintain the confidentiality (to the extent permitted by law) of any information provided by Contractor and/or the subject entity pursuant to this Article 26 which the Contractor has reasonably designated as confidential, and the provisions of Appendix A, Section 9 of the New York State Thruway Authority Addendum to the Standard Specifications, of the Agreement shall apply with respect to disclosure of any such Records under the Statute (as defined in such section). Any intra-agency written materials prepared by the Authority, or any written inter-agency materials that are in the possession or control of the Authority, to the extent based on information or records designated as confidential or exempt from disclosure under the Statute as provided in the preceding sentence, shall also be designated and treated as such by the Authority to the fullest extent permitted by law. The Authority may disclose any of the aforementioned information, records and materials to the New York State Department of Transportation, provided that the Department agrees to treat such information, records and material in the same manner as required of the Authority under this paragraph.

The rights and remedies granted to the Authority under this Article 26 are in addition to, and not to the exclusion of, any and all of its rights and remedies under the Contract or at law or in equity.

ARTICLE 27. NOTICES REGARDING CLAIMS, LITIGATION AND RULINGS
The Contractor shall promptly provide written notice to the Authority of all claims, litigation and governmental rulings pertaining to the work where such claims, litigation or rulings could subject the Authority to liability or substantially impair the completion of the Contract work. With such notice, the Contractor shall include a brief summary of the issue involved and the Contractor’s position on such issue. Such written notice is additional to and not in place of any other notices required by the Contract Documents. The Contractor shall cooperate and provide, and shall require all subcontractors to cooperate and provide, such information or
records as may be reasonably requested by the Authority concerning such claims, litigation or rulings.

**ARTICLE 28 COOPERATION AND FURTHER ASSURANCES.**
Contractor shall cooperate and provide, and shall cause all subcontractors to cooperate and provide, such information as is necessary or requested by the Authority to assist or facilitate the submission by the Authority of any documentation, reports or analysis required by the State, and/or any other governmental entity with jurisdiction over the work. The Contractor shall promptly execute and deliver to the Authority all such instruments and other documents and assurances as are reasonably requested by the Authority to further evidence the obligations of the Contractor under the Contract.

**ARTICLE 29 SEVERABILITY.**
If any clause, provision, section, article or part of any of the Contract Documents is ruled invalid by a court having proper jurisdiction, the invalidity or unenforceability of any such clause, provision, section, article or part shall not affect the validity or enforceability of the balance of the Contract Documents, which shall be construed and enforced as if the Contract Documents did not contain such invalid or unenforceable clause, provision, section, article or part.
Contract Number:

In addition to the acceptance of this contract, I also certify that original copies of this signature page will be attached to all other exact copies of this contract.

IN-WITNESS WHEREOF, the parties hereto have executed this agreement on the day and year first above written.

FAITHFUL PERFORMANCE BOND

__________________________________________
BOND

Know all men by these presents, that we (hereinafter called the "Principal")

and ____________________________________________________________________

of ___________________________________________ (hereinafter called the "Surety") are

held and firmly bound unto the New York State Thruway Authority, (hereinafter called the

"Authority"), in the full and just sum of good

and lawful money of the United States of America for the payment of which said sum of money,

well and truly to be made and done, the said Principal binds himself, his heirs, executors,

administrators or assignees and the said SURETY binds itself, its successors or assigns, jointly

and severally, firmly by these presents.

Signed, sealed and dated this ___________________ of_______________, 202__.

Whereas, said Principal has entered into a certain written contract bearing date of the

_________________ day of _______________, 202__ with the Authority for:

Now, therefore, THE CONDITION OF THIS OBLIGATION IS SUCH that if the said Principal

shall well, truly and faithfully perform the work in accordance with the terms of the contract, and

with the plans and specifications, and will commence and complete the work within the time

prescribed in the contract, on his part to be kept and performed according to the terms and

tenor of said contract, and shall protect the said N.Y.S. Thruway Authority against, and pay

any excess of cost as provided in said contract, and all amounts, damages, costs and

judgments which may be recovered against said N.Y.S. Thruway Authority, N.Y.S. Dept. of

