

A. Project and Sponsor Information.														
Name of Action or Project:														
Assessment of Non-Fuel Facilities/Services at the New York State Thruway Authority's Service Areas														
Project Location (describe, and attach a general location map):		Ardley Service Area - Mile Post 6 NB - New York Division, Greenburgh, Westchester County	Sloatsburg Service Area - Mile Post 33 NB - New York Division, Ramapo, Rockland County	Ramapo Service Area - Mile Post 33 SB - New York Division, Ramapo, Rockland County	Plattekill Service Area - Mile Post 65 NB - New York Division, Newburgh, Orange County	Modena Service Area - Mile Post 66 SB - New York Division, Newburgh, Orange County	Ulster Service Area - Mile Post 96 SB - Albany Division, Ulster, Ulster County	Malden Service Area - Mile Post 103 NB - Albany Division, Saugerties, Ulster County	New Baltimore Service Area - Mile Post 127 NB/SB - Albany Division, New Baltimore, Greene County	Guilderland Service Area - Mile Post 153 EB - Albany Division, Guilderland, Albany County	Pattersonville Service Area - Mile Post 168 WB - Albany Division, Pattersonville, Montgomery County	Mohawk Service Area - Mile Post 172 EB - Albany Division, Montgomery County	Indian Castle Service Area - Mile Post 210 EB - Syracuse Division, Danube, Herkimer County	Iroquois Service Area - Mile Post 210 WB - Syracuse Division, Danube, Herkimer County
Brief Description of Proposed Action (include purpose or need):		The New York State Thruway Authority (NYSTA) has begun an effort to revitalize all 27 of the service areas along the New York State Thruway. The project is aimed at evaluating improvements and changes at these service areas. These updates may involve new restaurant offerings, enhanced tourist centers, revised parking facilities, improved amenities, or in some cases as warranted, reduction in services. A new level of service has been tentatively assigned for each service area based on existing operational metrics, public comments and envisioned role in the revised service area network. Depending on the proposed level of service, some areas will be expanded, others reduced and the remainder will essentially retain their existing footprint.  As part of this conceptual level work, NYSTA must determine the potential environmental impacts of such proposed action at all 27 sites in order to better determine the feasibility and costs of the plaza revision effort.

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage?	No	No												
If Yes,														
i. Purpose of the impoundment:														
ii. If a water impoundment, the principal source of the water:														
iii. If other than water, identify the type of impounded/contained liquids and their source.														
iv. Approximate size of the proposed impoundment: (million gallons; acres)														
v. Dimensions of the proposed dam or impounding structure: (height; length)														
vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):														
<b>D.2. Project Operations</b>														
a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both? (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)	No	No												
If Yes:														
i. What is the purpose of the excavation or dredging?														
ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?														
• Volume (specify tons or cubic yards):														
• Over what duration of time?														
iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.														
iv. Will there be onsite dewatering or processing of excavated materials? If yes, describe.														
v. What is the total area to be dredged or excavated? (acres)														
vi. What is the maximum area to be worked at any one time? (acres)														
vii. What would be the maximum depth of excavation or dredging? (feet)														
viii. Will the excavation require blasting?														
ix. Summarize site reclamation goals and plan:														
b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?	No	No												
If Yes:														
i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):														
ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:														
iii. Will proposed action cause or result in disturbance to bottom sediments? If Yes, describe:														
iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation? If Yes:														
• acres of aquatic vegetation proposed to be removed:														
• expected acreage of aquatic vegetation remaining after project completion:														
• purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):														
• proposed method of plant removal:														
• if chemical/herbicide treatment will be used, specify product(s):														
v. Describe any proposed reclamation/mitigation following disturbance:

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?														
• Volume (specify tons or cubic yards):														
• Over what duration of time?														
iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.														
iv. Will there be onsite dewatering or processing of excavated materials? If yes, describe.														
v. What is the total area to be dredged or excavated? (acres)														
vi. What is the maximum area to be worked at any one time? (acres)														
vii. What would be the maximum depth of excavation or dredging? (feet)														
viii. Will the excavation require blasting?														
ix. Summarize site reclamation goals and plan:														
b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?	No													
If Yes:														
i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):														
ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:														
iii. Will proposed action cause or result in disturbance to bottom sediments? If Yes, describe:														
iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation? If Yes:														
• acres of aquatic vegetation proposed to be removed:														
• expected acreage of aquatic vegetation remaining after project completion:														
• purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):														
• proposed method of plant removal:														
• if chemical/herbicide treatment will be used, specify product(s):														
v. Describe any proposed reclamation/mitigation following disturbance:														

