

MATERIALS CERTIFICATION

CONTRACT NO: D _____

F.A. PROJECT NO: _____

CONTRACT DESCRIPTION: _____

COUNTY OF: _____

In accordance with the requirements of FAPG, 23 CFR 637B, Sampling and Testing of Materials and Construction, this is to certify that:

The results of tests on acceptance samples indicate that the materials incorporated in the construction work, and the construction operations controlled by sampling and testing, were in conformity with the approved plans and specification requirements of the contract as evidenced by compliance with the Department's Quality Assurance Program as detailed in the Manual for Uniform Record Keeping and/or as stipulated in the specifications for each specific material. Also, comparisons between independent assurance sampling and testing for hot mix asphalt, portland cement concrete, embankment, and subbase materials were satisfactorily conducted.

- There were no failures of sample tests.
- Exceptions to the above have been explained by previous correspondence or are listed on the attached.

Appropriate documentation covering materials used in the work and independent assurance samples pertaining to the work, are in the Department's files in accordance with the rules and policies of the Department as set forth in the Manual for Uniform Record Keeping and the Independent Assurance Sampling and Testing Procedure Manual.