Transportation the Commissioner of Transportation and the State of N.Y. or its or any of their

officers or agents or which the said aforementioned may be called upon to pay to any person

or corporation by reason of any damages, direct or indirect, arising or growing out of the doing

of said work, or from the negligence, non-feasance, misfeasance, or malfeasance of any

officer, agent or employee of the aforementioned, or suffered or claimed on account of

aforesaid work during the time thereof and until the final completion and acceptance of the

work, or the manner of doing the same, or the neglect of the said Principal, or his agents, or

servants, or the improper performance of the said work by the said Principal, or his agents, or

servants, or from any other cause, then this obligation shall be null and void, otherwise to

remain in full force and virtue.
In the event of a failure of performance of the contract by the Principal, which shall include, but not be limited to, any breach or default of the contract by the Principal, or in case said contract is forfeited by the Principal in the manner provided for in the contract and the said Surety, for value received, hereby stipulates and agrees, if requested to do so by the Authority, has the option to either remedy the default, or breach or forfeiture of the Principal or take charge and fully perform and complete the work, mentioned and described in said contract and specifications, pursuant to the terms, conditions and covenants thereof and as may be amended, at its own expense. The procedure by which the surety undertakes to discharge its obligations under the bond shall be subject to the advance written approval of the Authority. If the Surety completes the contract, it shall be paid for the actual items of work performed in accordance with the Principal's contract terms and prices. In the event the Surety assumes the rights and obligations of the Principal.

It shall be the duty of the Surety to give unequivocal notice in writing to the Authority, within forty-five (45) days after receipt of written notice from the Authority to the Surety, of the Surety's election to remedy default(s) or breach(es) or forfeiture(s) promptly or to perform and fully complete the contract promptly as provided herein, time being of the essence of this bond. In said notice of election, the Surety shall state the date on which the remedy or performance shall commence. During the period between the Authority's notice and Surety's performance of the contract or remedy of the default, breach or forfeiture, the Surety shall be liable for and agrees to pay any and all reasonable and necessary costs as determined by the Authority to maintain the project site safe and convenient to the public.

It shall also be the duty of the Surety to give prompt notice in writing to the Authority upon completion of the remedy and/or correction of each breach or default or completion of the contract. The surety shall not assert solvency of its Principal or its Principal's denial of default as justification for its failure to give notice of election or for its failure to promptly remedy the breach or default or to complete the contract.

In the event the Surety shall fail to exercise either option or to act promptly then the Authority shall give ten (10) days notice of such failure, both to the Principal and the Surety, and after the expiration of the 10 days the Authority may cause the work to be completed in accordance with the contract, and the Surety and the Principal shall be jointly and severally liable for the amount of the excess cost of completing the contract work beyond the amounts remaining for this contract adjusted for the work actually performed. When the cost of completion of performance by the Obligee is estimated, the Principal and Surety shall pay, free from all liens and encumbrances, the Authority determined estimated completion costs above funds remaining for this contract, to the Authority within 30 days of receipt of the estimate. Adjustment to the Authority's estimated completion cost will be made upon the Authority's final acceptance of the work and appropriate refunds, if any, will be promptly made to the Surety. Any actual costs in excess of the estimated price shall be paid to the Authority promptly on demand. Additionally, Principal and Surety shall be liable for any applicable liquidated and/or engineering costs or damages.
In addition, the said Principal and Surety further agree, as part of this obligation, to pay all damages of any kind to person or property that may result from a failure in any respect to perform and complete said contract including, but not limited to costs necessary to protect the traveling public or to avoid inconvenience to the traveling public, (liquidated damages as provided above) all repair and replacement costs necessary to rectify construction errors, architectural and engineering costs and fees, all Contractor fees, all testing and laboratory fees, and all interest, legal fees and litigation costs incurred by the Authority.

And the said Surety hereby stipulates and agrees that no change, extension, alteration, deduction of addition in or to the terms of the said contract or the plans or specification accompanying the same shall in any wise affect the obligation of said Surety on its bond.