	Level 2A	Level 2A	Level 2A	Level 3	Level 3	Level 2A	Level 2A	Level 3	Level 2B	Level 2B	Level 2B	Level 1	Level 2B	
Combined Service Areas	Ardley	Sloatsburg	Ramapo	Plattekill	Modena	Ulster	Malden	New Baltimore	Guiderland	Pattersonville	Mohawk	Indian Castle	Iroquois	
c. Will the proposed action use, or create a new demand for water?	No													
If Yes:														
i. Total anticipated water usage/demand per day: (gallons/day)														
ii. Will the proposed action obtain water from an existing public water supply?														
If Yes:														
• Name of district or service area:														
• Does the existing public water supply have capacity to serve the proposal?														
• Is the project site in the existing district?														
• Is expansion of the district needed?														
• Do existing lines serve the project site?														
iii. Will line extension within an existing district be necessary to supply the project?														
If Yes:														
• Describe extensions or capacity expansions proposed to serve this project:														
• Source(s) of supply for the district:														
iv. Is a new water supply district or service area proposed to be formed to serve the project site?														
If Yes:														
• Applicant/sponsor for new district:														
• Date application submitted or anticipated:														
• Proposed source(s) of supply for new district:														
v. If a public water supply will not be used, describe plans to provide water supply for the project:														
vi. If water supply will be from wells (public or private), maximum pumping capacity: (gallons/minute)														
d. Will the proposed action generate liquid wastes?	Yes													
If Yes:														
i. Total anticipated liquid waste generation per day: (gallons/day)	272,500	1,000	16,000	12,000	13,000	16,500	13,500	9,500	20,000	8,500	14,000	1,000	7,000	7,000
ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):	Facility Wastewater													
iii. Will the proposed action use any existing public wastewater treatment facilities?	Varies													
If Yes:														
• Name of wastewater treatment plant to be used:	Various	Yonkers Joint Wastewater Treatment Plant	TA Ramapo Wastewater Treatment Plant	TA Ramapo Wastewater Treatment Plant	TA Plattekill Wastewater Treatment Plant	TA Modena Wastewater Treatment Plant	TA Ulster Wastewater Treatment Plant	TA Malden Wastewater Treatment Plant	TA New Baltimore Wastewater Treatment Plant	Park Guiderland - Northeast Industrial Park	TA Pattersonville Wastewater Treatment Plant	Amsterdam - C Wastewater treatment plant	TA Indian Castle Wastewater Treatment Plant	TA Iroquois Wastewater Treatment Plant
• Name of district:	Various	Yonkers Joint WWTP								Guiderland		Amsterdam		
• Does the existing wastewater treatment plant have capacity to serve the project?	Yes	Yes								Yes		Yes		
• Is the project site in the existing district?	Yes	Yes								Yes		Yes		
• Is expansion of the district needed?	No	No								No		No		
• Do existing sewer lines serve the project site?	Yes/No	Yes								Yes		Yes		
• Will line extension within an existing district be necessary to serve the project?	No	No								No		No		
If Yes:														
• Describe extensions or capacity expansions proposed to serve this														
iv. Will a new wastewater (sewage) treatment district be formed to serve the project site?	No													
If Yes:														
• Applicant/sponsor for new district:														
• Date application submitted or anticipated:														
• What is the receiving water for the wastewater discharge?														
v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge, or describe subsurface disposal plans):														
vi. Describe any plans or designs to capture, recycle or reuse liquid waste:														

	Level 1	Level 3	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 2B	Level 3

	Ardley	Slonksburg	Ramapo	Plattekill	Madena	Ulster	Malden	New Baltimore	Guilfordland	Pattersonville	Mohawk	Indian Castle	Iroquois	
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction?	Yes	Yes												
If Yes:														
i. How much impervious surface will the project create in relation to total size of project parcel?	No anticipated increase in impervious area	No anticipated increase in impervious area												
Square feet or acres (impervious surface)	0	0												
Square feet or acres (parcel size)	178.7	4.2	7.9	6.0	6.5	6.3	7.1	7.0	12.5	8.6	7.1	4.9	7.2	7.2
ii. Describe types of new point sources.	None	No substantial change												
iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?	On-site stormwater management facility	On-site stormwater management facility												
• If to surface waters, identify receiving water bodies or wetlands:														
• Will stormwater runoff flow to adjacent properties?	No	No												
iv. Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	Yes	Yes												
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations?	Yes	Yes												
If Yes, identify:														
i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)	Transient passenger vehicles and trucks	Transient passenger vehicles and trucks												
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)	Portable generators and air compressors	Portable generators and air compressors												
iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)	Emergency generators and furnaces	Emergency generators and furnaces												
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit?	No	No												
If Yes:														
i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year)														
ii. In addition to emissions as calculated in the application, the project will generate:														
• Tons/year (short tons) of Carbon Dioxide (CO2)														
• Tons/year (short tons) of Nitrous Oxide (N2O)														
• Tons/year (short tons) of Perfluorocarbons (PFCs)														
• Tons/year (short tons) of Sulfur Hexafluoride (SF6)														
• Tons/year (short tons) of Carbon Dioxide equivalent of Hydrofluorocarbons (HFCs)														
• Tons/year (short tons) of Hazardous Air Pollutants (HAPs)														
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?	No	No												
If Yes:														
i. Estimate methane generation in tons/year (metric):														
ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):														
i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?	No	No												
If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):														
j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?	No	No												
If Yes:														
i. When is the peak traffic expected?: (Morning/Evening/Weekend)														
Randomly between hours of _____ to _____.														
ii. For commercial activities only, projected number of semi-trailer truck trips/day:														
iii. Parking spaces: Existing														
iii. Parking spaces: Proposed														
iii. Parking spaces: Net increase/decrease														
iv. Does the proposed action include any shared use parking?														
v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:														
vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site?														
vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles?														
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes?														

	Level 1	Level 3	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 2B	Level 3
	Schuyler	Oneida	Chittenango	DeWitt	Warrens	Port Byron	Junius Ponds	Clifton Springs	Seneca	Scottsville	Ontario	Pembroke	Clarence	Angola
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction?	Yes													
If Yes:														
i. How much impervious surface will the project create in relation to total size of project parcel?	No anticipated increase in impervious area													
Square feet or acres (impervious surface)	0													
Square feet or acres (parcel size)	6.1	4.7	6.0	4.5	6.7	6.3	5.2	5.8	4.6	5.2	6.6	7.4	5.7	11.4
ii. Describe types of new point sources.	None													
iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?	On-site stormwater management facility													
• If to surface waters, identify receiving water bodies or wetlands:														
• Will stormwater runoff flow to adjacent properties?	No													
iv. Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	Yes													
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations?	Yes													
If Yes, identify:														
i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)	Transient passenger vehicles and trucks													
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)	Portable generators and air compressors													
iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)	Emergency generators and furnaces													
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit?	No													
If Yes:														
i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year)														
ii. In addition to emissions as calculated in the application, the project will generate:														
• Tons/year (short tons) of Carbon Dioxide (CO2)														
• Tons/year (short tons) of Nitrous Oxide (N2O)														
• Tons/year (short tons) of Perfluorocarbons (PFCs)														
• Tons/year (short tons) of Sulfur Hexafluoride (SF6)														
• Tons/year (short tons) of Carbon Dioxide equivalent of Hydrofluorocarbons (HFCs)														
• Tons/year (short tons) of Hazardous Air Pollutants (HAPs)														
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?	No													
If Yes:														
i. Estimate methane generation in tons/year (metric):														
ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):														
i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?	No													
If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):														
j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?	No													
If Yes:														
i. When is the peak traffic expected?: (Morning/Evening/Weekend)														
Randomly between hours of _____ to _____.														
ii. For commercial activities only, projected number of semi-trailer truck trips/day:														
iii. Parking spaces: Existing														
iii. Parking spaces: Proposed														
iii. Parking spaces: Net increase/decrease														
iv. Does the proposed action include any shared use parking?														
v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:														
vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site?														
vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles?														
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes?

	Ardley	Slottsburg	Ramapo	Plattekill	Madena	Ulster	Malden	New Baltimore	Guilderland	Pattersonville	Mohawk	Indian Castle	Iroquois	
k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy?	No	No												
If Yes:														
i. Estimate annual electricity demand during operation of the proposed action:														
ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):														
iii. Will the proposed action require a new, or an upgrade to, an existing substation?														
l. Hours of operation. Answer all items which apply.														
i. During Construction:	24 Hour	24 Hour												
ii. During Operations:	24 Hour	24 Hour												
m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both?	Yes	Yes												
If yes:														
i. Provide details including sources, time of day and duration:	Potentially during daytime construction, and some limited nighttime construction activity	Potentially during daytime construction, and some limited nighttime construction activity.												
ii. Will proposed action remove existing natural barriers that could act as a noise barrier or screen?	No	No												
Describe:														
n. Will the proposed action have outdoor lighting?	Yes	Yes												
If yes:														
i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	Various safety and general lighting for user illumination immediately around structures and parking areas	Various safety and general lighting for user illumination immediately around structures and parking areas.												
ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen?	No	No												
Describe:														
o. Does the proposed action have the potential to produce odors for more than one hour per day?	No	No												
If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:														
p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage?	No	No												
If Yes:														
i. Product(s) to be stored														
ii. Volume(s) per unit time (e.g., month, year)														
iii. Generally describe proposed storage facilities:														
q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation?	Yes	Yes												
If Yes:														
i. Describe proposed treatment(s):	Routine weed and pest control during operations	Routine weed and pest control during operations												
ii. Will the proposed action use Integrated Pest Management Practices?	No	No												
r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)?	Yes	Yes												
If Yes:														
i. Describe any solid waste(s) to be generated during construction or operation of the facility:														
• Construction: ( tons per unit of time)	29,520.83 tons	868.35 tons	2,357.1 tons	810 tons	1,229.33 tons	1,187.25 tons	863.775 tons	1,366.5 tons	1,212.6 tons	1,144.5 tons	1,218 tons	818.55 tons	959.33 tons	843.75 tons
• Operation : (tons per unit of time)	No substantial change	No substantial change												
ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:														
• Construction:	Recycling will occur where appropriate	Recycling and reuse of materials will occur when and where appropriate												
• Operation:	Continuation of recycling programs on-site	Continuation of recycling programs on-site												
iii. Proposed disposal methods/facilities for solid waste generated on-site:														
• Construction:	Part 363 facility	Transport to a Part 363 solid waste facility												
• Operation:	Continue transport to a Part 363 solid waste facility	Continued transport to a Part 363 solid waste facility												

	Level 1	Level 3	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 2B	Level 3

s. Does the proposed action include construction or modification of a solid waste management facility?	No	No												
If Yes:														
i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):														
ii. Anticipated rate of disposal/processing:														
• Tons/month, if transfer or other non-combustion/thermal treatment, or														
• Tons/hour, if combustion or thermal treatment														
iii. If landfill, anticipated site life: (years)														
t. Will proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste?	No	No												
If Yes:														
i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility:														
ii. Generally describe processes or activities involving hazardous wastes or constituents:														
iii. Specify amount to be handled or generated (tons/month)														
iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents:														
v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility?														
If Yes: provide name and location of facility:														
If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

c. Is the project site presently used by members of the community for public recreation?														
	No	No												
i. If Yes: explain:														
d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site?	Varies	No	No	No	No	No	No	No	No	No	No	No	No	No
If Yes,														
i. Identify Facilities:														

	Level 1	Level 3	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 2B	Level 3
	Schuyler	Oneida	Chittenango	DeWitt	Warners	Port Byron	Junius Ponds	Clifton Springs	Seneca	Scottsville	Ontario	Pembroke	Clarence	Angola
s. Does the proposed action include construction or modification of a solid waste management facility?	No													
If Yes:														
i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):														
ii. Anticipated rate of disposal/processing:														
• Tons/month, if transfer or other non-combustion/thermal treatment, or														
• Tons/hour, if combustion or thermal treatment														
iii. If landfill, anticipated site life: (years)														
t. Will proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste?	No													
If Yes:														
i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility:														
ii. Generally describe processes or activities involving hazardous wastes or constituents:														
iii. Specify amount to be handled or generated (tons/month)														
iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents:														
v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility?														
If Yes: provide name and location of facility:														
If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

• Wetlands: Name and Approximate Size • Wetland No. (if regulated by DEC)	Various	Federal Wetlands nearby - 10 acres	Federal wetlands nearby, 10 acres					Federal Wetlands Nearby, 5 acres						
v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies?	Varies	Yes	No	No	No			No		No				
If yes, name of impaired water body/bodies and basis for listing as impaired:	Various	Bronx River, Upper - Pathogens;D.O./Oxygen Demand - Recreation; Aquatic Life												
i. Is the project site in a designated Floodway?	Varies	No	No	Yes	No	No	No	No	No	No	No	No	No	No
j. Is the project site in the 100 year Floodplain?	Varies	Yes	Yes	Yes	No	No	No	Yes	No	No	No	No	No	No
k. Is the project site in the 500 year Floodplain?	Varies	Yes	No	No	No	No	No	No	No	No	No	No	No	No
l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer?	Varies	Yes	Yes	Yes	No	No	No	No	No	Yes	No	No	Yes	Yes
If Yes:														
i. Name of aquifer:	Various	Principal Aquifer	Principal Aquifer, Sole Source Aquifer, Ramapo SSA, Primary Aquifer	Principal Aquifer, Sole Source Names: Ramapo SSA, Primary Aquifer						Principal Aquifer, Sole Source Aquifer Names: Schenectady-Niskayuna SSA			Principal Aquifer	Principal Aquifer
m. Identify the predominant wildlife species that occupy or use the project site:	American Crow, English Sparrow, Rock Pigeon, European Starling	American Crow, English Sparrow, Rock Pigeon, European Starling												
n. Does the project site contain a designated significant natural community? If Yes:	No	No												
i. Describe the habitat/community (composition, function, and basis for designation):														
ii. Source(s) of description or evaluation:														
iii. Extent of community/habitat: • Currently: (acres) • Following completion of project as proposed: (acres) • Gain or loss (indicate + or -): (acres)														
o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species?	Varies - likely none on-site	None	Northern Long-eared Bat, Indiana Bat, Timber Rattlesnake, Bog Turtle	Northern Long-eared Bat, Indiana Bat, Timber Rattlesnake, Bog Turtle	Indiana Bat and Northern Long-eared Bat	Indiana Bat, Northern Long-eared Bat, Bog Turtle, and Dwarf Wedgemussel	Indiana Bat, Northern Long-eared Bat, and Bog Turtle	Indiana Bat and Northern Long-eared Bat	Indiana Bat and Northern Long-eared Bat	Northern Long-eared Bat, Frosted Elfin, Karner Blue	Northern Long-eared Bat and Bald Eagle	Northern Long-eared Bat	Northern Long-eared Bat	Northern Long-eared Bat
p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern?	No	No												
q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? If yes, give a brief description of how the proposed action may affect that use:	No	No												
<b>E.3. Designated Public Resources On or Near Project Site</b>														
a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? If Yes, provide county plus district name/number:	No	No												
b. Are agricultural lands consisting of highly productive soils present? i. If Yes: acreage(s) on project site? ii. Source(s) of soil rating(s):	No	No												
c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? If Yes:	No	No												
i. Nature of the natural landmark: (Biological Community or Geological Feature)														
ii. Provide brief description of landmark, including values behind designation and approximate size/extent:														

	Level 1	Level 3	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 3	Level 1	Level 2B	Level 2B	Level 2B	Level 2B	Level 3
	Schuyler	Oneida	Chittenango	DeWitt	Warrens	Port Byron	Junius Ponds	Clifton Springs	Seneca	Scottsville	Ontario	Pembroke	Clarence	Angola
h. Surface water features.														
i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)?	No	No	No	No	No	No	No	No	No	No	No	No	Yes	No
ii. Do any wetlands or other waterbodies adjoin the project site?	No	Yes	Yes	No	Yes	Yes	No	No	Yes	No	No	Yes	Yes	Yes
If Yes to either i or ii, continue. If No, skip to E.2.i.														
iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency?		Yes	Yes		Yes	Yes			Yes			Yes	Yes	Yes
iv. For each identified regulated wetland and waterbody on the project site, provide the following information:														
• Streams: Name and Classification		Unnamed - Class C nearby			Unnamed - Class C nearby	Unnamed - Class C nearby			Unnamed - Class C nearby			Tonawanda Creek - Class B nearby	None	Big Sister Creek - Class C nearby
• Lakes or Ponds: Name and Classification								None						
• Wetlands: Name and Approximate Size		Federal and State wetlands nearby, 190 acres	Small Federal wetland nearby, 2 acres		Federal Wetlands and State across Thruway, 80 acres	Federal and State Wetlands across Thruway, 30 acres						Federal Wetlands nearby, 10 acres	Federal Wetlands on-site and nearby, 5 acres	
• Wetland No. (if regulated by DEC)		CI-10			CAM-20	M-18								
v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies?		No	No		No	No			No			No	No	No
If yes, name of impaired water body/bodies and basis for listing as impaired:														
i. Is the project site in a designated Floodway?	No	No	No	No	No	No	No	No	No	No	No	No	No	No
j. Is the project site in the 100 year Floodplain?	No	No	No	No	No	No	No	No	No	No	No	No	No	No
